

Session Program

8-11 Dec 2014

RD51 mini week

WG2 - Physics issues

CERN, 31/3-004 - IT Amphitheatre
Attention: not always in the same room

Thursday 11 December

09:00

WG2 - Physics issues

Session | **Location:** CERN, 40/S2-B01 - Salle Bohr | **Conveners:**
Harry Van Der Graaf, Maximilien Chefdeville, Diego Gonzalez Diaz

09:00–09:30

Measurement of polarised gamma rays (1.7 to 72MeV) in the HARPO TPC

Speaker

Philippe Gros

09:30–09:55

Operation of a 10bar/1kg Penning-Fluorescence Xenon TPC for electron tracks at the Xe136-bb0 energy scale

Speaker

Diego Gonzalez Diaz

09:55–10:15

New developments in large area THGEM characterisation

Speaker

Carlos Alexandre Fernandes Dos Santos

10:15–10:40

Towards spark free single-stage THGEM detectors

Speaker

Shikma Bressler

12:30
