# **EPC workpackages review for Linac4 connection**

## List of the work under EPC responsibility which is specific for Linac4 connection (current delivery date):

- Booster Injection Septa converters development & procurement (**Dec 2018**).
- Booster Injection Stripping Foil Chicane converters development & procurement (**Dec 2018**).
- Booster Injection Qstrip converters procurement for chicane compensation (**Dec 2018**).
- Booster Injection Control Electronics (**Dec 2016**).
- Booster Injection Septa and Chicane Current Measurement (**Dec 2016**).
- Booster Injection BI.BVT Powering (**Dec 2018**).
- Booster Injection Corrector Powering (**Dec 2018**).

## Could we modify the deadline to end-2016?

- No clear answer at a first glance.
- Some workunits still not technically defined.
- Not compatible with standard CERN purchasing procedures.
- An internal review will address this question on the 6th of march (<https://indico.cern.ch/event/372224/>).
