

Phenomenology 2015 Symposium

Monday 4 May 2015

SUSY II - G31 (16:30 - 18:30)

-Conveners: Matthew Baumgart

time	[id] title	presenter
16:30	[162] 125 GeV Higgs from Tree-level A-terms	BASIRNIA, Aria
16:45	[93] Dirac Triplet Extension of the MSSM	ALVARADO, Carlos
17:00	[69] Implications of naturalness for the heavy Higgs bosons of supersymmetry	SAVOY, Michael
17:15	[156] Is the higgs the first supersymmetric particle?	DROR, Jeff
17:30	[205] Searches for squarks and gluinos with the ATLAS detector	KATAOKA, Yousuke
17:45	[79] Probing Light Stops with Stoppedium	JUNG, Sunghoon
18:00	[206] Searches for electroweak production of supersymmetry, supersymmetry in resonance production, R-parity violating signatures and events with long-lived particles with the ATLAS detector	PAIS, Preema Rennee
18:15	[212] Explored and Unexplored MSSM Signatures	BEIN, Samuel Louis
