

Wrap-up
Asia Tier Center Forum
KISTI 22-24 September 2015

Goal of the forum

- The aim of this forum is to discuss on the possible solutions for the improvement of connectivity among Asian Tier sites and their status of domestic network environment and
- To monitor periodically the state-of-art of the established network environment through this forum and to organize a body with a broader agenda embracing not only the network but also common issues that could be arisen among Asian Tier sites.
- The target of this forum is mostly Asian Tier sites, however, the forum is open to every interested parties, in particular, distributed computing coordinations of LHC experiments and network experts on OPN/ONE.

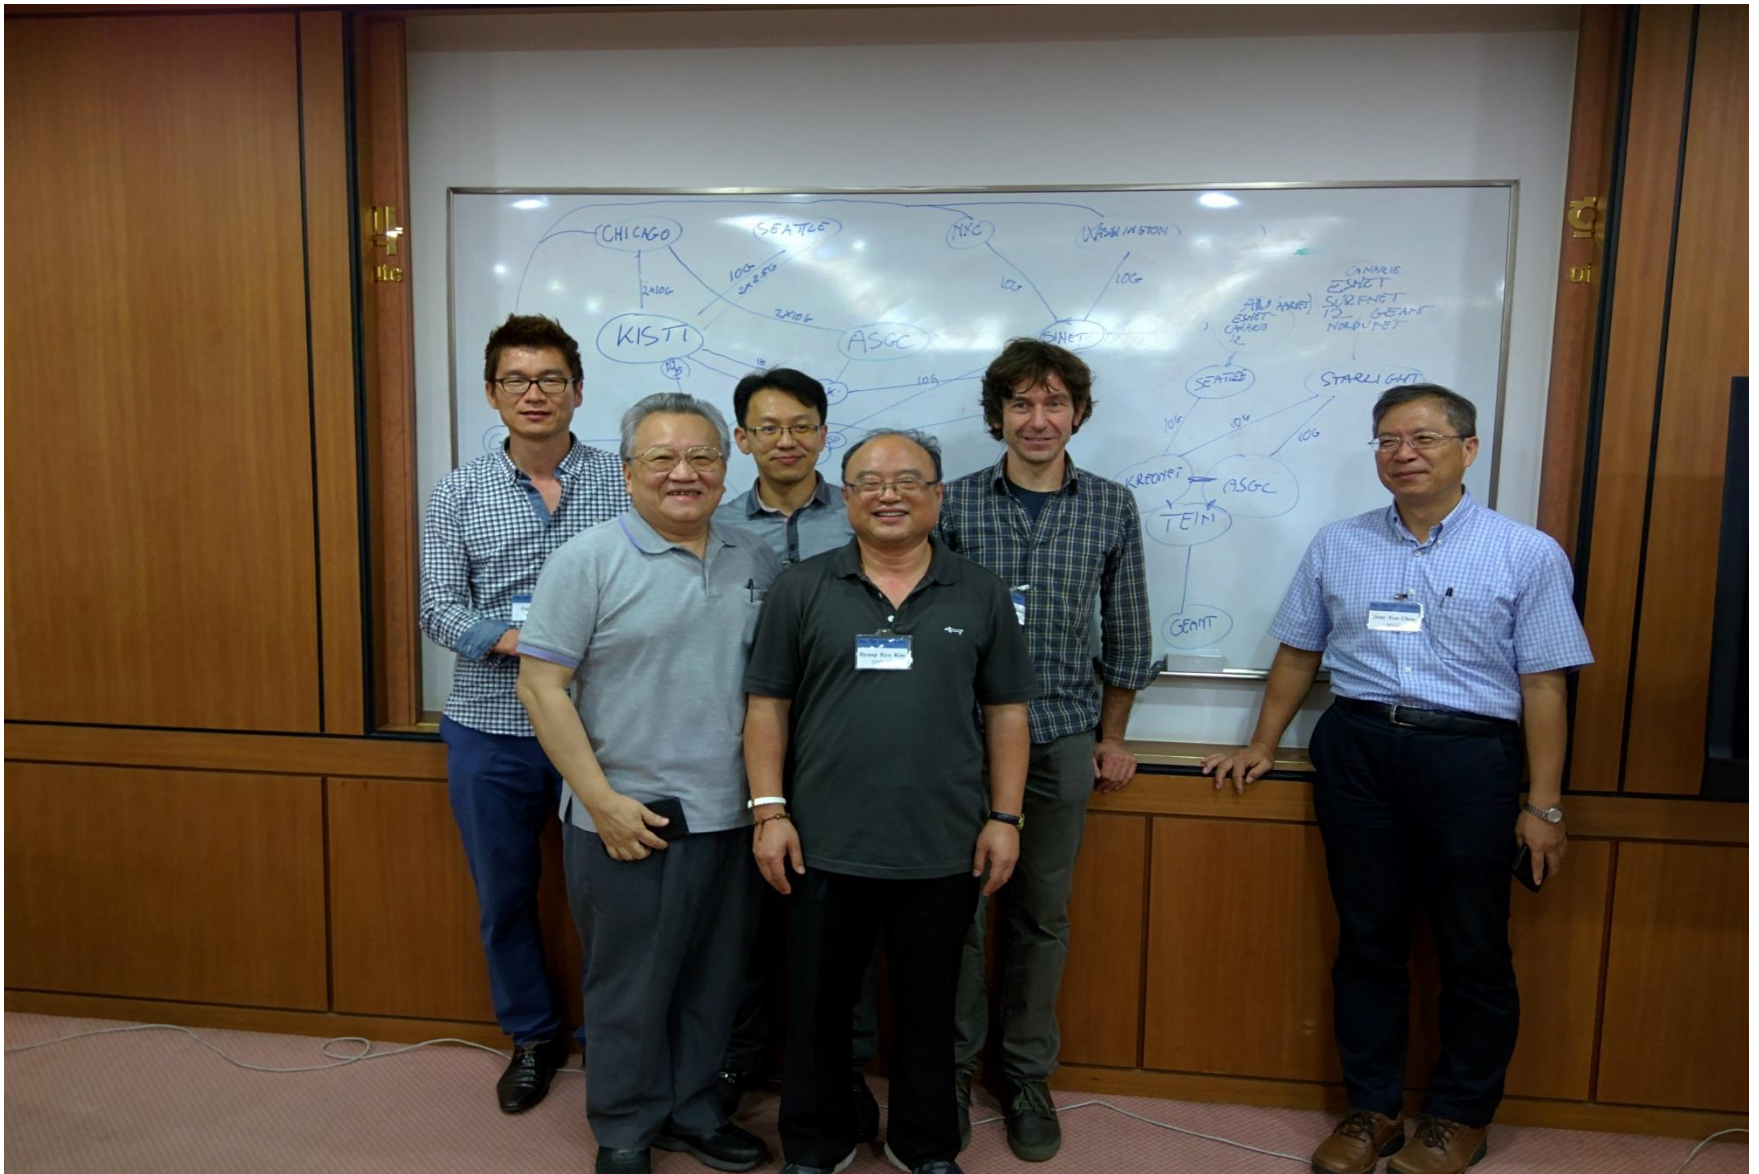

ALICE Asian sites

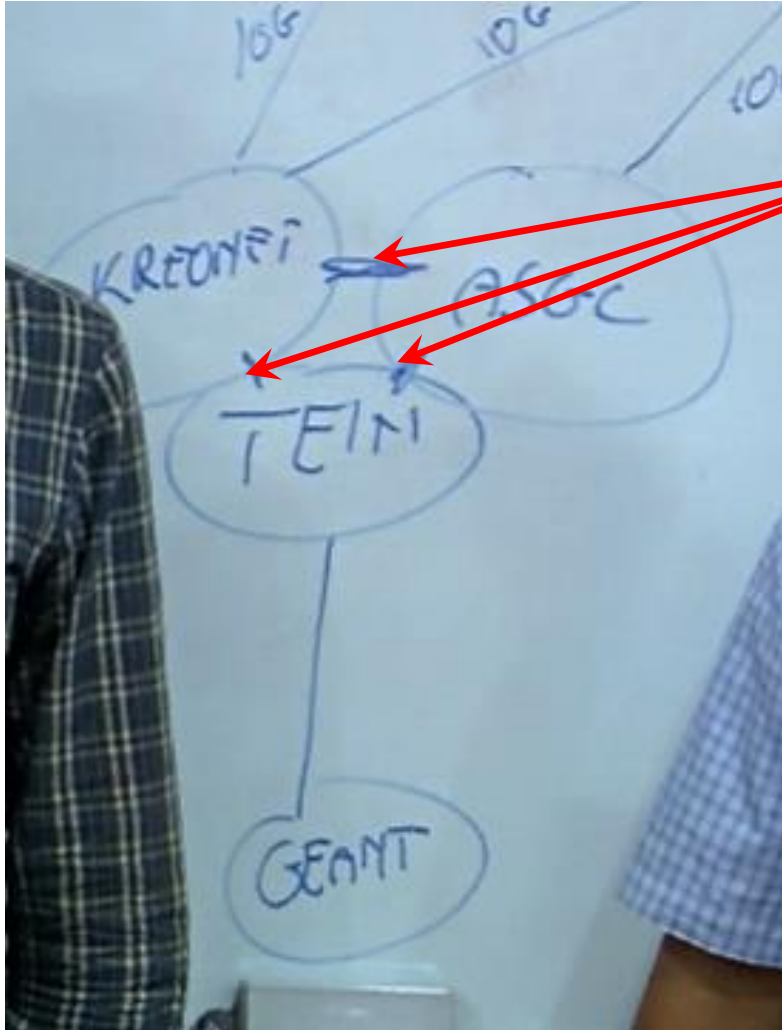

Network

- Rich network environment and possibilities to connect
- ASGC
- Kreonet/Gloriad
- TEIN
- APAN
- ...
- + numerous national networks

The breakthrough

Zoom

In the context fo LHCONE
VRF rules and inter-VRF
connections

How-to

- Edoard Martelli (CERN), Michael O'Connor (ESnet), William Johnston (ESnet)
 - A must-read for all site experts

Hope that

- The Forum will continue to thrive
- The technical aspects of the breakthrough will be ironed out soon
 - The LHCONE forum is the perfect place for that

Thank you

- To the computing centre experts who attended and presented the status of the sites
- To the network experts, who shone a light on the situation
- **To our gracious KISTI hosts for the flawless forum organization and hospitality**
- **Attendance – 34 people**
