

EN/CV WP Status

Cooling

- Dumps requirements received from D. Grenier.
- C16 requirements missing (separate circuit connected to the chilled water system).
- Enough data to start working on the new baseline.

Ventilation

- Power converters requirements in BRF2/BAT reduced from 100kW to 35kW.
- Asked for a better estimation for BHP (200 kW present estimation).
- Clarify with RP if also for ventilation it is required to split the systems Tunnel/Surface.
- No changes foreseen for Tunnel ventilation needs.
- On the field measurements needed to evaluate the actual power dissipated on air in the Bat 361 rooms.
