

# Grid Acknowledgements

Henry Nebrensky, Brunel University

Since we use the Grid for data storage and reconstruction, we need to make sure its contribution is acknowledged. This obviously applies to any analysis using the official Batch Reprocessing output but it also includes all activities that depend on data storage and transfer, for example raw data, Tracker cosmics, EMR cosmics, etc.

At present we are formally only using GridPP resources, so should follow their instructions; i.e. either something like

“We acknowledge the use of Grid computing resources deployed and operated by GridPP in the UK.

<http://www.gridpp.ac.uk/>”

or - particularly for papers depending on batch reprocessing or MonteCarlo - cite at least the 2009 paper:

D. Britton *et al.* "GridPP: the UK grid for particle physics",  
*Phil. Trans. R. Soc. A* 367 pp.2447-2457 (2009);  
doi:10.1098/rsta.2009.0036
