

Machines AD-ring & LEIR : Planning LS1 2012/2014 - updated planning

ID	Task Name	In charge	Group	Zone	05/14														06/14														07/14														08/14																									
					19				20				21				22				23				24				25				26				27				28				29				30				31				32				33				34				35			
					19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35																																																			
25	AD-ring																																																																							
26	Opening/closing activities																																																																							
35	Machine closed	N. Gilbert	EN/MEF	193																																																																				
36	Removal OP7/OP8	T. Eriksson	BE/OP	193																																																																				
37	Hardware tests	N. Gilbert	EN/MEF	193																																																																				
38	Electrical tests (QTIRM, ...) - machine closed	J. Baillie	TE/EPC																																																																					
39	Electrical tests (QTIRM, ...) - machine closed	J. Baillie	TE/EPC																																																																					
40	Access syst : test "protons" mode - hall closed	E. Sanchez	GS/ASE	193																																																																				
42	Patrol + DSO test	T. Eriksson	BE/OP	193																																																																				
43	Cold checkout	T. Eriksson	BE/OP	193																																																																				
44	Beam back from PS to AD	T. Eriksson	BE/OP	193																																																																				
45	Beam back from AD to experimental areas	T. Eriksson	BE/OP	193																																																																				
276	LEIR																																																																							
277	Opening/closing activities																																																																							
290	Machine closed	N. Gilbert	EN/MEF	150																																																																				
291	De-condemn power supplies	N. Gilbert	EN/MEF	150																																																																				
292	Hardware tests	N. Gilbert	EN/MEF	150																																																																				
293	Access syst : pre-test	E. Sanchez	GS/ASE	193																																																																				
294	Patrol + DSO test		BE/OP	150																																																																				
295	Cold checkout		BE/OP	150																																																																				
296	Ar beam from L3 to LEIR		BE/OP	150																																																																				
297	Ar beam from LEIR to PS		BE/OP	150
