

- Number of "stale" jobs less than 1% of the total

## MS test results

MS was tested both by submitting a few hundred jobs and job sets. The job set was monitored and jobs were identified and their WMS internal status was monitored (system load, etc.). A test to verify performance criteria was performed and the following results were obtained:

- 100% of jobs submitted in 7 days
- 0% of jobs aborted due to the system
- 0% delay between job submission and arrival on the CE
- 100% of performance criteria were fully met.
