

Feedback from the CMS Virtual Visit to Brazil

22 January 2015

Participants:

Total: 47

1) Universidade do Estado do Rio de Janeiro (UERJ)

15 people: grad and undergrad students mainly

Contact: Wagner de Paula Carvalho

2) Amazonas State University (UEA)

30 people (grad and undergrad students, physicists of other field and some administration, possibly our Rector and Vice-Rector of research)

Contact: Felipe Silva

3) Federal Institute of Ceará (IFCE)

Contact: Mairton Cavalcante Romeu

Didn't manage to connect.

4) Instituto Federal de Educação, Ciência e Tecnologia do Ceará (Fortaleza)

1 person

Contact: Nizomar de Sousa Gonçalves

5) Reinaldo Carletti

Individual researcher from Sao Paolo. He requested a visit via online form in October and was added to the closest Virtual Visit scheduled with Brazil.

Planning:

1. Introduction (by Filipe Silva)
2. Connection with the CMS CR and cavern
3. More explanations about CMS (by Alberto Santoro, about 1 hour after the VV)
4. Q&A
 - Loads of enthusiasm and many questions from the students; some of them from the Engineering Courses declared that they want to do Physics to participate in the future in this experiment. They were also questions about UEA enter to CMS (it is not a part of CMS).
 - "I can participate too?"

Word from the local organizer

“This will help me with the local projects because the interest of the students increasing, that is the best pushing in the University.”

Technical observation

“I believe that we have to recommend to connect in Vidyo only as you have recommended. For example at UEA they connect via a Polycom and this machine has other control that mixed with vidyo make some confusion.”
