Hands on Excercise I

Wednesday 3 June 2015 09:30 (1h 30m)

Cyber attacks have become ubiquitous. To face current threats it is important to understand them. To illustrate how and with which tools many of the current attacks are performed we have created an isolated environment in which the participants will change roles, and act as attackers against standard services. Scoring will be done based on the number of successfully compromised services. No prior knowledge on offensive security is required, this game is on the entry level ... Happy Hunting.
