Welcome, Introduction and Goals

Monday 8 June 2015 09:00 (15 minutes)

<p>The goals of this workshop are:</p>

 Establish the motivation for long-term data preservation in HEP in terms of succinct Use Cases <ul> Are there a common set of Use Cases, such as those that werenbsp;recently agreed for the 4 main LHC experiments but in a more global scope?   Review the existing areas of "Common Projects" Can these be extended (similarly) from their current scope - often LHC - to become more global?   Perform a site-experiment round-table to capture the current situation HEP-wide <ul> A summary paper / presentation will be made to PV 2015nbsp;(accepted as Oral presentation) (We may also wish to submit a paper / talk to iPRES 2016, October 2016 in Bern)

Session Classification: Use Case Review
