

A nighttime photograph of the Seattle waterfront. On the left, the Great Wheel is illuminated with a bright white light at its center and a blue glow around its rim. The water in the foreground reflects the lights from the wheel and the distant city. In the background, the city skyline is visible, including the Smith Tower and various industrial structures along the waterfront, all lit up with warm yellow and orange lights. The sky is dark.

ACAT 2017

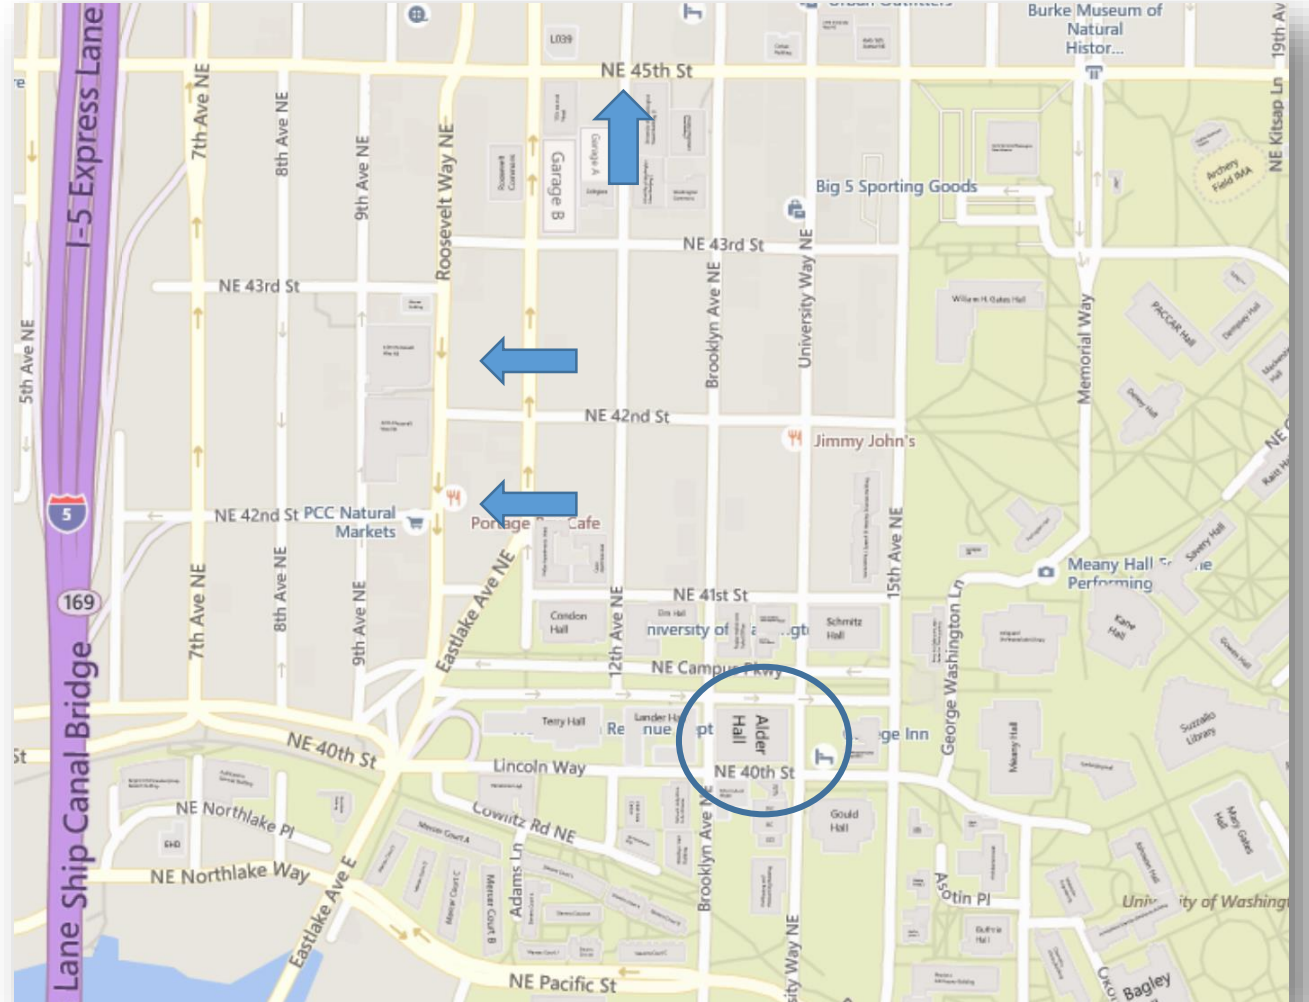

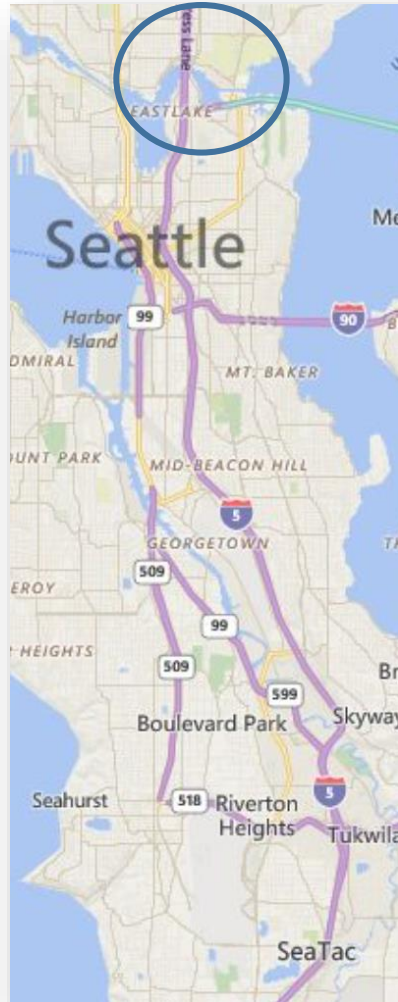

Seattle

Dates: End of August or start of September

The Location

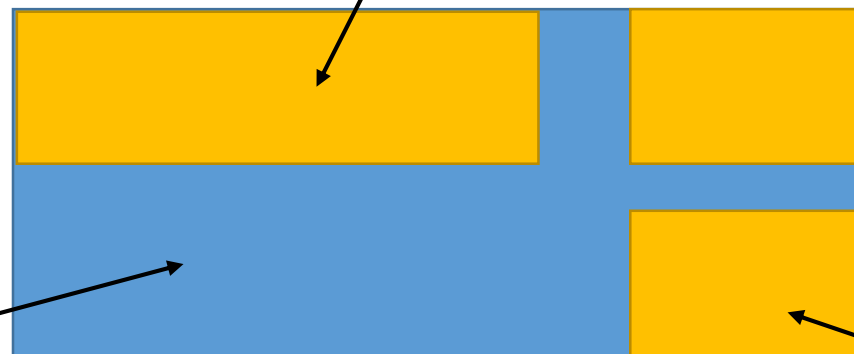

UW has 35,000 undergraduate students

Physics department is largest undergraduate program in the country

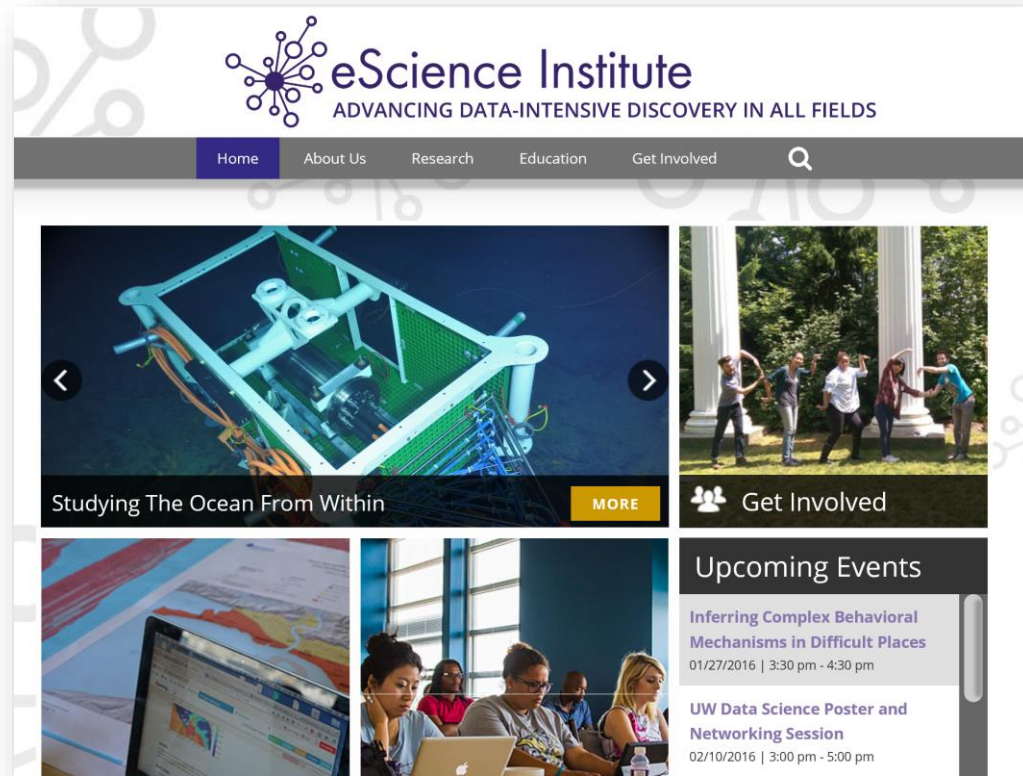

UW grant funding is close to \$1B – largest public university in the USA
