

# A Few Practicalities + Session Random Thoughts...

Graeme Stewart

# Photo Opportunities

- We'll take a photo after the coffee break
- On the steps outside this building

# Transport

- We're attempting a self-organising transport sharing scheme
- Google Sheet
  - <https://docs.google.com/spreadsheets/d/1pCCERb0y8RRuIS2h5CGTQ4nixWQaFZKkH0A3e7rBG0U/edit?usp=sharing>
- Please sign up if you have space to take people
- To take advantage of an offer just fill your name in as "me too"

# Afternoon Session

- We could not put all issues in, and we didn't want too many talks anyway
  - So we have picked a non-comprehensive list of important themes
- But a few other things to mention that can come up in the discussion
  - CMake (already partly covered this morning)
  - Project management — are there useful tools that don't consume more effort than they save?
  - Release building strategy — how should we be organising ATLAS software to support a larger number of use cases / platforms / compilers? All this without blowing up the support load
