

The High-Energy Physics Kit - HEPKIT2015

Monday 5 October 2015 - Thursday 8 October 2015

Karlsruhe Institute of Technology (KIT)

Book of Abstracts

Contents

SM Higgs Boson Production and Decay	1
Precise predictions for Higgs production in association with top quarks	1
Welcome	1
Ratio of signal strengths $\gamma\gamma/ZZ$ and the probing of the TeV scale	1
Higgs Couplings and EFT Fits	1
The profile of the Higgs boson at 125 GeV after Run 1	1
Towards full NLO QCD corrections to Higgs boson pair production via gluon fusion	1
Beyond the Standard Model Higgs pair production	2
Herwig and Matchbox	2
Summary of LHC Results	2
Precision Calculations for Gauge Boson Pair Production Processes at the LHC	2
Electroweak Interactions at the Highest Energies	2
Highlights in Top Physics	2
Top-Quark Pair Production close to threshold	2
Fingerprinting natural new top quark physics at the LHC	3
Dominant $O(\alpha\alpha_s)$ corrections to Drell–Yan processes in the resonance region	3
Studying the Z boson resonance not with weak loops, but with the SMATASY/ZFITTER-kit	3
Hadronic contributions to electroweak observables from lattice QCD	3
Muon anomalous magnetic moment in BSM: MSSM and THDM	3
Precision Measurements of $\sin^2\theta_w$ at MESA	3
Precision measurements with polarized beams	4
New frontiers in flavor physics	4
On 3-3-1 models	4

LHC, Higgs and SUSY	4
SUSY - Higgs	4
Higgs searches in CMS	4
Higgs boson masses in SUSY Models	4
Full NLO predictions for the decay of CP-odd Higgs bosons into stops in the NMSSM . .	5
Trilinear couplings at order $cal(\alpha_t\alpha_s)$ in the complex NMSSM	5
SusHi for Vegetarians	5
Precision Calculations of Top- and Bottom-Yukawa Couplings within the Standard Model and Supersymmetry	5
Discriminating between SUSY and Non-SUSY Higgs Sectors through the Ratio $H\rightarrow bb/H\rightarrow$ $\tau\tau$ with a 125 GeV Higgs boson	5
Lab frame observables for CP of the $t\bar{t}$ Higgs coupling	5
CP-violating Higgs decays in the 2HDM	6
Simplified models for Higgs physics	6
Effective Field Theory for the Higgs	6
BSM Higgs physics: effective theories versus UV-complete models	6
Cosmological Relaxation of the Weak Scale	6
Higgs-radion mixing in stabilized brane world models	6
Likelihood analyses in BSM searches: from model-independent up to searches in dedicated scenarios	6
Resummation Results for LHC	7
Stop Searches at the LHC	7
Non-Minimal SUSY Models	7
Farewell	7
CP-violating Higgs decays in the 2HDM	7
nMSSM after the LHC RUN 1	7

Afternoon Session I / 3

SM Higgs Boson Production and Decay

Corresponding Author: michael.spira@psi.ch

Afternoon Session I / 4

Precise predictions for Higgs production in association with top quarks

Corresponding Author: denner@physik.uni-wuerzburg.de

Afternoon Session I / 5

Welcome

Corresponding Author: milada.muehleitner@cern.ch

Afternoon Session I / 6

Ratio of signal strengths $\gamma\gamma/ZZ$ and the probing of the TeV scale

Corresponding Author: abdelhak.djouadi@th.u-psud.fr

Afternoon Session I / 7

Higgs Couplings and EFT Fits

Corresponding Author: plehn@uni-heidelberg.de

Afternoon Session II / 8

The profile of the Higgs boson at 125 GeV after Run 1

Corresponding Author: markus.schumacher@physik.uni-freiburg.de

Afternoon Session II / 9

Towards full NLO QCD corrections to Higgs boson pair production via gluon fusion

Corresponding Author: kerner@mpp.mpg.de

Afternoon Session II / 10

Beyond the Standard Model Higgs pair production

Corresponding Author: groeber@roma3.infn.it

Afternoon Session II / 11

Herwig and Matchbox

Corresponding Author: stefan.gieseke@cern.ch

Morning Session I / 12

Summary of LHC Results

Corresponding Author: thomas.mueller@kit.edu

Morning Session I / 13

Precision Calculations for Gauge Boson Pair Production Processes at the LHC

Corresponding Author: jaegerba@uni-mainz.de

Morning Session I / 14

Electroweak Interactions at the Highest Energies

Corresponding Author: kilian@physik.uni-siegen.de

Morning Session II / 15

Highlights in Top Physics

Corresponding Author: schwanen@fnal.gov

Morning Session II / 16

Top-Quark Pair Production close to threshold

Corresponding Author: johann.kuehn@kit.edu

Morning Session II / 17

Fingerprinting natural new top quark physics at the LHC

Corresponding Author: afreitas@pitt.edu

Afternoon Session I / 18

Dominant $O(\alpha^* \alpha_s)$ corrections to Drell–Yan processes in the resonance region

Corresponding Author: stefan.dittmaier@physik.uni-freiburg.de

Afternoon Session I / 19

Studying the Z boson resonance not with weak loops, but with the SMATASY/ZFITTER-kit

Corresponding Author: tord.riemann@desy.de

Afternoon Session I / 20

Hadronic contributions to electroweak observables from lattice QCD

Corresponding Author: karl.jansen@desy.de

Afternoon Session I / 21

Muon anomalous magnetic moment in BSM: MSSM and THDM

Corresponding Author: hyejung.stoeckinger-kim@physik.tu-dresden.de

Afternoon Session II / 22

Precision Measurements of $\sin^2 \theta_w$ at MESA

Corresponding Author: hspiesb@zino.physik.uni-mainz.de

Afternoon Session II / 23

Precision measurements with polarized beams

Corresponding Author: sabine.riemann@desy.de

Afternoon Session II / 24

New frontiers in flavor physics

Corresponding Author: ghiller@physik.uni-dortmund.de

Afternoon Session II / 25

On 3-3-1 models

Corresponding Author: duc.ninh.le@physik.hu-berlin.de

Morning Session I / 26

LHC, Higgs and SUSY

Corresponding Author: nazila.mahmoudi@cern.ch

Morning Session I / 27

SUSY - Higgs

Corresponding Author: sven.heinemeyer@cern.ch

Morning Session I / 28

Higgs searches in CMS

Corresponding Author: alexandre.nikitenko@cern.ch

Morning Session II / 29

Higgs boson masses in SUSY Models

Corresponding Author: heidi.rzehak@cern.ch

Morning Session II / 30

Full NLO predictions for the decay of CP-odd Higgs bosons into stops in the NMSSM

Corresponding Author: julien.baglio@cern.ch

Morning Session II / 31

Trilinear couplings at order $cal(\alpha_t\alpha_s)$ in the complex NMSSM

Corresponding Author: dtnhung2008@gmail.com

Afternoon Session I / 32

SusHi for Vegetarians

Corresponding Author: harlander@physik.uni-wuppertal.de

Afternoon Session I / 33

Precision Calculations of Top- and Bottom-Yukawa Couplings within the Standard Model and Supersymmetry

Corresponding Author: luminita@particle.uni-karlsruhe.de

Afternoon Session I / 34

Discriminating between SUSY and Non-SUSY Higgs Sectors through the Ratio $H \rightarrow bb/H \rightarrow \tau\tau$ with a 125 GeV Higgs boson

Corresponding Author: siannah.penaranda@cern.ch

35

Lab frame observables for CP of the t t bar Higgs coupling

Corresponding Author: rohini.godbole@cern.ch

36

CP-violating Higgs decays in the 2HDM

Corresponding Author: rsantos@cii.fc.ul.pt

Afternoon Session II / 37

Simplified models for Higgs physics

Corresponding Author: mkraemer@physik.rwth-aachen.de

Afternoon Session II / 38

Effective Field Theory for the Higgs

Corresponding Author: roberto.contino@cern.ch

Afternoon Session II / 39

BSM Higgs physics: effective theories versus UV-complete models

Corresponding Author: david.lopezval@uclouvain.be

Morning Session I / 40

Cosmological Relaxation of the Weak Scale

Corresponding Author: christophe.grojean@cern.ch

Morning Session I / 41

Higgs-radion mixing in stabilized brane world models

Corresponding Author: eduard.boos@cern.ch

Morning Session I / 42

Likelihood analyses in BSM searches: from model-independent up to searches in dedicated scenarios

Corresponding Author: roger.wolf@cern.ch

Morning Session II / 43

Resummation Results for LHC

Corresponding Author: anna.kulesza@uni-muenster.de

Morning Session II / 44

Stop Searches at the LHC

Corresponding Author: eva.popenda@psi.ch

Morning Session II / 45

Non-Minimal SUSY Models

Corresponding Author: dominik.stoeckinger@tu-dresden.de

Morning Session II / 46

Farewell

Corresponding Author: milada.muehleitner@cern.ch

Afternoon Session I / 47

CP-violating Higgs decays in the 2HDM

Corresponding Author: rui.santos@cern.ch

Morning Session II / 48

nMSSM after the LHC RUN 1

Corresponding Author: belanger@lapp.in2p3.fr
