

# ICTR-PHE 2016

## Thursday, 18 February 2016

### Proffered papers - Radiobiology - 4 (10:30 - 12:00)

-Conveners: Ulli Köster; Mechthild Krause

time	[id] title	presenter
10:30	[97] The effect of fractionated administration of thalidomide at $\gamma$ -ray irradiation on tumor response and lung metastasis	MASUNAGA, Shin-ichiro
10:45	[98] Predictive Biomarkers for Improving Radiation Therapy	PRASANNA, Pataje
11:00	[99] Targeted Radionuclide Therapy with $^{161}\text{Tb}$ : Investigation of Anti-Tumor Effects and Undesired Side Effects	MÜLLER, Cristina
11:15	[100] The relationship between absorbed dose and DNA Damage in Lymphocytes after radionuclide therapy	EBERLEIN, Uta
11:30	[101] Modeling the effect of symmetrical division of cancer stem cells on tumour response to radiation	MARCU, Loredana
11:45	[102] A dose response analysis of the patients treated with Boron Neutron Capture Therapy (BNCT) in Finland in 1999 to 2011	KOIVUNORO, Hanna
