EXPLICATION OF DISEASES

Cholera [diarrheal illness]

Cholera is an infectious disease that causes severe watery diarrhea, which can lead to dehydration and even death if untreated. It is caused by eating food or drinking water contaminated with a bacterium called *Vibrio cholerae*.

A. Symptoms and signs

Diarrhea and vomiting; rapid heart rate; loss of skin elasticity (the ability to return to original position quickly if pinched); dry mucous membranes, including the inside of the mouth, throat, nose, and eyelids; low blood pressure; thirst; muscle cramps.

If not treated, dehydration can lead to shock and death in a matter of hours.

B. Prevention

2. Wash your hands often with soap and safe water
