

Site Readiness - Panel Discussion

Saturday 1 September 2007 11:00 (45 minutes)

Suggested topics to seed discussion:

<P> State of hardware resources for startup compared with pledges. Longer term planning - readiness for future major expansion (2010 and beyond). Tested readiness of magnetic tape infrastructure. Tested readiness of site data management layer above the hardware including for full rate multi-VO operation. Formal planning for 24 by 7 operations ready (including for staffing) and documented to the experiments and other sites. Experiment local site support in place with clearly defined roles. Other issues you would like to add/clarify/replace.

Presenters: RENSHALL, Harry; COLES, Jeremy (RAL & GridPP); BOS, Kors (NIKHEF, CERN & ATLAS); DELL'AGNELLO, Luca (CNAF & INFN); GUELZOW, Volker (DESY)
