The U.S. High Energy Physics Program in a Global Vision of Particle Physics

Saturday, August 8, 2015 10:50 AM (30 minutes)

The DOE Office of High Energy Physics is continuing to implement the global vision for particle physics presented in the May 2014 report of the Particle Physics Project Prioritization Panel (P5). Widespread support from the U.S. and international particle physics communities has enabled rapid progress for key elements of the program envisioned by P5 and will continue to be crucial to successfully implementing the strategy moving forward. I will discuss how the DOE High Energy Physics program is executing its mission in coordination with domestic and international partners in order to pursue the five intertwined science drivers and enable discovery at the frontiers of particle physics.

Oral or Poster Presentation

Oral

Primary author: SIEGRIST, Jim (DOE)

Presenter: SIEGRIST, Jim (DOE)

Session Classification: Session II-E

Track Classification: Plenary sessions
