

Background

- pre-GDB Accounting Review in April
 - Included discussion of storage accounting
 - <https://indico.cern.ch/event/394828/>
- This was discussed in the GDB the next day
 - Decision was taken to capture reporting requirements on storage systems for
 - WLCG accounting
 - Experiments for operations and capacity management.

Resource reporting proposal

- The WLCG Accounting Task Force kicked off in June
 - <https://indico.cern.ch/event/539179/>
 - “Storage Space accounting should be also addressed, in particular understanding the requirements of the experiments and sites”
- At the WLCG Accounting Task Force Meeting in August a draft proposal was presented
 - <https://indico.cern.ch/event/561433/>
- This was considerably amended, circulated to the experiments, further modified, and is now attached to the agenda for feedback from storage providers
- NB – the trigger was storage accounting, but the objective is to summarise requirements on storage resource reporting for all relevant WLCG activities.
