

Phenomenology 2015 Symposium

Tuesday 5 May 2015

BSM V - 157 (16:30 - 18:30)

-Conveners: Azar Mustafayev

time	[id] title	presenter
16:30	[211] Search for vector-like quarks at the LHC using the CMS detector	MAJUMDER, Devdatta
16:45	[165] Searches for vector-like quarks with the ATLAS detector at the LHC	NAYYAR, Ruchika
17:00	[132] The Oddest Little Higgs: Top partners decaying into jets	COLLINS, Jack
17:15	[121] Extra dimensions versus supersymmetry at the LHC	Prof. NANDI, Satyanarayan
17:30	[59] Discovery opportunity of new physics with M2 variables	KIM, Doojin
17:45	[82] Searches for new physics in diboson resonances and other signatures with the ATLAS detector at the LHC	Mr ANGEL, Campoverde
18:00	[58] Search for heavy resonances in diboson final states with the CMS detector at LHC	NGADIUBA, Jennifer
18:15	[193] Searches for resonant pair production of Higgs bosons using the CMS detector	DAS, Souvik
