

ACADEMIA-INDUSTRY MATCHING EVENT ON CRYOGENICS

HEPTech, together with CNRS, CEA, Grenoble University, Lanef and ILL, in close partnership with CERN, the University of Twente, and the Rutherford Appleton Laboratory, is organizing an Academia Industry Matching Event on Cryogenics. This event is a unique opportunity for industry to meet leading experts in cryogenics and project leaders that may have challenging needs of development and manufacturing of future cryogenics systems. For this purpose, face to face meetings will be organized over the two days in a brokerage event available in separate rooms. The first meeting of the new Cryogenics Society of Europe (CSE) will take place on 4th of June.

Topics to be addressed:

- Cryogenic Systems for HEP at particles accelerators, neutron facilities, and related applications;
- Cryogenics for Astrophysics/HEP in Space;
- Industrial spin-offs: MRI, NMR and energy-related applications;

4-5 June 2015

Chambre de Commerce et d'Industrie de Grenoble, Grenoble, France
