High-energy physics and associated technologies in Portugal

Monday, 28 September 2015 14:55 (30 minutes)

Portugal joined CERN 30 years ago. This event was coincident with the creation of LIP and the start of activities in Experimental Particle Physics in Portugal. It was also a landmark in the internationalization of Portuguese Science. In this talk we will follow the trajectory of high-energy physics and associated technologies in Portugal with emphasis on the recent projects.

Presenter: BARREIRA, Gaspar (LIP)

Session Classification: Opening
