## Interplay between the Collins and the di-hadron asymmetries

*Thursday, 3 September 2015 17:05 (15 minutes)*

The recent COMPASS results on the interplay between the Collins asymmetry and the di-hadron asymmetry are briefly presented. Their possible implications on the transversity extraction are discussed. The feasibility of the same studies in  $e+e-$  annihilation should also be addressed during the round tables.

### Session

5: TMD fragmentation functions in  $e+e-$  and SIDIS processes

**Primary author:** BRADAMANTE, Franco (Universita e INFN, Trieste (IT))

**Presenter:** BRADAMANTE, Franco (Universita e INFN, Trieste (IT))

**Session Classification:** TMD fragmentation functions in  $e+e-$  and SIDIS processes
