

**Session Program**

**8-9 Apr 2015**

**2nd RDA Europe Science Workshop**

***RDA Activities***

CERN, 31/3-004 - IT Amphitheatre

# Wednesday 8 April

14:00

## RDA Activities

**Session** | **Location:** CERN, 31/3-004 - IT Amphitheatre

14:00-15:30 **Statements & Discussion**

15:30-15:45 **Coffee Break**

15:45-16:00 **RDA Results**

**Speaker**

Raphael Ritz

16:00-16:20 **New RDA Activities**

**Speaker**

Peter Wittenburg

16:20-17:30 **Statements & Discussion - RDA Issues**

**Subcontributions**

It took up to 15--20 years between the definition of TCP/IP and its worldwide take--up by scientists, industry a societies. Can this huge time gap be avoided when talking about simplifying data re--use?

Do the 4 concrete results achieved within 18 months mean something to you and do they satisfy your expectations? If not what would you have expected as results? (see attached flyers)

Do the areas of activity meet your expectations or what is missing or not useful? (see attachment for a grouping of activities)

Does the start of the Data Fabric Discussion as an umbrella for discussing optimizations of the scientific data production and consumption machinery make sense to you? (see attached flyer)

Which technology trends do you see and how should they influence RDA activities?

What kind of infrastructure components would you see as so essential that RDA should try harmonization as early as possible to prevent fragmentation?

What kind of training and support actions would you like RDA Europe do to train more young data professionals and/or to foster the work in your discipline?

Would you like to participation in adoption projects which are funded to take up results in your environment?

17:30
