

# Cloud Traceability Working Group Face to Face

CERN  
9<sup>th</sup> June 2015

# Areas of investigation from last F2F

- Logging from inside VMs
  - RAL – connecting VMs to central loggers
  - Andrew MacNab – investigating methods for passing logger info – machine/job info vs cloudinit
- Externally observable behaviour - Hypervisor & netflow logging
  - Raul Lopes & David Crooks
- Better tools for managing large volumes of logs
  - RAL & others
- Deferred Deletion or Quarantining VMs
  - RAL investigating for OpenNebula & CEPH
- VO Logging
  - Service challenges – Sven Gabriel
- Policy evolution
  - Dave Kelsey – following other work.
