

CO related work packages

-  91890 CO infrastructure for OP
-  91895 CO infrastructure
-  113279 CO infrastructure for ABT
-  91888 CO infrastructure for EPC
-  91889 CO infrastructure for beam intercepting devices
-  91892 CO infrastructure for BI
-  xxxxx CO infrastructure for TE-MPE

CO infrastructure for OP

Installation of OASIS signals during LS1

Installation of OASIS channels to connect LN4. Details of this channels have not been completely defined yet -> open question (but discussion ongoing)

CO infrastructure for ABT

Installation of 3 OASIS channels

CO infrastructure for EPC

-  Installation of 1 gateway in building 245
-  Installation of 1 gateway building 361/2-007 (BHP)
-  Installation of 2 gateways building 361/1-012 (BCER)
-  Installation of 24 OASIS channels

*Type of gateway still unknown

CO infrastructure for BI

Discussion about the work ongoing and to be coordinated with remaining ACCOR issues.

CO for beam intercepting devices

✓ No more work to be carried out for FEC installations for 'Head & Tail dumps' and 'H0/H- dump'

Clarification needed if EN-STI needs work to be carried out by CO for interlock for 'Head & Tail dumps' and 'H0/H- dump'

New objective PSB Collimator/Scraper: So far no information if there are demands to CO as the project itself it pretty new

CO infrastructure for TE

Installation of 2 FECs, timing and 8 OASIS channels for B-train

Delivery of 4 VME crates with MENA20 and 8 CTRP timing modules for beginning of 2016

Common reminder

-  All work packages for CO has been planned as place holder. This is due to the fact, that no or no detailed information has been available when planning was done.
-  Non of the works to be carried out are known to consume a lot of time or need access to restricted areas
-  If there there will be unexpected urgent work coming up, CO will be able to carry that out in less then 2 weeks.
