

EDS Blois 2015: The 16th conference on Elastic and Diffractive scattering

Monday, 29 June 2015 - Saturday, 4 July 2015

Borgo, Corsica

Scientific Programme

Multi-parton interactions, soft QCD and diffraction:

Conveners: Marc Besançon, Benoit Roland, Valentina Avati

Heavy ions (CQC, QGP, UPC):

Conveners: Matthew Nguyen, Guillermo Contreras, David d'Enterria, Javier Albacete

Recent theory development:

Conveners: Edmond Iancu, Lech Szymanowski

Hard diffraction and central exclusive production:

Conveners: Christophe Royon, Christina Mesropian, Valery Khoze, Ronan Mc Nulty

Forward Physics (low x) and cosmic rays:

Conveners: Cyrille Marquet, Tanguy Pierog, Grzegorz Brona

High pT and jet physics:

Conveners: Gregory Soyez, Mikko Voutilainen, Oldrich Kepka

Exclusive processes and hadron structure:

Conveners: Samuel Wallon, Franck Sabatie, Vladimir Braun

Multi-parton interactions, soft QCD and diffraction

Heavy ion (CGC, QGP. UPC)

Recent theory development

Forward Physics (low x) and cosmic rays

High p_T and jet physics

Exclusive processes and hadron structure

Hard diffraction and central exclusive production
