Gitlab and its CI - an intelligent solution for hosting Git repos

Friday, October 16, 2015 11:30 AM (20 minutes)

Gitlab - a MIT licensed open source tool, that cooperates a set of rich features managing Git repositories, code reviews, issue tracking, activity feeds and wikis. The most powerful feature - CI for continuous integration makes the code developing much more efficient and cost saving, it's also a great tool to enhance the communication and collaboration. In NSLS-II, we have a great number of developers, currently hosting more than 300+ repos in mercurial, in a direction moving towards new git repo hosting solutions such as Gitlab, this presentation will discuss the details of Gitlab and the architecture view of Gitlab in NSLS-II.

Length of presentation (max. 20 minutes)

20 mins
