

A Few Words of Introduction

Graeme Stewart

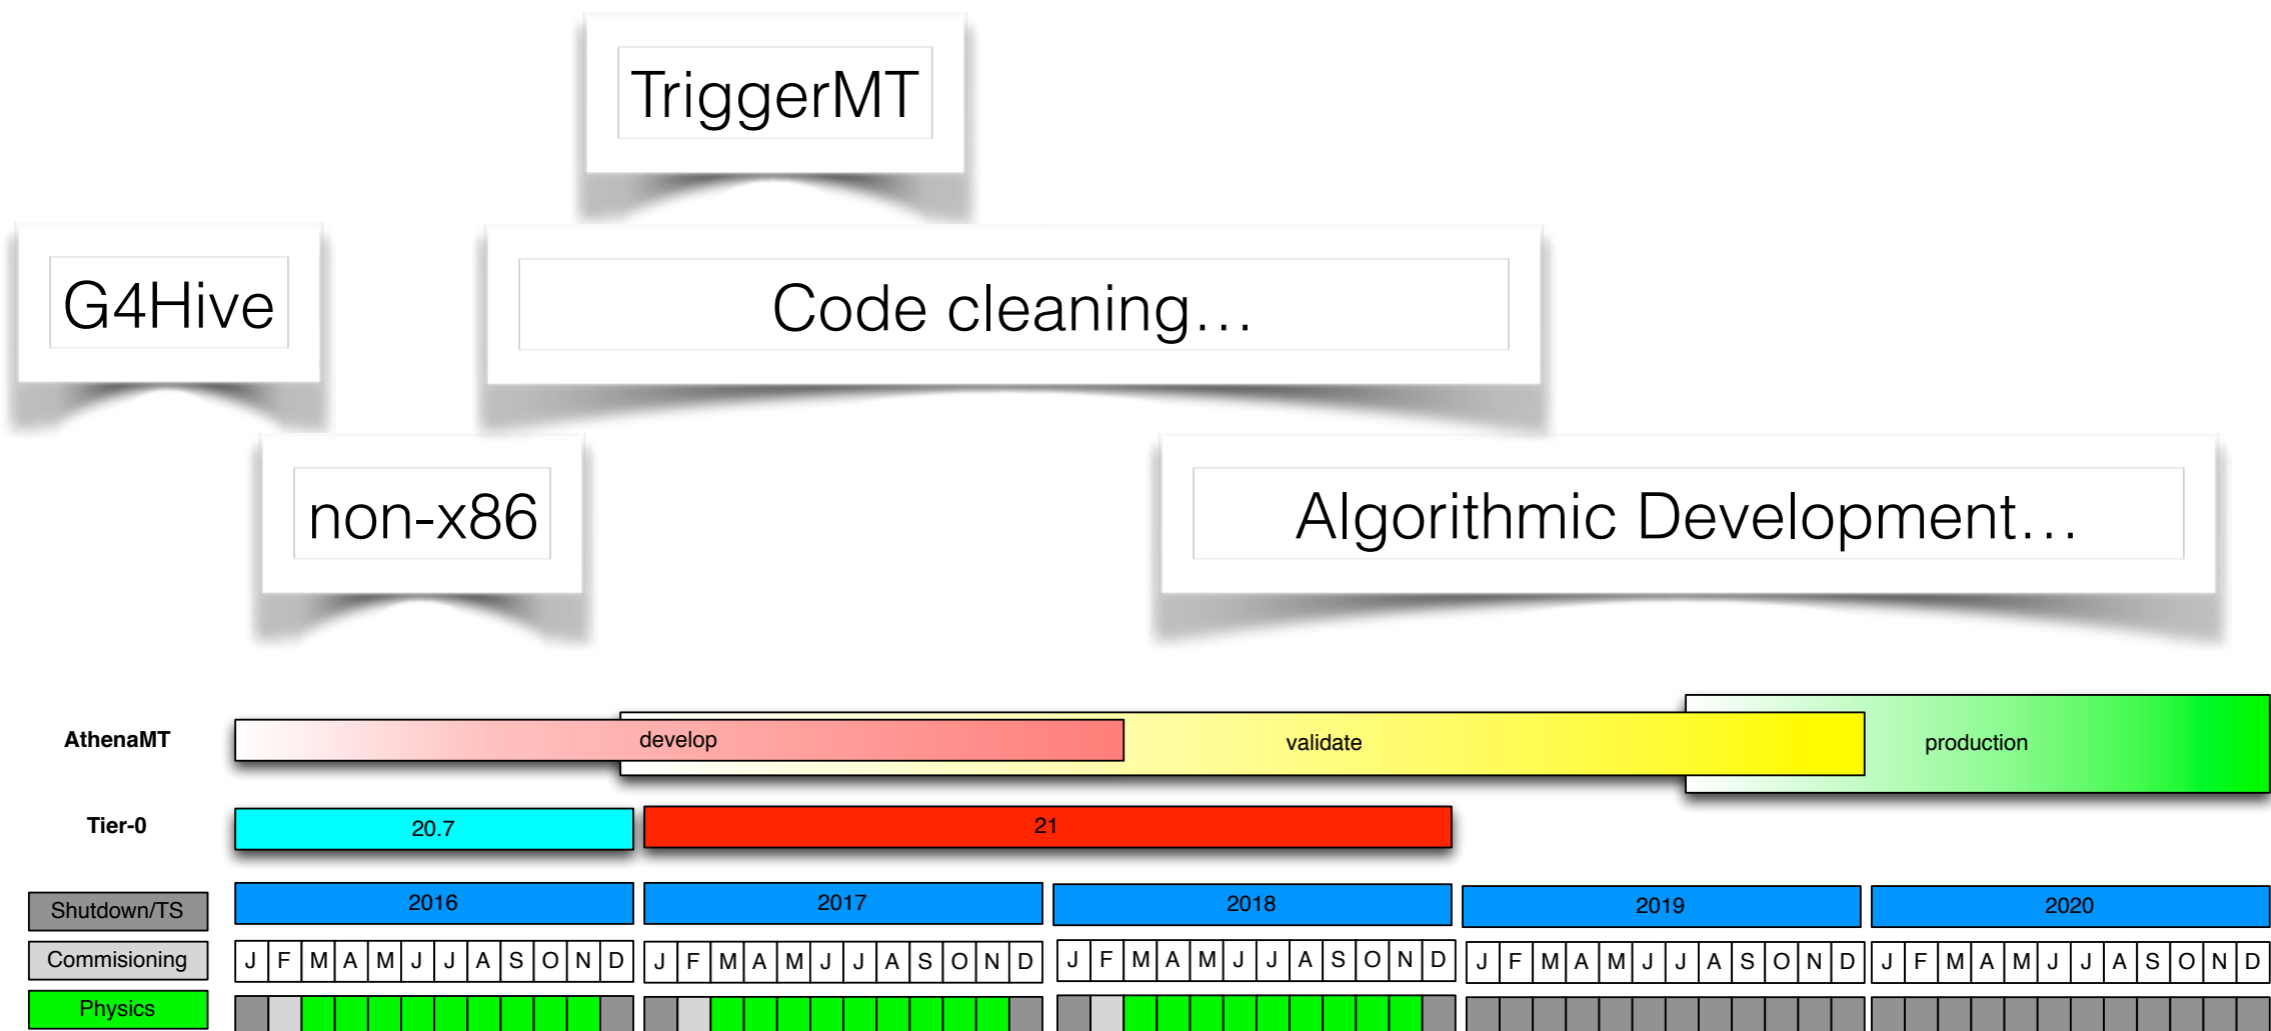

Timelines

- Run 2 well underway now
- Want to be ready with major software upgrades for the start of Run3 (2021)
 - Particularly the new framework, AthenaMT
- LS2 will mainly be taken up with commissioning and debugging
- Thus we need to undertake a lot of work during Run2

Tentative Beyond 21 Schedule

- Will certainly want to have functional MT releases next year
- Early versions allow more people to work on their code

Objectives

- What shape should the software have by Run3?
 - Core framework development
 - Reconstruction
 - Simulation
 - Analysis
 - Software infrastructure
- We we progress through Run2, Run4 also gets closer
 - We have to have an eye on the longer term future as well

So Welcome...

- Thanks to LBL crew for organising the overall event
- Session convenors for their planning
- Thanks everyone for joining this week
- Let's get started!
