

Session Program

15-19 Feb 2016

VCI2016 - The 14th Vienna Conference on Instrumentation

Miscellaneous 2

Vienna University of Technology
Gusshausstraße 27-29, 1040 Wien

Tuesday 16 February

16:30

Miscellaneous 2

Session | **Location:** Vienna University of Technology, Gusshausstraße 27-29, 1040 Wien | **Convener:** Marcella Diemoz

16:30–16:50

A detector for in-beam measurement of the ground state hyperfine splitting of antihydrogen

Speaker

Clemens Sauerzopf

16:55–17:15

The MoEDAL detector - a totally different LHC detector

Speaker

James Pinfold

17:20–17:40

Imaging the LHC beams with silicon and scintillating fibre vertex detectors

Speaker

Mariana Rihl

17:45–18:05

Stability monitoring of historical buildings with a cosmic ray tracking system

Speaker

Davide Pagano

18:10
