ATLAS Great Lakes Tier-2 (AGLT2) Update

Monday 12 October 2015 09:35 (20 minutes)

We will present an update on our site since the Fall 2014 report and cover our work with various storage technologies, ATLAS Muon Calibration and our use of the ELK stack for central sysloging. We will also report on our recent hardware purchases for 2015 as well as the status of our new networking configuration and 100G connection to the WAN. I conclude with a summary of what has worked and what problems we encountered and indicate directions for future work.

Length of presentation (max. 20 minutes)

15+5
