The Design and Implementation of BES Grid Computing System

Monday 3 September 2007 08:00 (20 minutes)

Beijing Electron Spectrometer (BESIII) experiment will produce 5 PB of data in next five years. Grid is used to solve this challenge. This paper introduces BES grid computing model and specific technologies, including automatic data replication, fine-grained job scheduling and so on.

Authors: Prof. CHEN, Gang (IHEP, China); Dr CHENG, Yaodong (IHEP, China)

Co-authors: Ms SHI, Jingyan (IHEP, China); Ms WANG, Lu (IHEP, China); Ms ZHANG, Xiaomei (IHEP, China)

Presenter: Prof. CHEN, Gang (IHEP, China)

Session Classification: Poster 1

Track Classification: Computer facilities, production grids and networking
