

Abridged CV

=====

Josep F. Oliver works at the Instituto de Física Corpuscular, IFIC (CSIC-UV). In 2004 he obtained a Ph.D. degree in Physics at the University of Valencia. From 2004 to 2006 he worked at the University Libre of Bruxelles (ULB). In 2006 he went to IFIC as a postdoctoral researcher. Currently he is with the Medical Physics group IRIS, where he is in charge of the image reconstruction research lines. He is also in charge of the image reconstruction subject in the Master of Advanced Physics. His research interests include reconstruction algorithms, hadrontherapy monitoring, physics models of the image formation processes in PET and Compton cameras as well as applications of high energy physics techniques to medical image reconstruction.
