

Session Program

27 September 2015 to 3 October 2015

Quark Matter 2015 - XXV International Conference on Ultrarelativistic Nucleus-Nucleus Collisions

Electromagnetic Probes II

Kobe, Fashion Mart, Japan

Wednesday 30 September

10:50

Electromagnetic Probes II

Session | **Location:** Exhibition Space 2-B | **Convener:** Harald Appelshaeuser

10:50-11:10

PHENIX results on low-mass dileptons in Au+\$+\$Au collisions with the Hadron Blind Detector

Speaker

Mihael Makek

11:10-11:30

System-size and energy dependences of dielectron excess invariant-mass spectra at STAR

Speaker

Mr Shuai Yang

11:30-11:50

Low-Mass Dielectron Measurements in pp, p-Pb and Pb-Pb Collisions with ALICE

Speaker

Patrick Simon Reichelt

11:50-12:10

Vector boson production in p+Pb and Pb+Pb collisions measured with ATLAS at the LHC

Speaker

Iwona Grabowska-Bold

12:10-12:30

W and Z bosons in pp, pPb and PbPb with CMS

Speaker

Emilien Chapon

12:30
