

# Welcome to the MEDICIS PROMED Marie Curie Training H2020 kick-off meeting

- CERN is proud to host this important kick off meeting for MEDICIS
- In January 2014, CERN set up the medical applications office
- One of the 7 initiatives is radio-isotope production and MEDICIS is a crucial element
- ISOLDE facility has an enormous amount of experience in producing radio isotopes for Nuclear Research. Now will be producing for Nuclear Medicine
- MEDICIS will benefit from this 50 years experience
- Important decision: to finish the MEDICIS building during the LHC Long Shutdown (LS1)

# Two Important Constraints

**SAFETY: radiation and contamination risk**

**ISOLDE: MEDICIS must not disrupt ISOLDE operation**

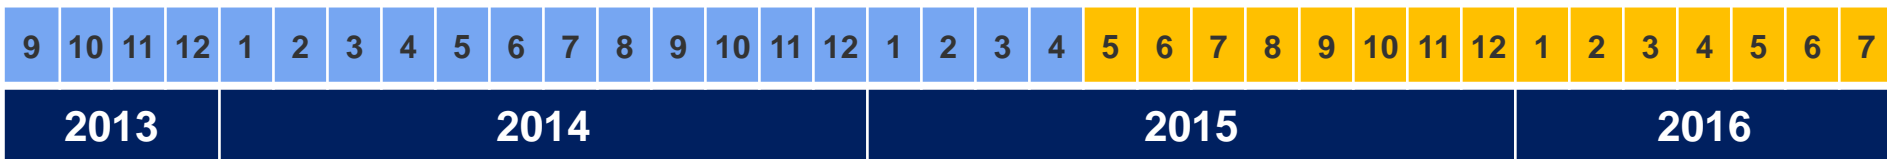

# MEDICIS Building (on time!)

# Time line (Future) :

- Finalize Handling Robot & monorail
- Finalize Shielded doors
- Off-line separator
- Tests and final commissioning

*Next steps in this time period*

# From Thierry's presentation

## Goal of the meeting today

Give a vision of the full program

Put in place management structure, contact names, provide tools, agrees on budget

Enforce responsibilities (training, communication, ethics)

Launch recruitment
