

## **Session Program**

**13-16 Sept 2006**

## **Prospects for Charged Higgs Discovery at Colliders**

***Results from analyses of physics and simulated data using different tools***

Uppsala University, Gustavianum

## Saturday 16 September

09:00

### Results from analyses of physics and simulated data using different tools

Session | Location: Uppsala University, Gustavianum

09:00–09:20

#### Tau polarisation in charged Higgs search

**Speaker**

Ritva Kinnunen

09:20–09:40

#### Monte Carlo Study on $pp \rightarrow tbH^{++}$ and application of an iterative discriminatn (IDA) method

**Speaker**

Dr Stefan Hesselbach

09:40–10:00

#### ATLAS Discovery Potential for the Charged Higgs Boson decaying to a Tau Lepton

**Speaker**

Martin Flechl

10:45

10:00–10:45

#### Discussion
