Monitoring with InfluxDB and Grafana

Friday 16 October 2015 12:10 (20 minutes)

At RAL we have been considering InfluxDB and Grafana as a possible replacement for Ganglia, in particular for application-specific metrics. Here we present our experiences with setting up monitoring for services such as Ceph, FTS3 and HTCCondor, and discuss the advantages and disadvantages of InfluxDB and Grafana over Ganglia.

Length of presentation (max. 20 minutes)
