

Angels&Demons

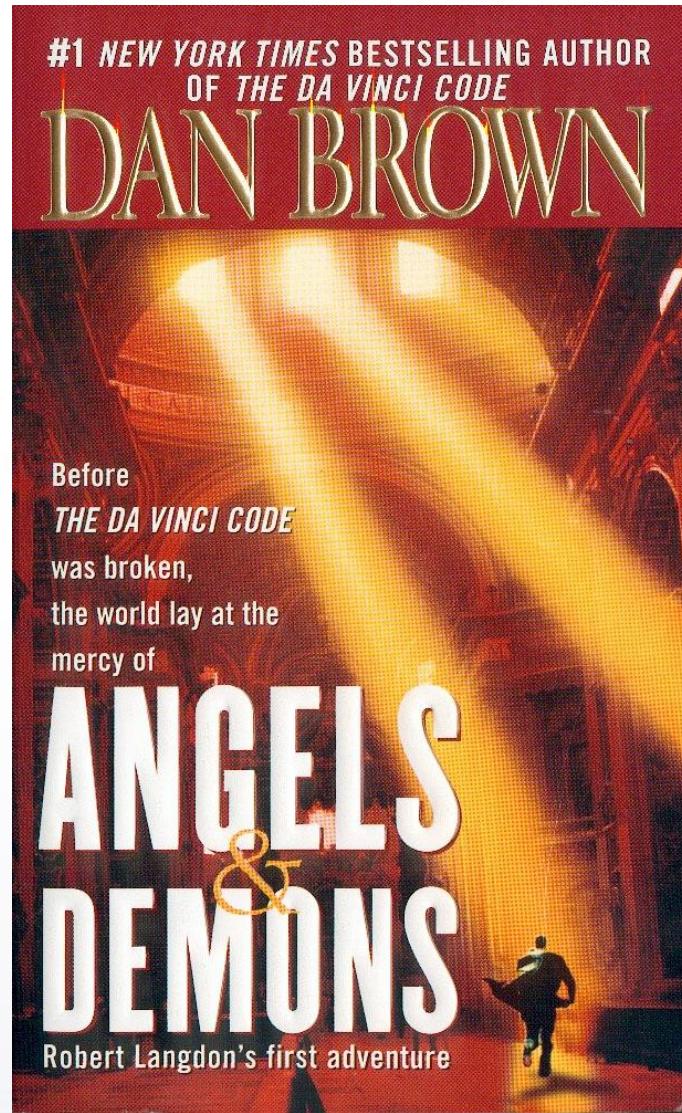

The Physics Behind the Movie

Rolf Landua

CERN

Angels & Demons - The Physics behind the Movie

Dan Brown's “Angels + Demons”

Wuminali

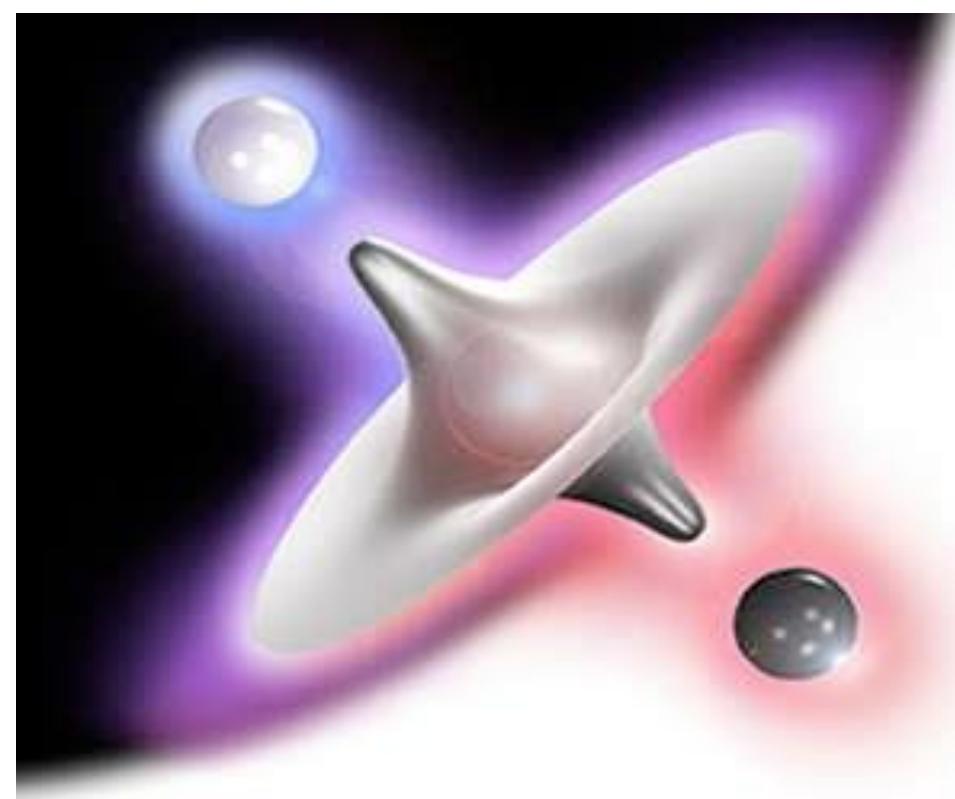

... steal 1 g of antimatter from a physicist
at the ‘LHC’ in a place called “CERN” ...

... to blow up the Vatican, an
old “enemy of science and
CERN”.

What's true ? What's false ? Antimatter seems mysterious ...

Angels & Demons - The Physics behind the Movie

Antimatter Questions

Many questions

What is antimatter ?

Antimatter in the LHC ?

The mystery of antimatter ?

How to study antimatter ?

Energy source? A bomb ? Anything useful ?

Angels & Demons - The Physics behind the Movie

Angels & Demons: The Director

In 2007, to prepare his movie, Ron Howard visited CERN to find out more about antimatter traps.

What did he say after his guided tour at CERN?

- A That's how much I understood from this nerd guiding me around ...
- B This much science will be in the "Angels and Demons" movie ...
- C That's the budget of my new movie "Angels and Demons"
- D This is what Dan Brown understands about antimatter

Who wants to be a millionaire ?

Angels & Demons - The Physics behind the Movie

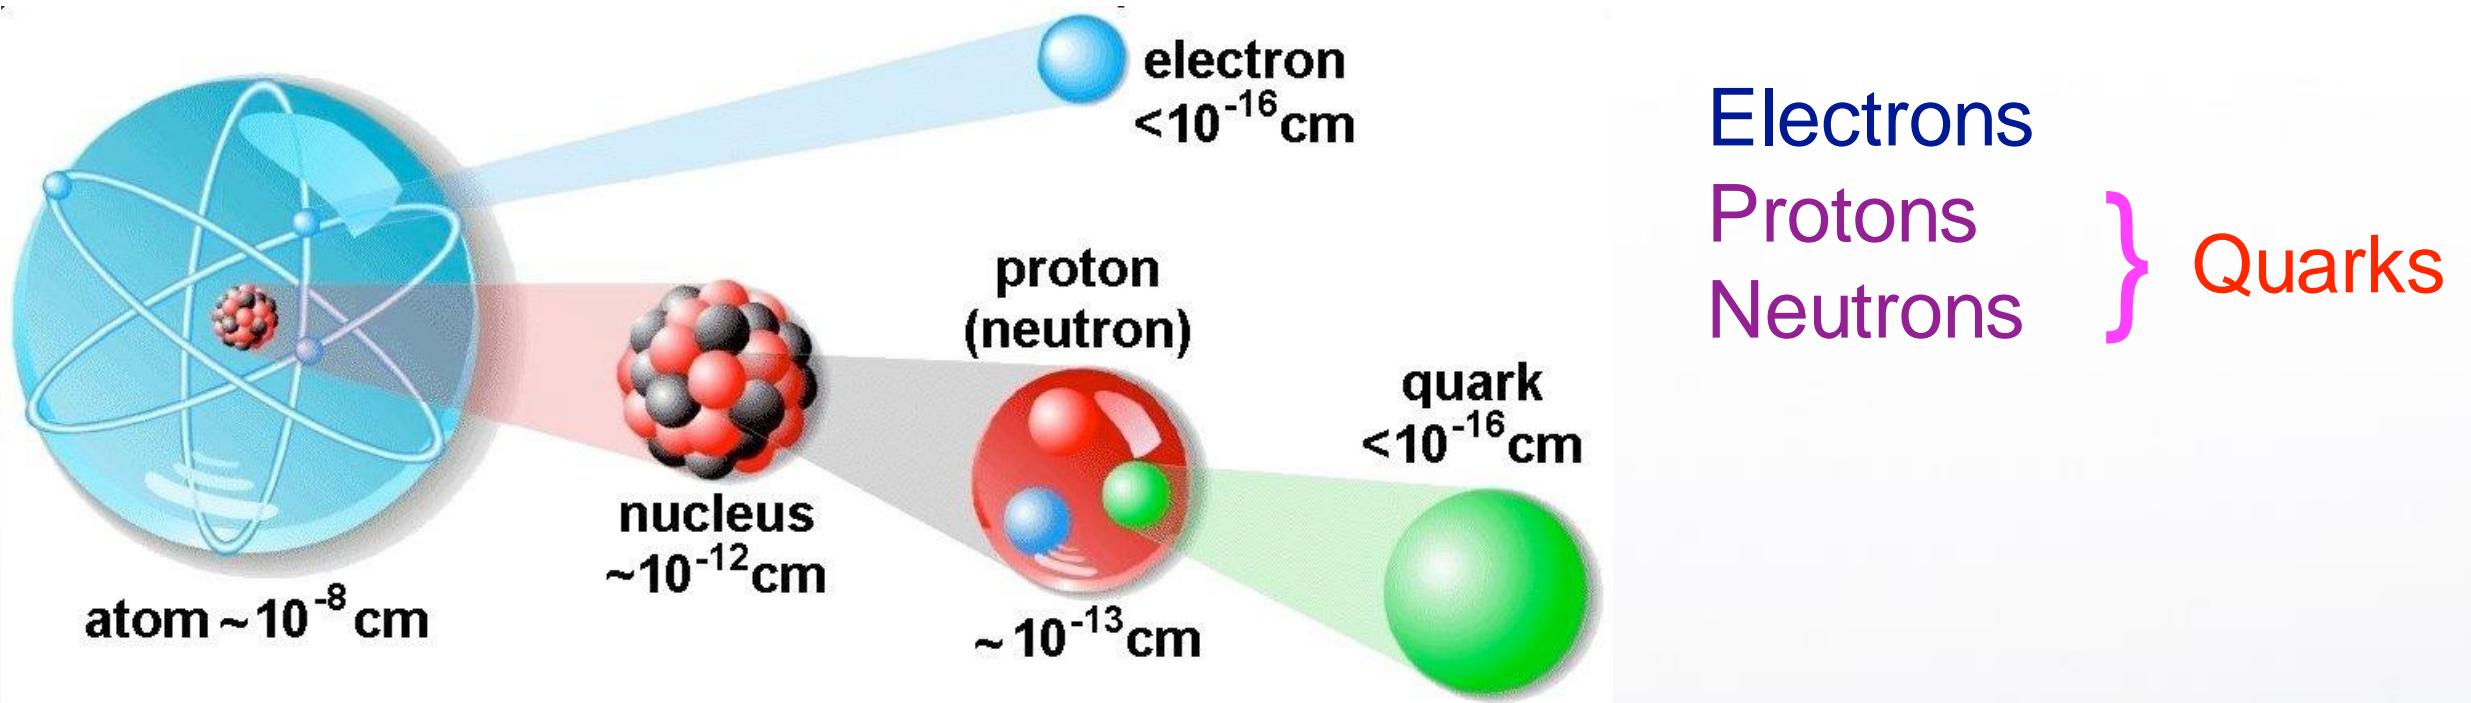

1 What is antimatter ?

Angels & Demons - The Physics behind the Movie

1 What is antimatter ?

Everything is made of matter
(We, animals, plants, rocks)

Hierarchy of matter

Matter is made of particles

The whole (visible) Universe is made of 3 building blocks

1

What is antimatter ?

Particles have specific **masses** and **charges**

Name	Electric Charge [e]	Mass [GeV*]
Electron	- 1	0.0005
Proton	+ 1	0.938
Neutron	0	0.941

*GeV = Giga-Electron Volt = 1,000,000,000 Electron-Volt = $1.8 \cdot 10^{-27}$ kg

1 What is antimatter ?

Anti-particles have the **same mass**, but **opposite charge**

Name	Electric Charge [e]	Mass	Electric Charge [e]	Name
Electron	- 1	0.0005	+ 1	Positron
Proton	+ 1	0.938	- 1	Antiproton
Neutron	0	0.941	0	Antineutron

Electron - Positron Annihilation NIKHEF - National Institute for Nuclear Physics and High Energy Physics

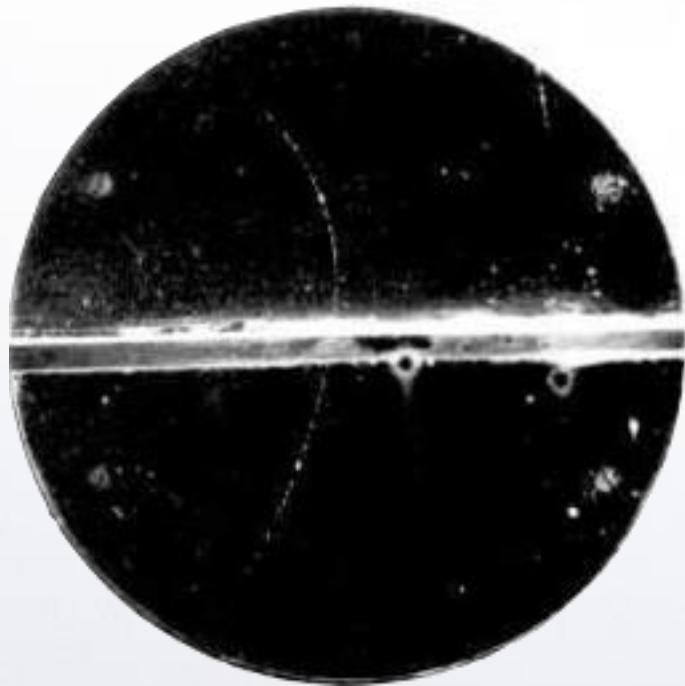

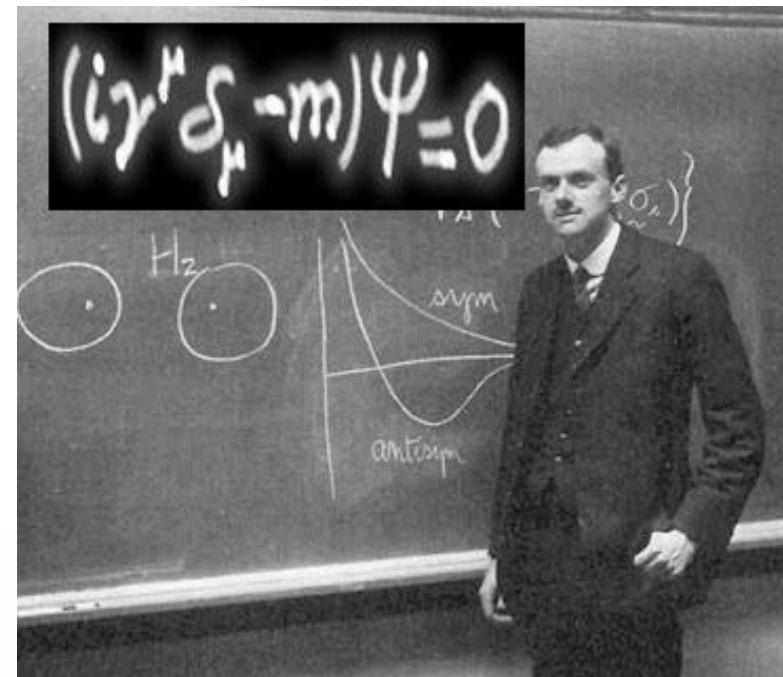

Particles

Anti-particles

Angels & Demons - The Physics behind the Movie

Predicted by
Paul Dirac (1928) ...

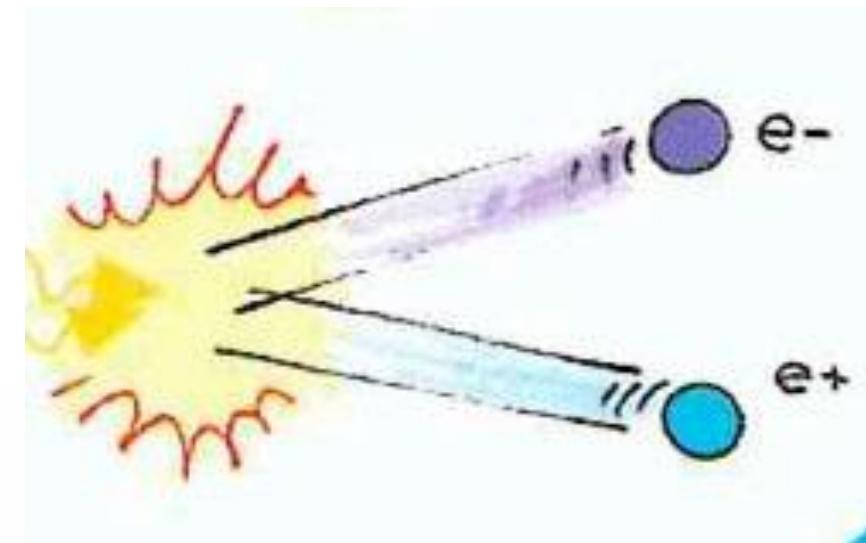

... first antiparticle (positron)
found by Carl Anderson (1932)

1 What is antimatter ?

Particles and anti-particles are always **created in pairs** ...

$$E=mc^2$$

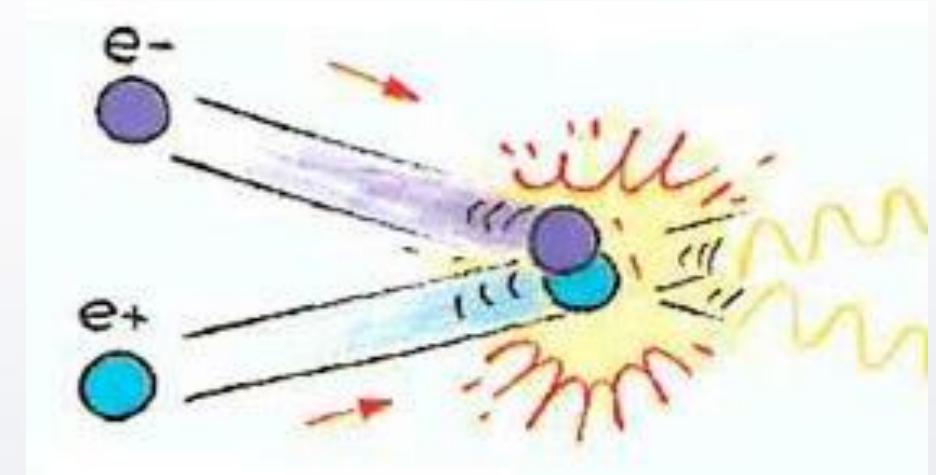

Energy to mass:

... and they can also **annihilate** each other

$$E=mc^2$$

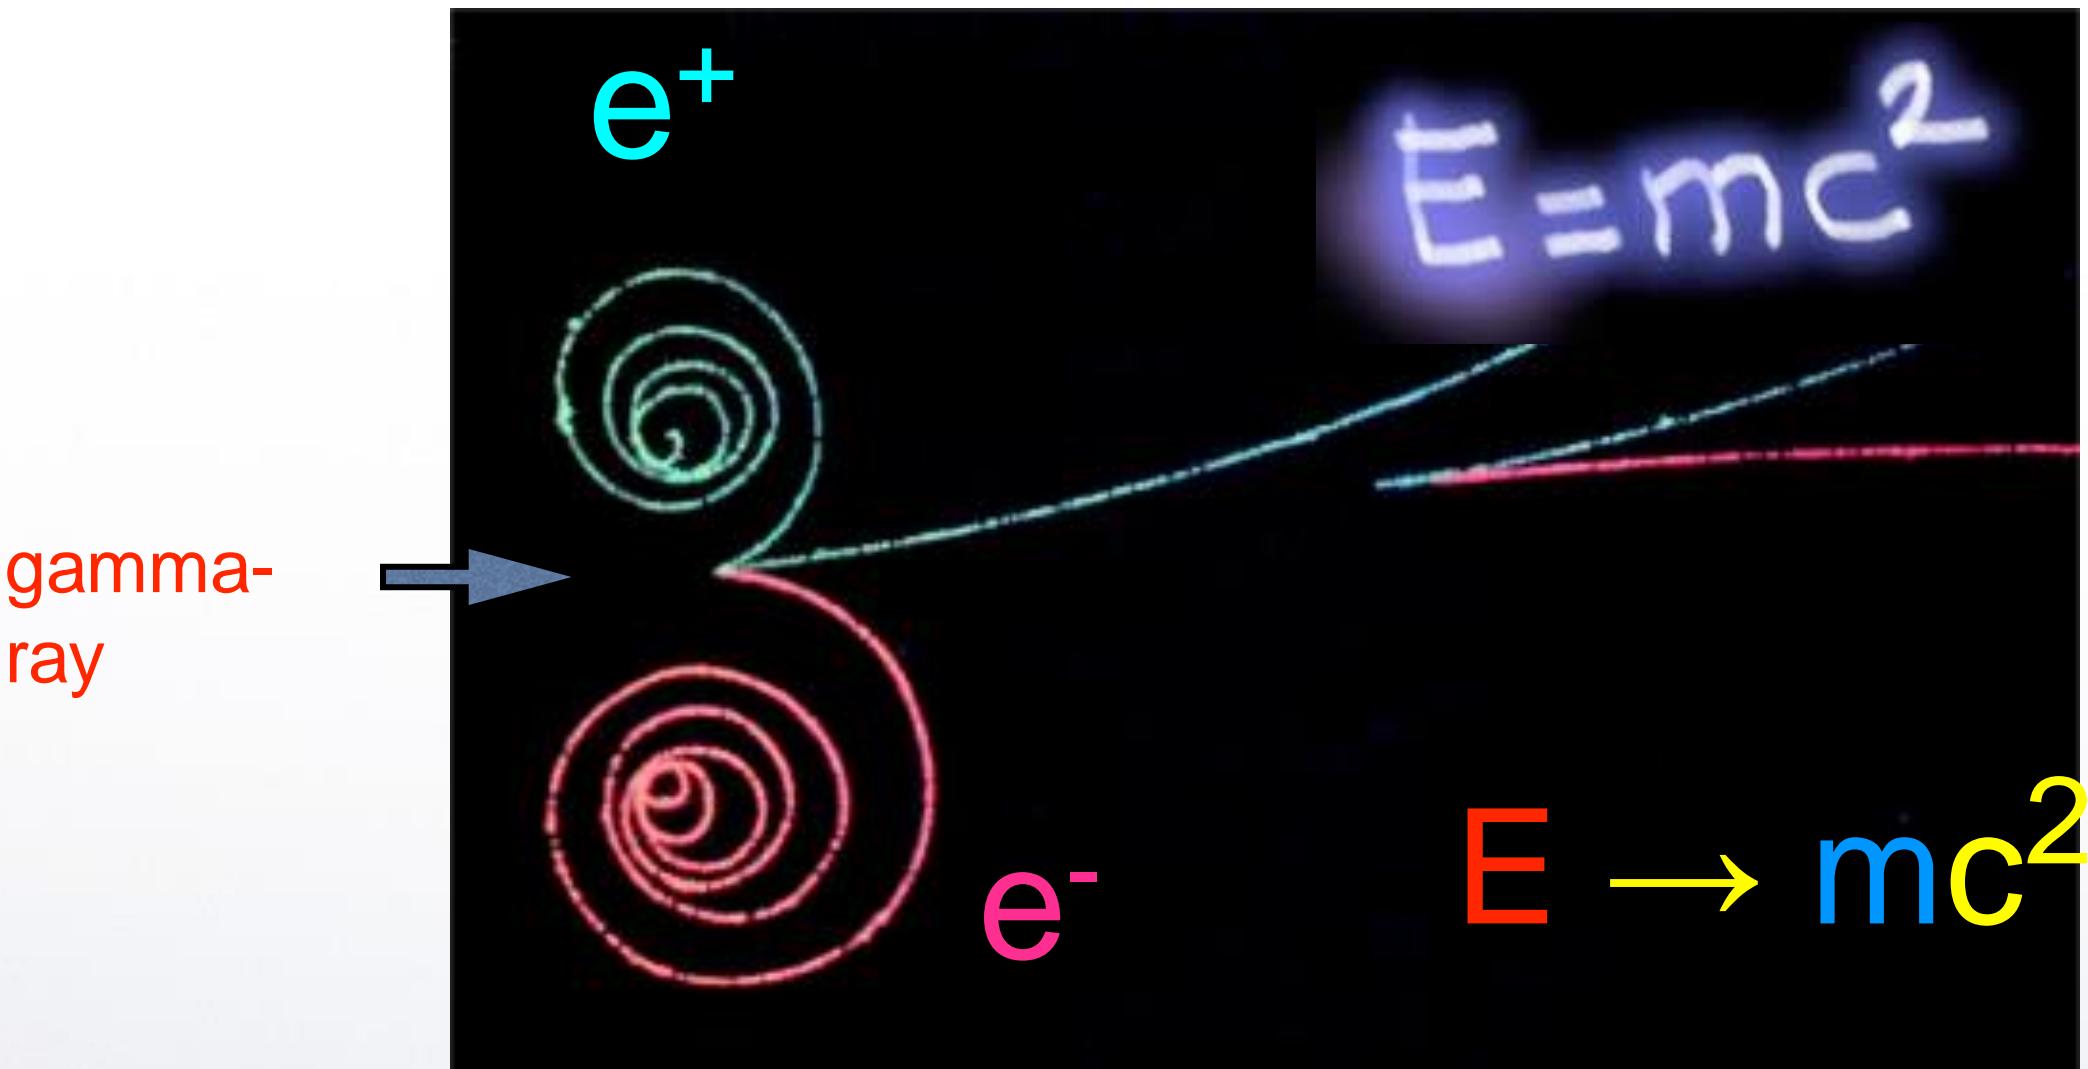

Mass to energy:

1 What is antimatter ?

When Energy is converted to mass

an equal amount of matter and antimatter particles are created

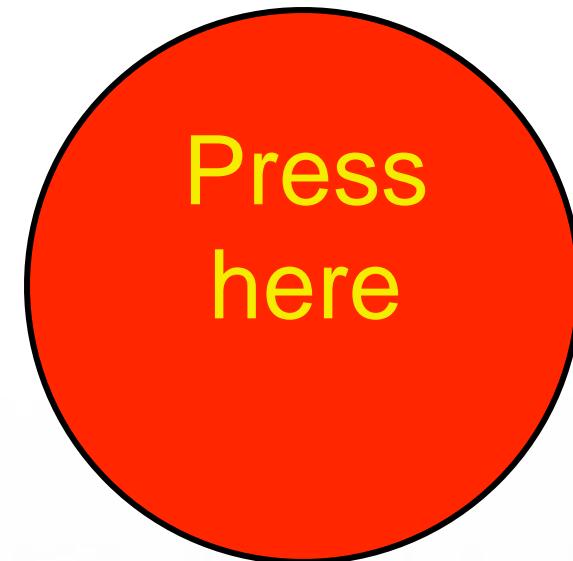

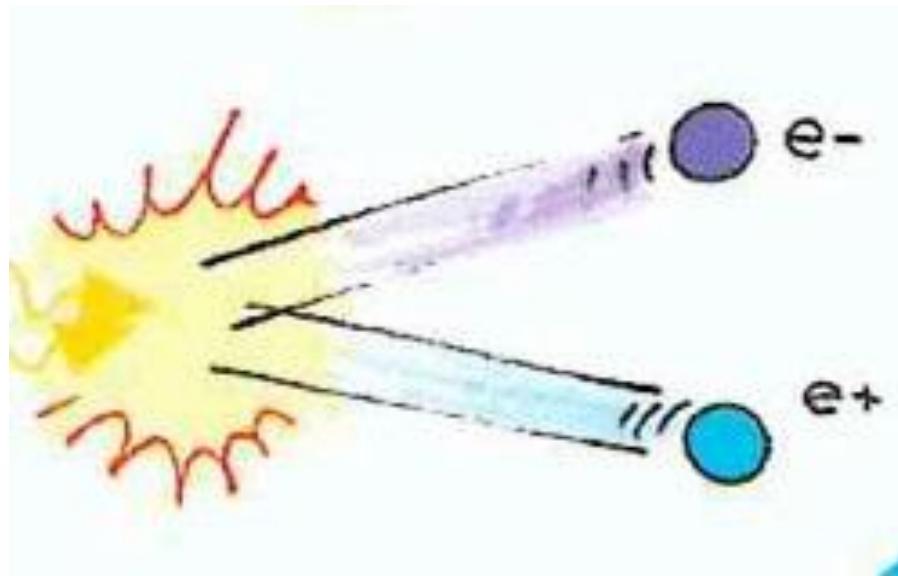

Key: high energy **density**

1 What is antimatter ?

**Metaphors for the relation
between
particles and anti-particles**

Angels & Demons - The Physics behind the Movie

Anti-particles are **as real** as particles

Matter becomes antimatter

A world made of antiparticles would look the same as our world.

1 What is antimatter ?

Careful with “antimatter E.T.” !

Angels & Demons - The Physics behind the Movie

2 Antimatter in the LHC ?

Angels & Demons - The Physics behind the Movie

2 Antimatter in the LHC ?

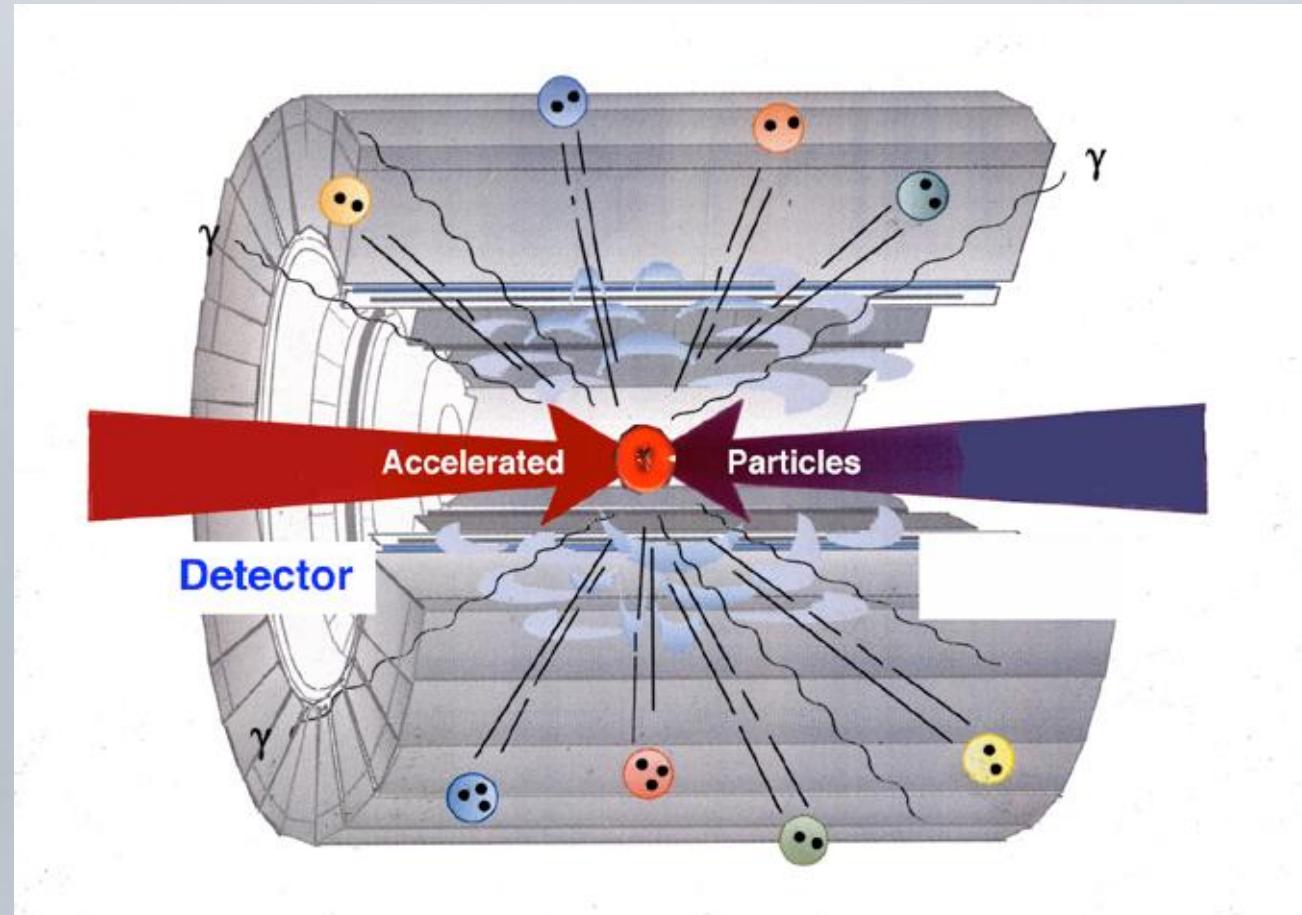

Angels & Demons - The Physics behind the Movie

2 Antimatter in the LHC ?

Angels & Demons - The Physics behind the Movie

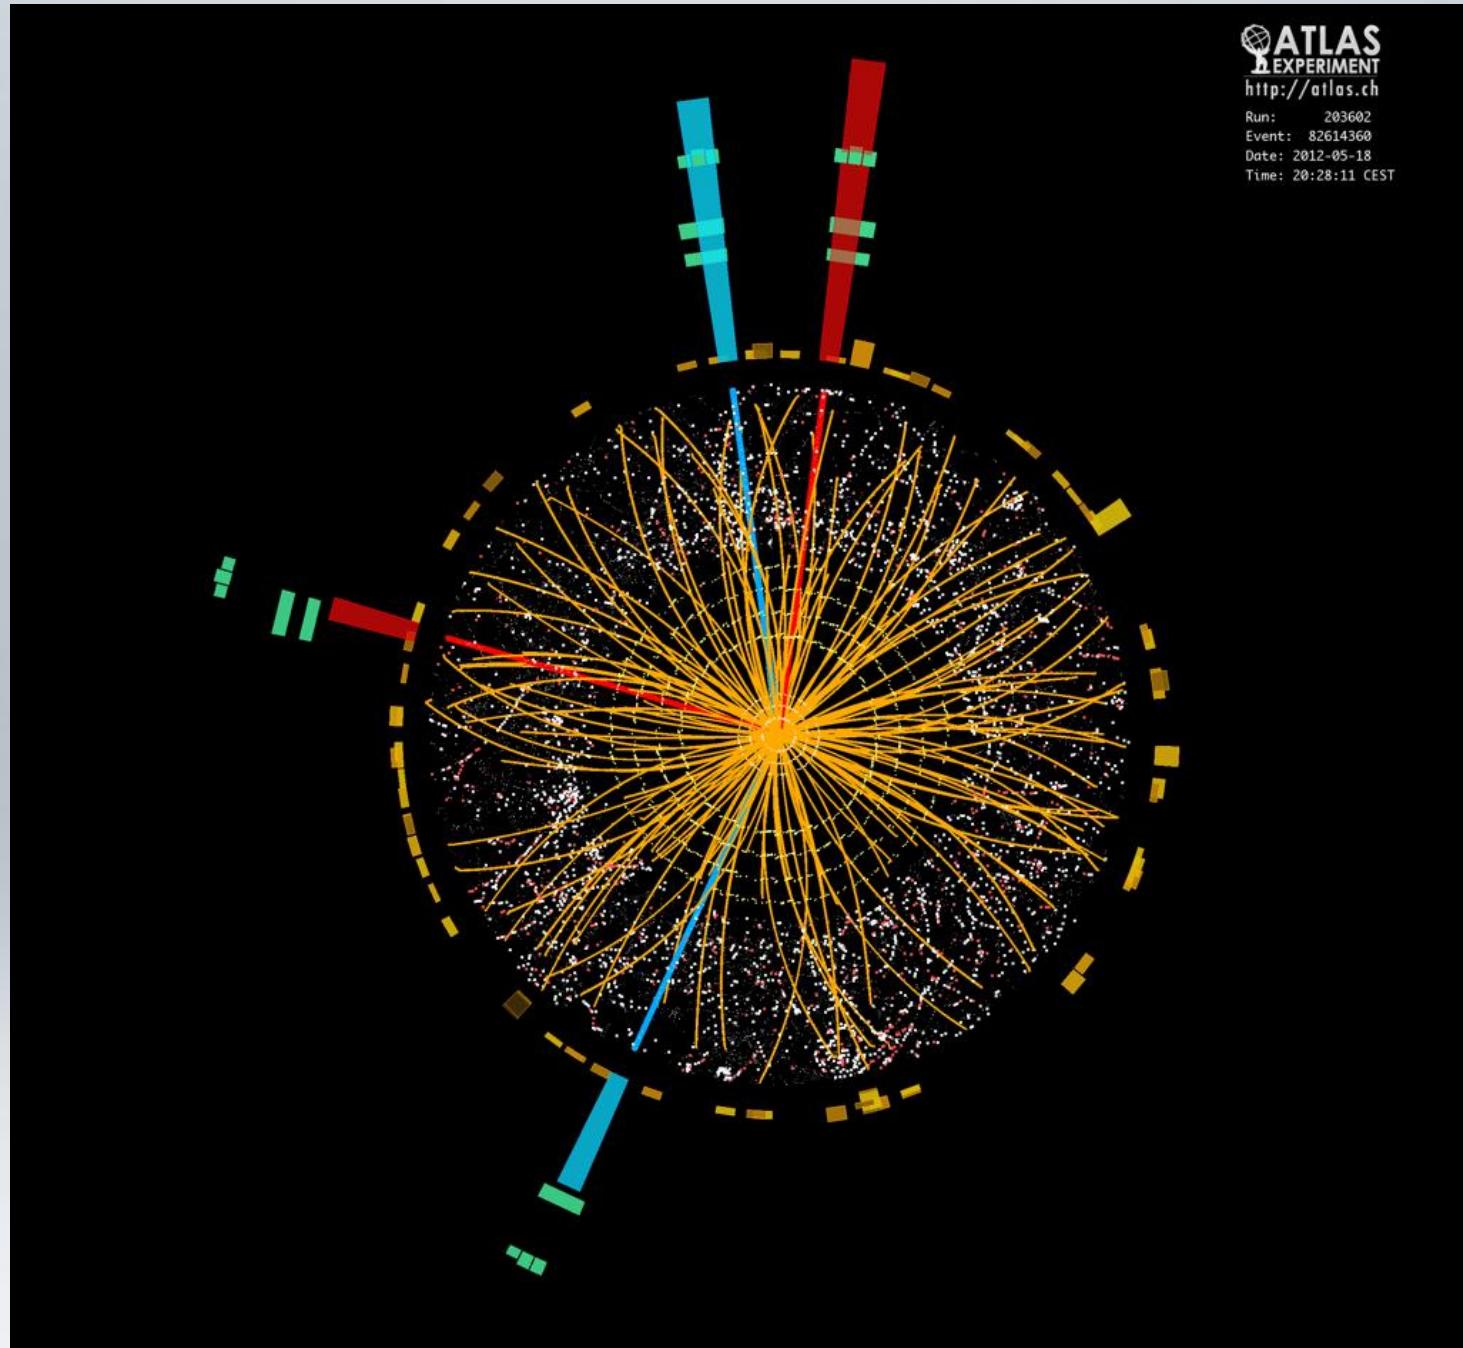

2 Antimatter in the LHC ?

Proton-proton collision at 8,000,000,000 eV

300-800 new particles ... and antiparticles (1:1)

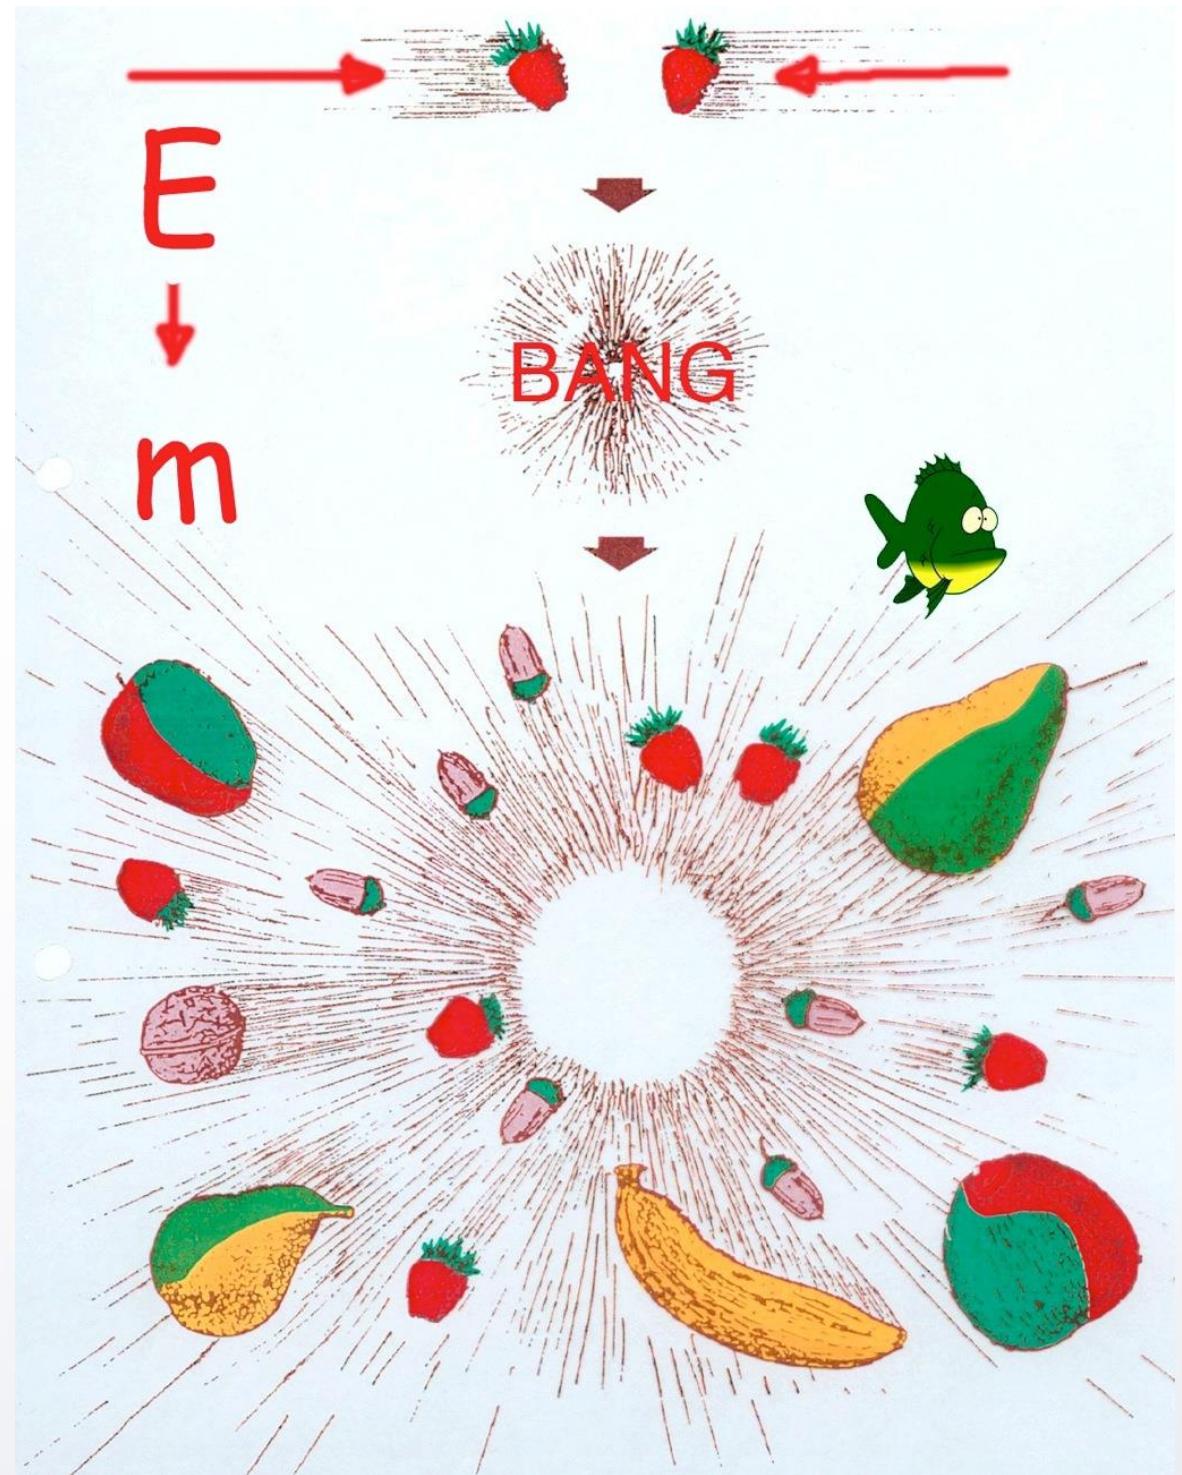

2 Antimatter in the LHC ?

For example: 400 new particles - average energy 20 GeV

2 Antimatter in the LHC ?

New particles and antiparticles are produced in collisions

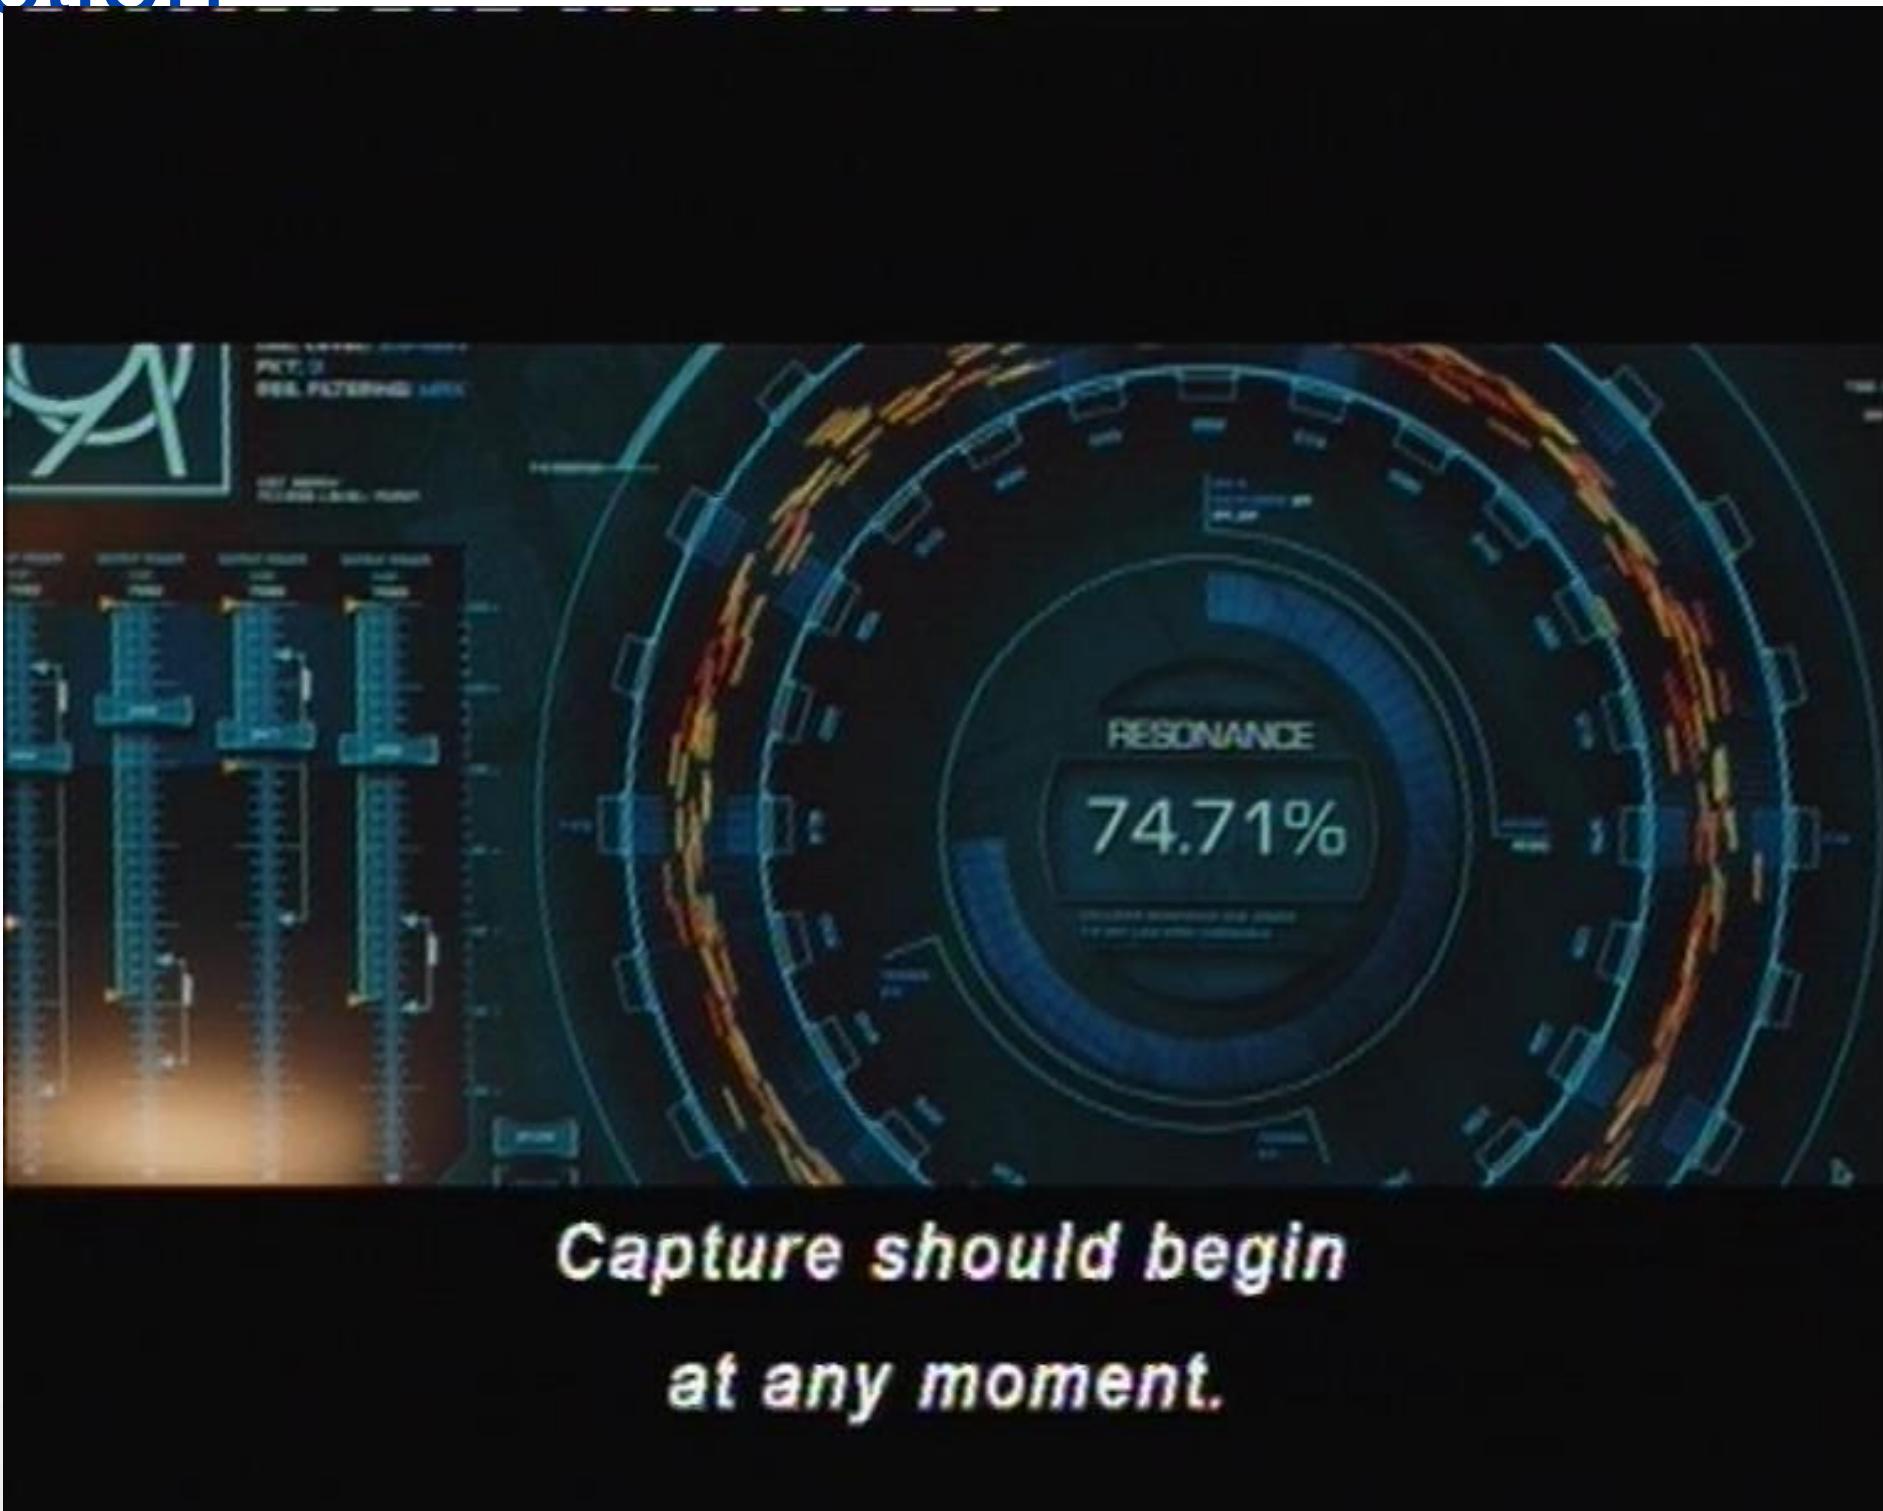

Angels & Demons - The Physics behind the Movie

The real ATLAS cover - 100 m underground

Angels & Demons - The Physics behind the Movie

The noisy Hollywood version of antimatter production

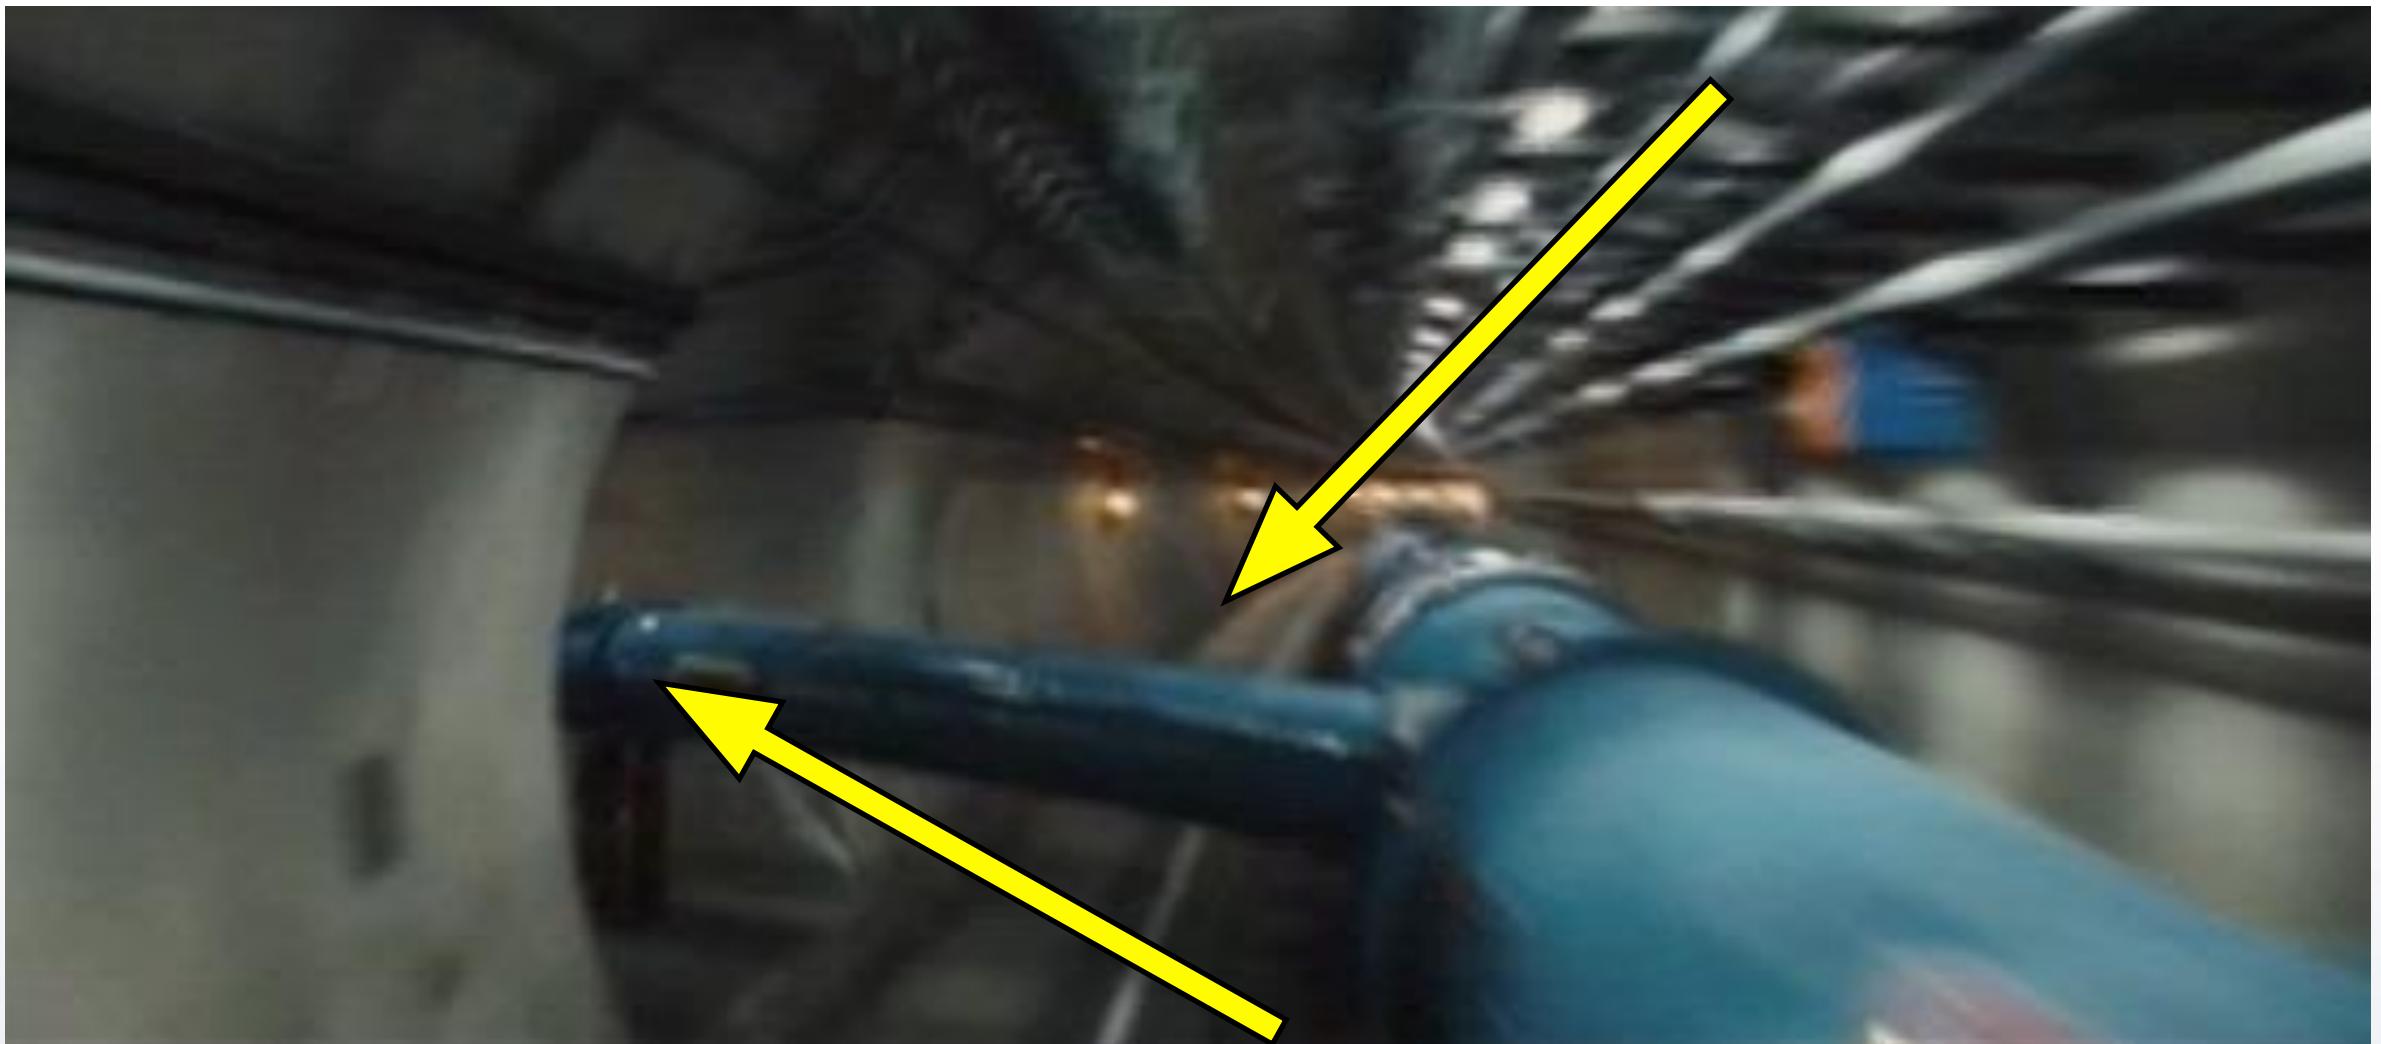

Angels & Demons - The Physics behind the Movie

2 Antimatter in the LHC ?

Bend 20 GeV antiprotons around 5 m radius?

$$B = E [\text{GeV}] / 0.3 / R[\text{m}] = 20/0.3/5 \sim \mathbf{13 \text{ T}} (?)$$

Decelerate 20 GeV antiprotons within 100 m?

$$\text{Gradient} = 20000 \text{ MeV}/100 \text{ m} = \mathbf{200 \text{ MeV/m}}$$

Angels & Demons - The Physics behind the Movie

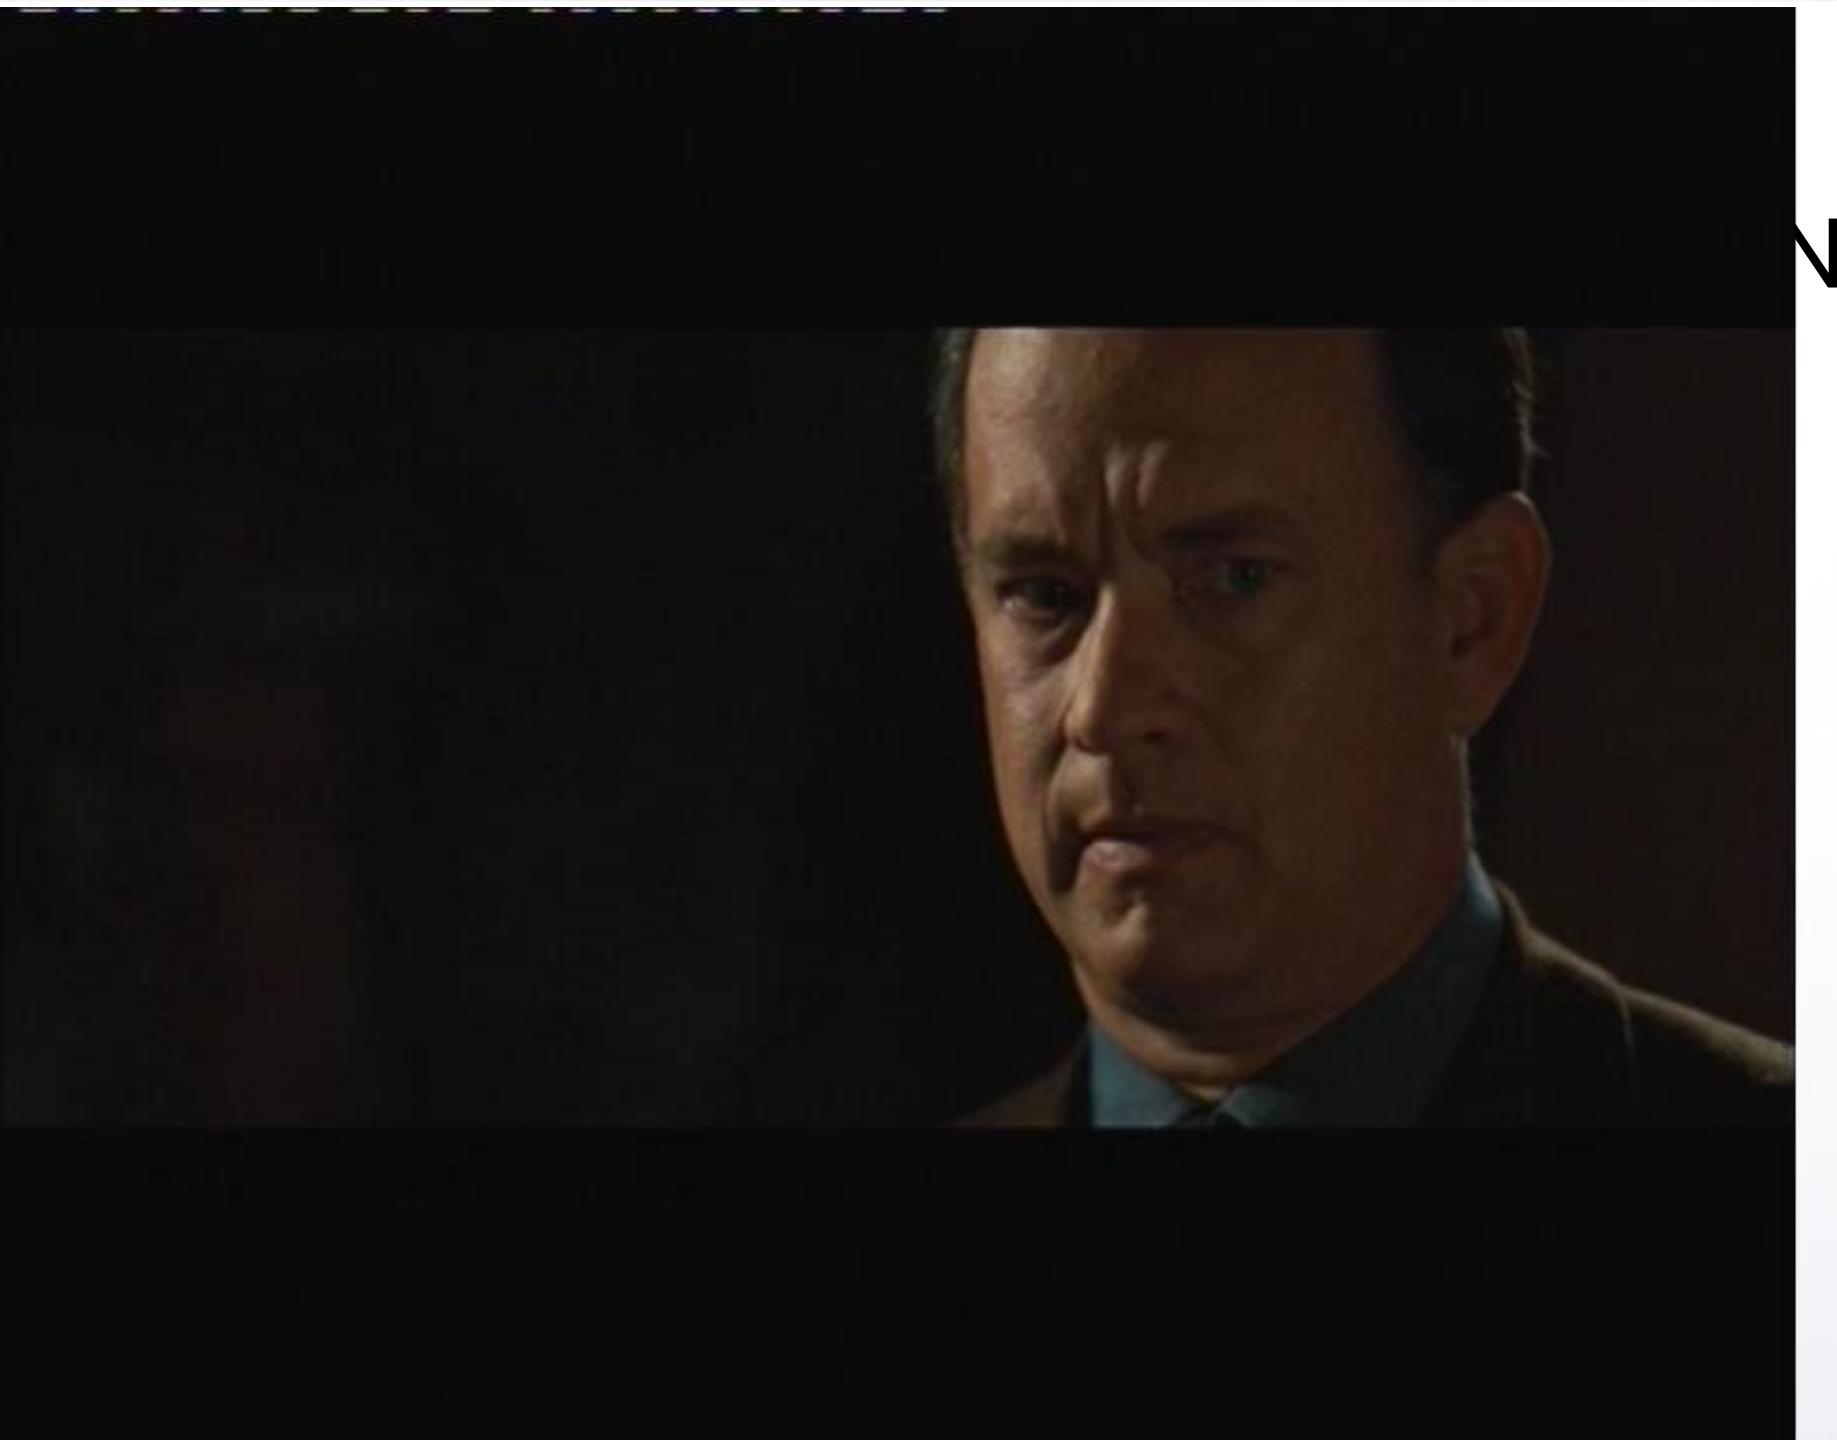

3 The mystery of

2009:
Pre-premiere of
Angels+Demons at
CERN

Angels & Demons - The Physics behind the Movie

3 The mystery of antimatter

Tom Hanks explains the research at CERN

Angels & Demons - The Physics behind the Movie

3 The mystery of antimatter

Antimatter and ...

God particle ?? No.

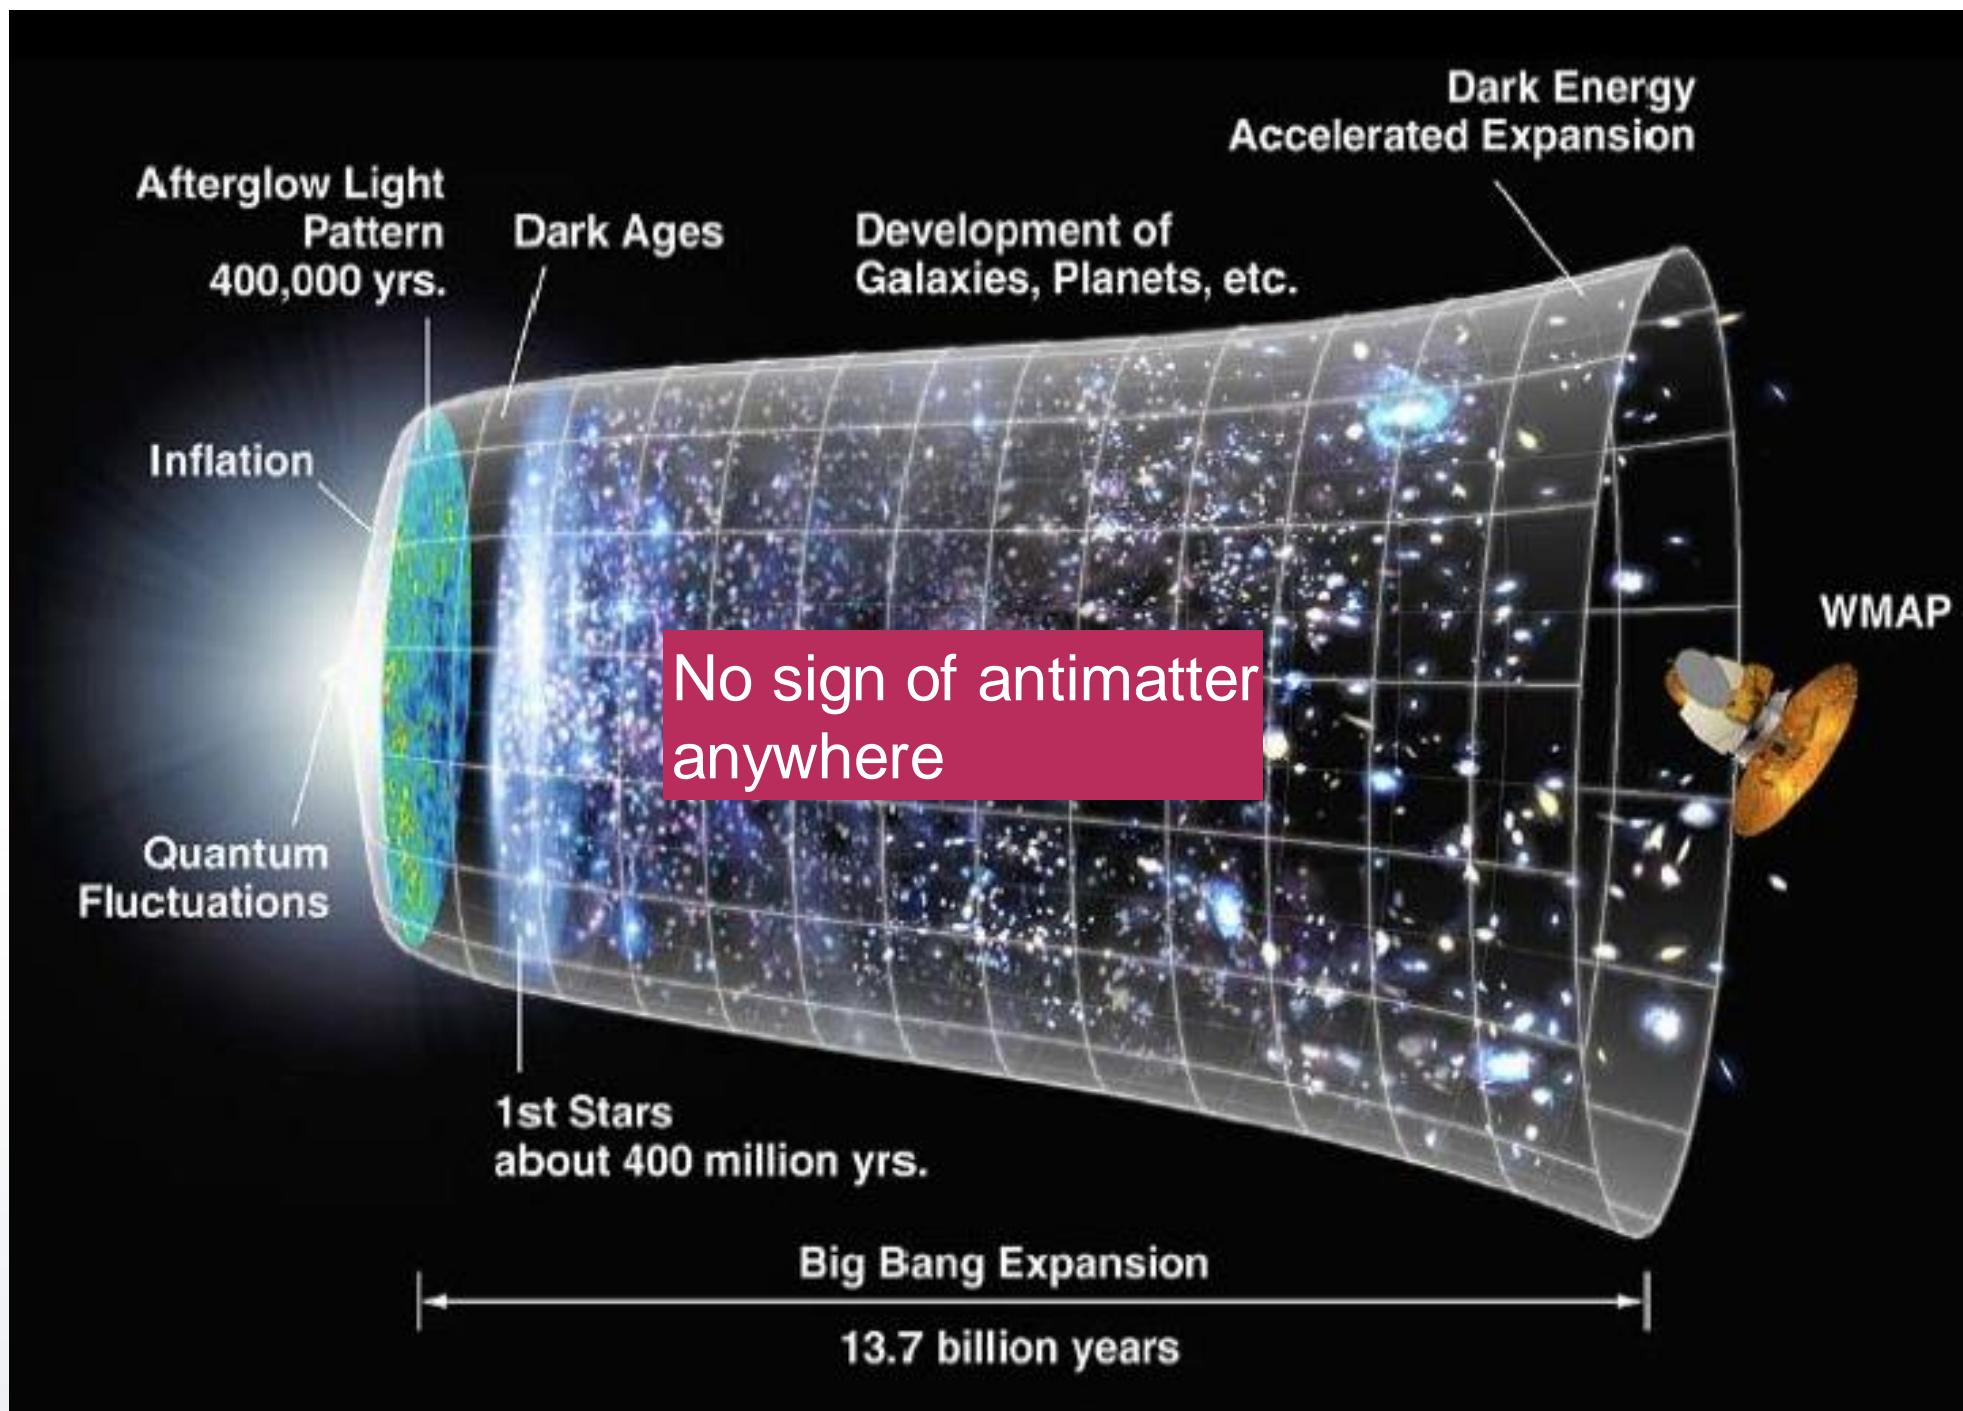

Implications for energy research ? Hmmm.

Combustible substance ? May be.

An airtight nanocomposite container with magnets

The moment of creation ... yes!!

3 The mystery of antimatter

Big Bang model: the evolution of the Universe

Angels & Demons - The Physics behind the Movie

3 The mystery of antimatter

Where has the antimatter gone
?

Solar System ? No !

3 The mystery of antimatter

Where has the antimatter gone
?

In galaxies far, far away ? No.

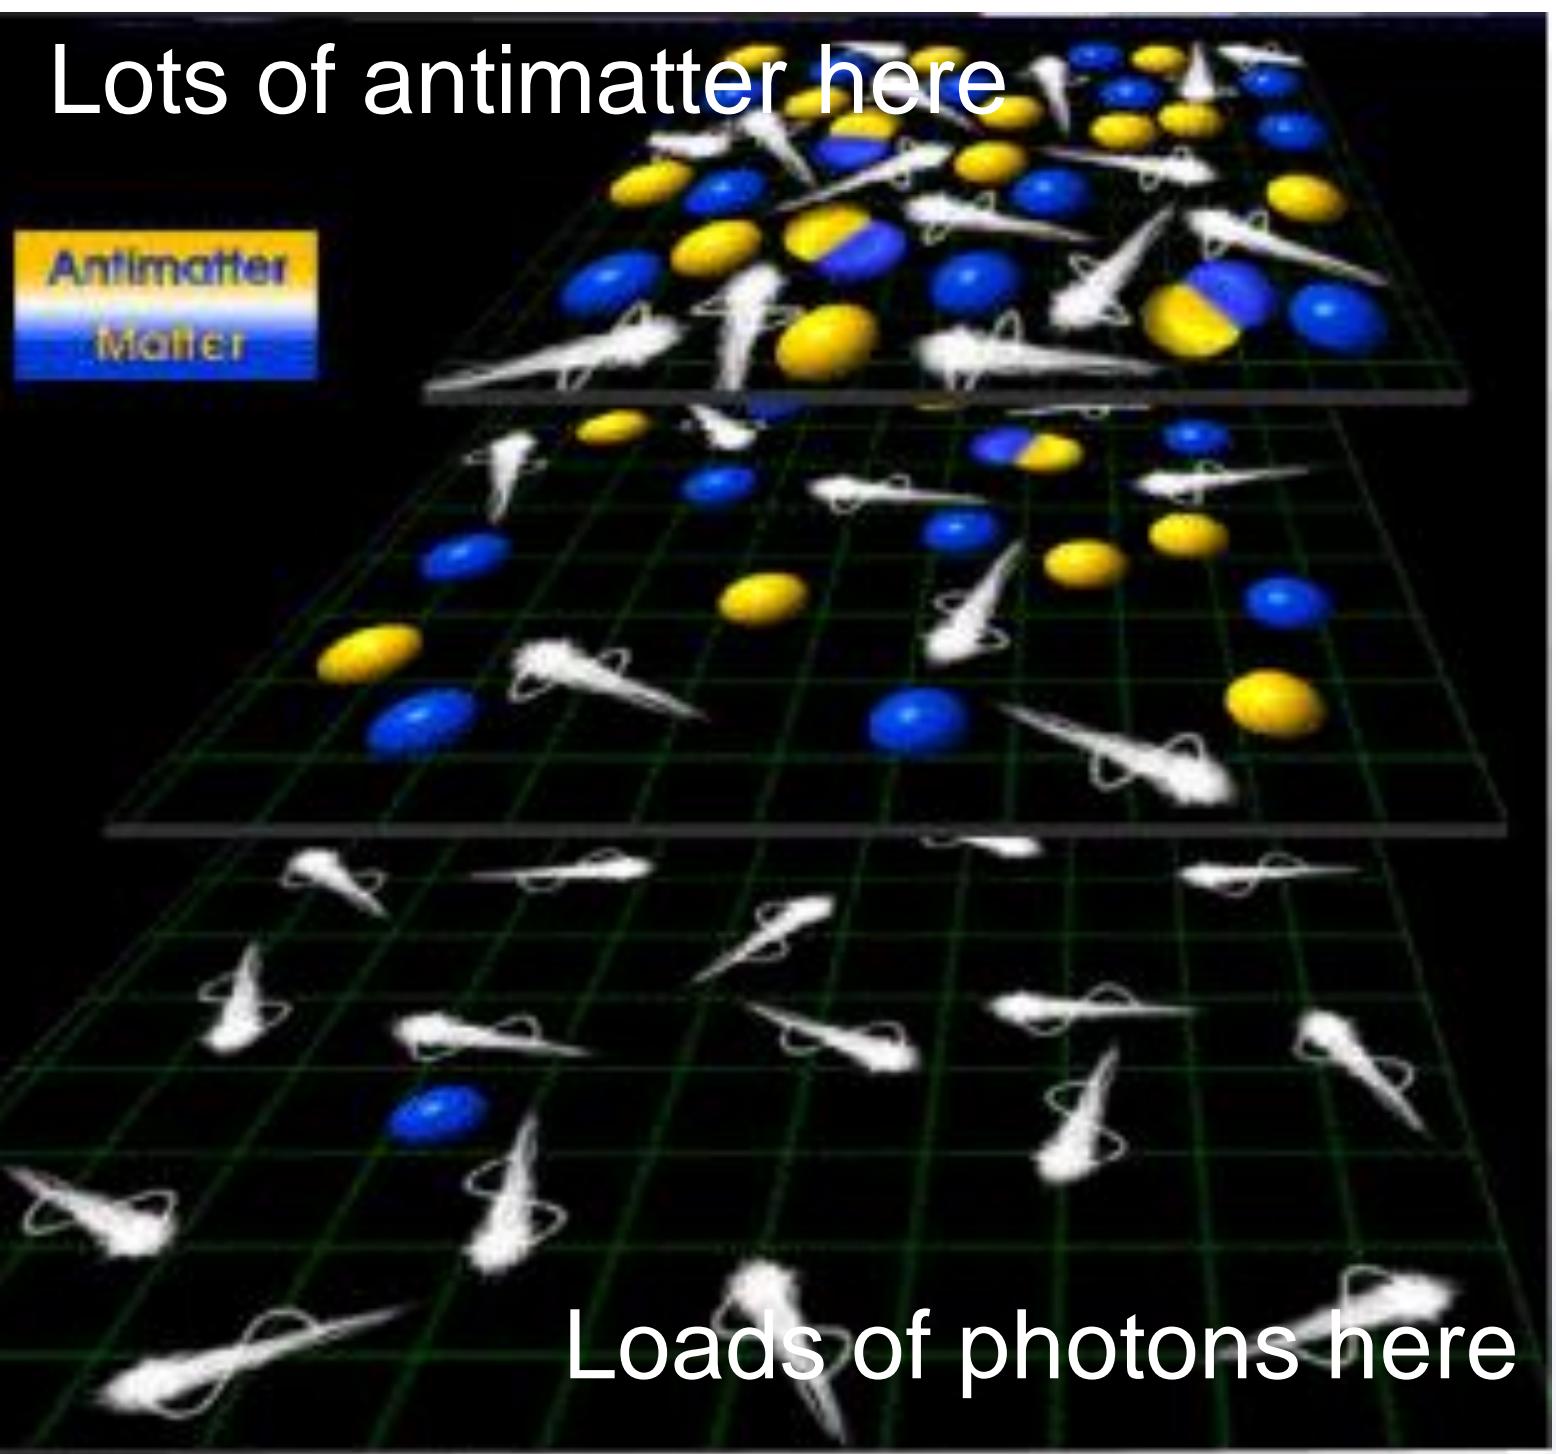

There seems to be no antimatter in the Universe
!

3 The mystery of antimatter

No antimatter in the Universe ?

Why not ???

3 The mystery of antimatter

Cosmic CSI

Big Bang:
Energy transforms to mass

< 1 μ s: matter = antimatter

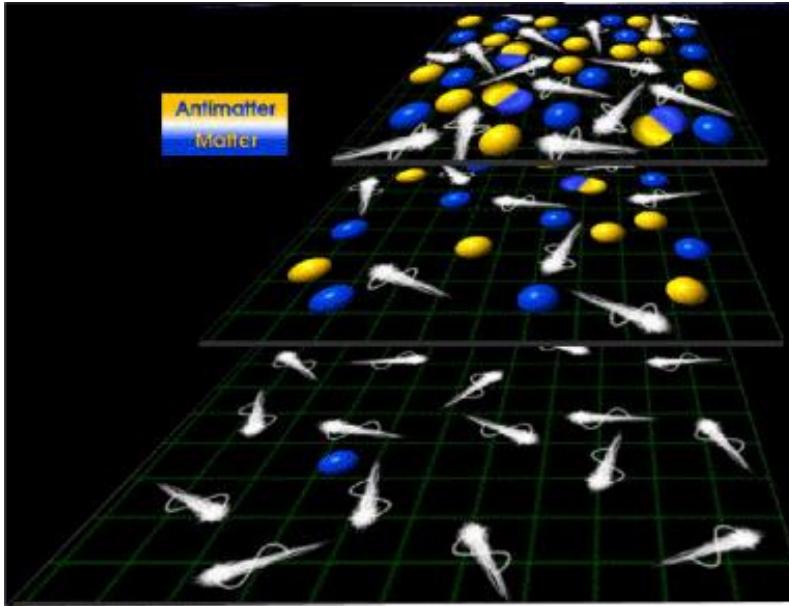

Annihilation battle

1 s : all antimatter has
disappeared,

some particles left (all stars/planets)
loads of 'photons' (left from
annihilation)

**Universe filled with light
(cosmic microwave
backg.)**

3 The mystery of antimatter

Why did all antimatter
disappear,
but a little bit of matter was left?

Matter and antimatter must have (very slightly) different properties!
But where do we have to look ?

Mass, charge, magnetic moment (CERN: AD experiments)

CP violation (CERN: LHCb experiment)

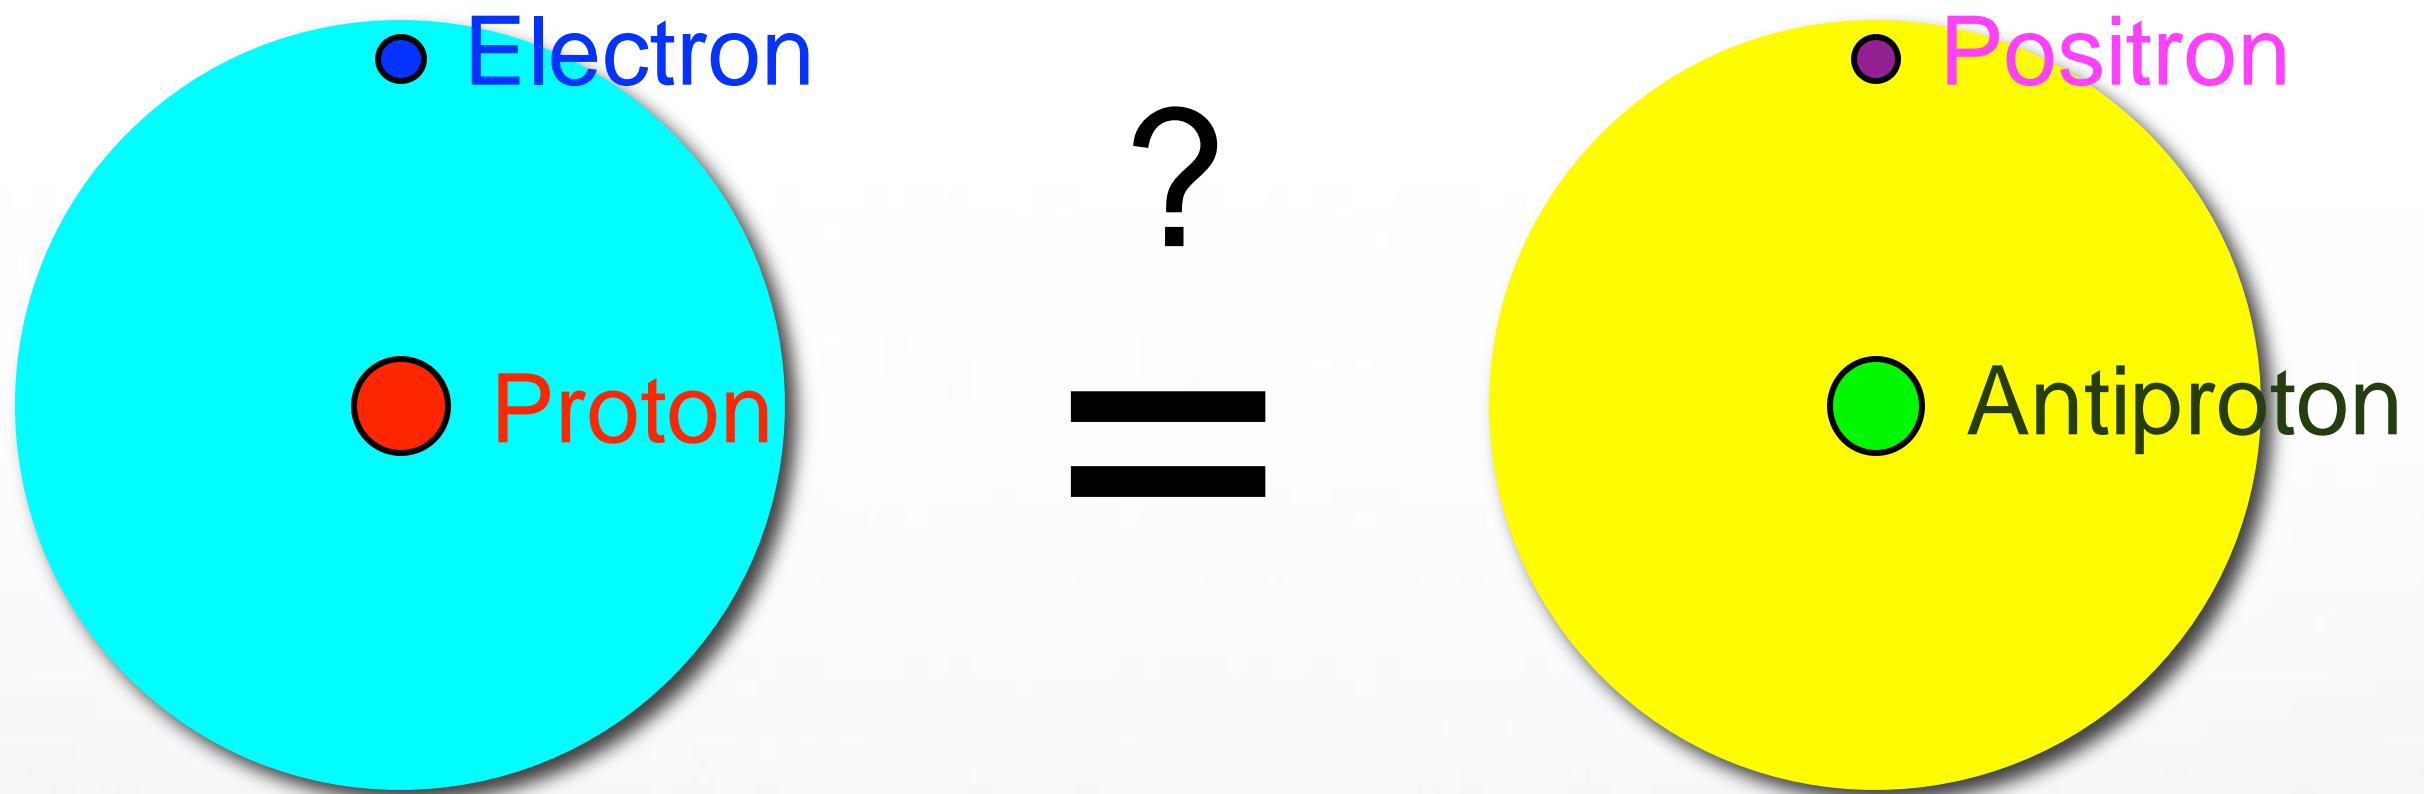

4 How to study antimatter ?

The antihydrogen route

...

4 How to study antimatter ?

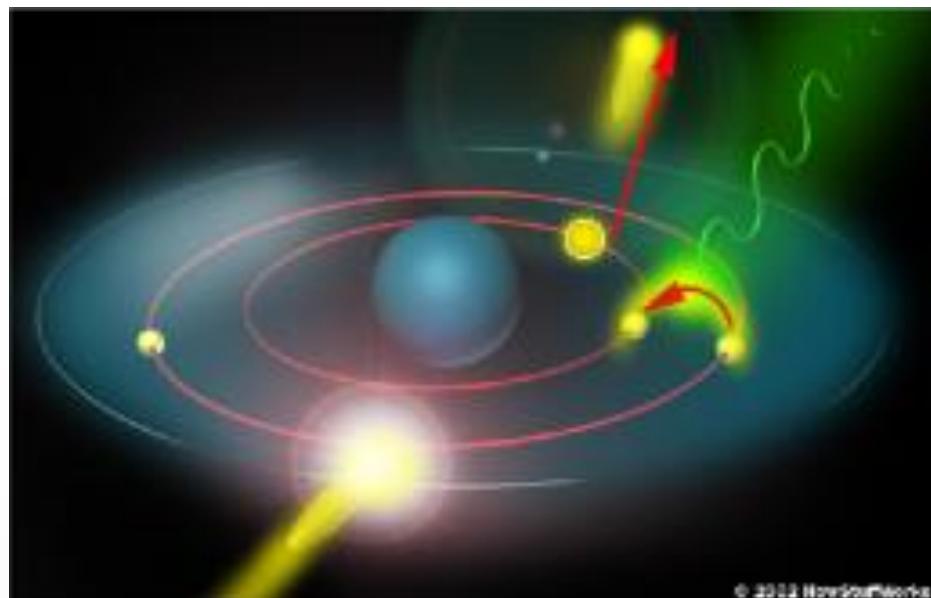

Make antihydrogen + compare with hydrogen atom

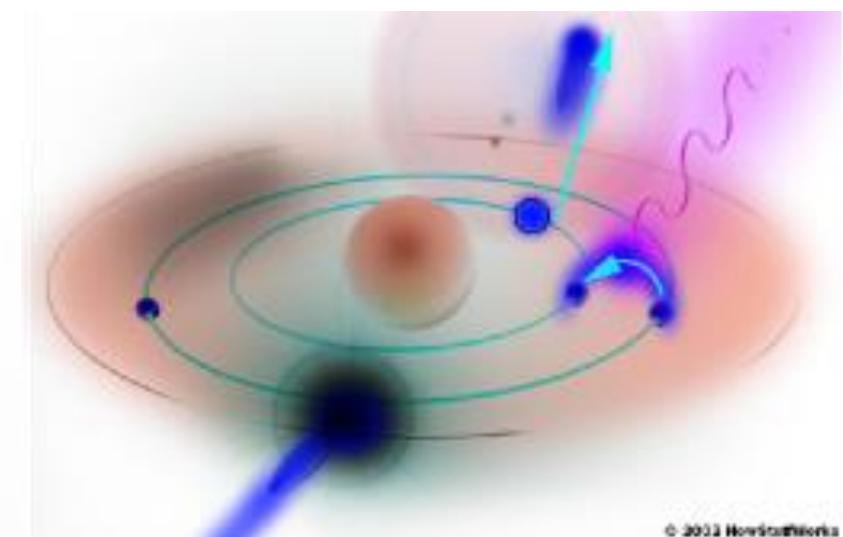

Measure differences to a precision of
0.000 000 000 000 001 %

4 How to study antimatter ?

Same energy levels (1S-2S)?

Hydrogen

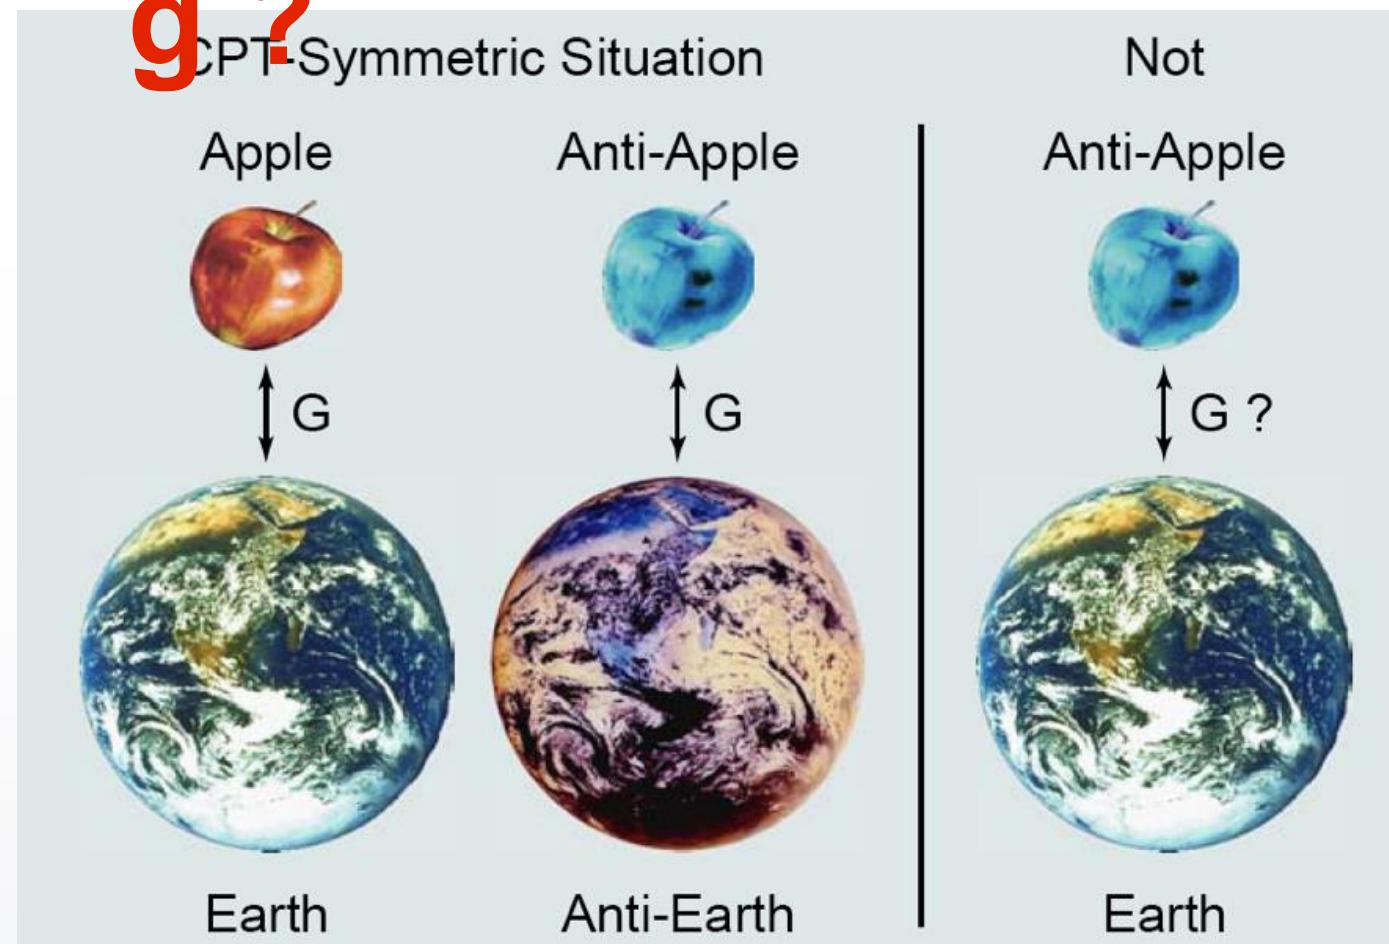

Anti-Hydrogen

AD experiments: ALPHA, ATRAP, ASACUSA

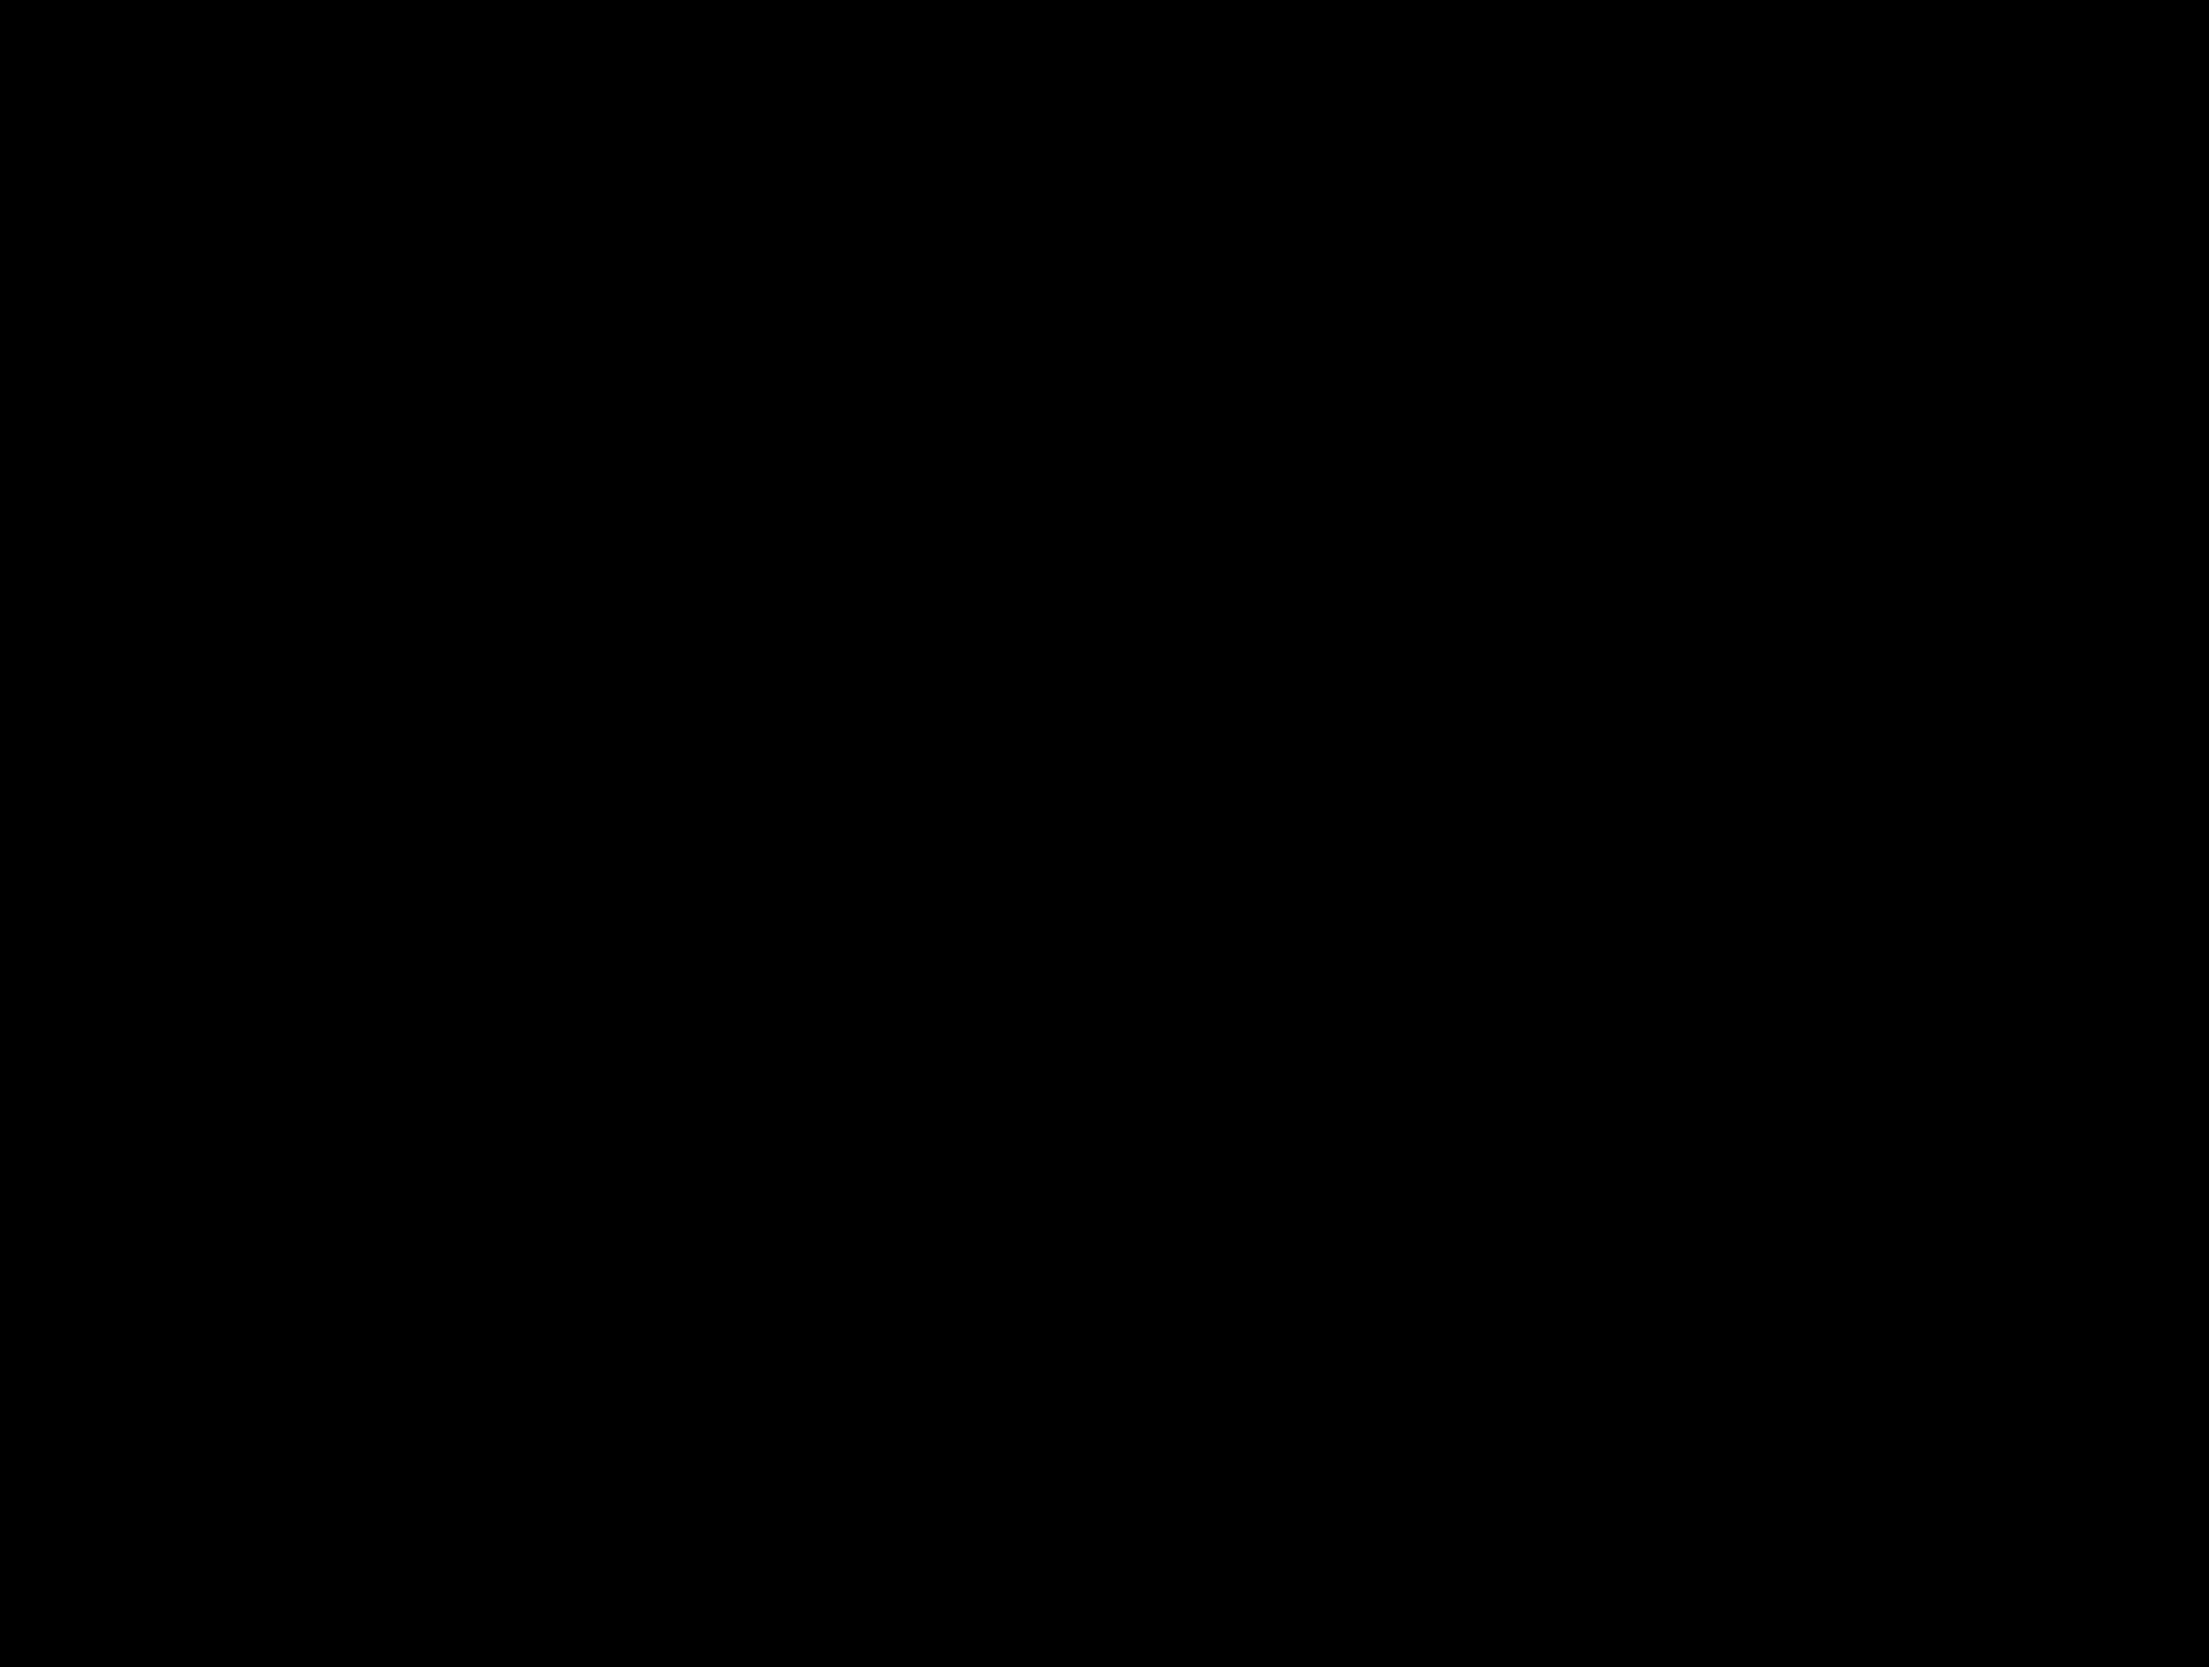

4 How to study antimatter ?

Same gravity: $g = g?$

AD experiments: Aegis, Gbar

Antiproton Decelerator at CERN

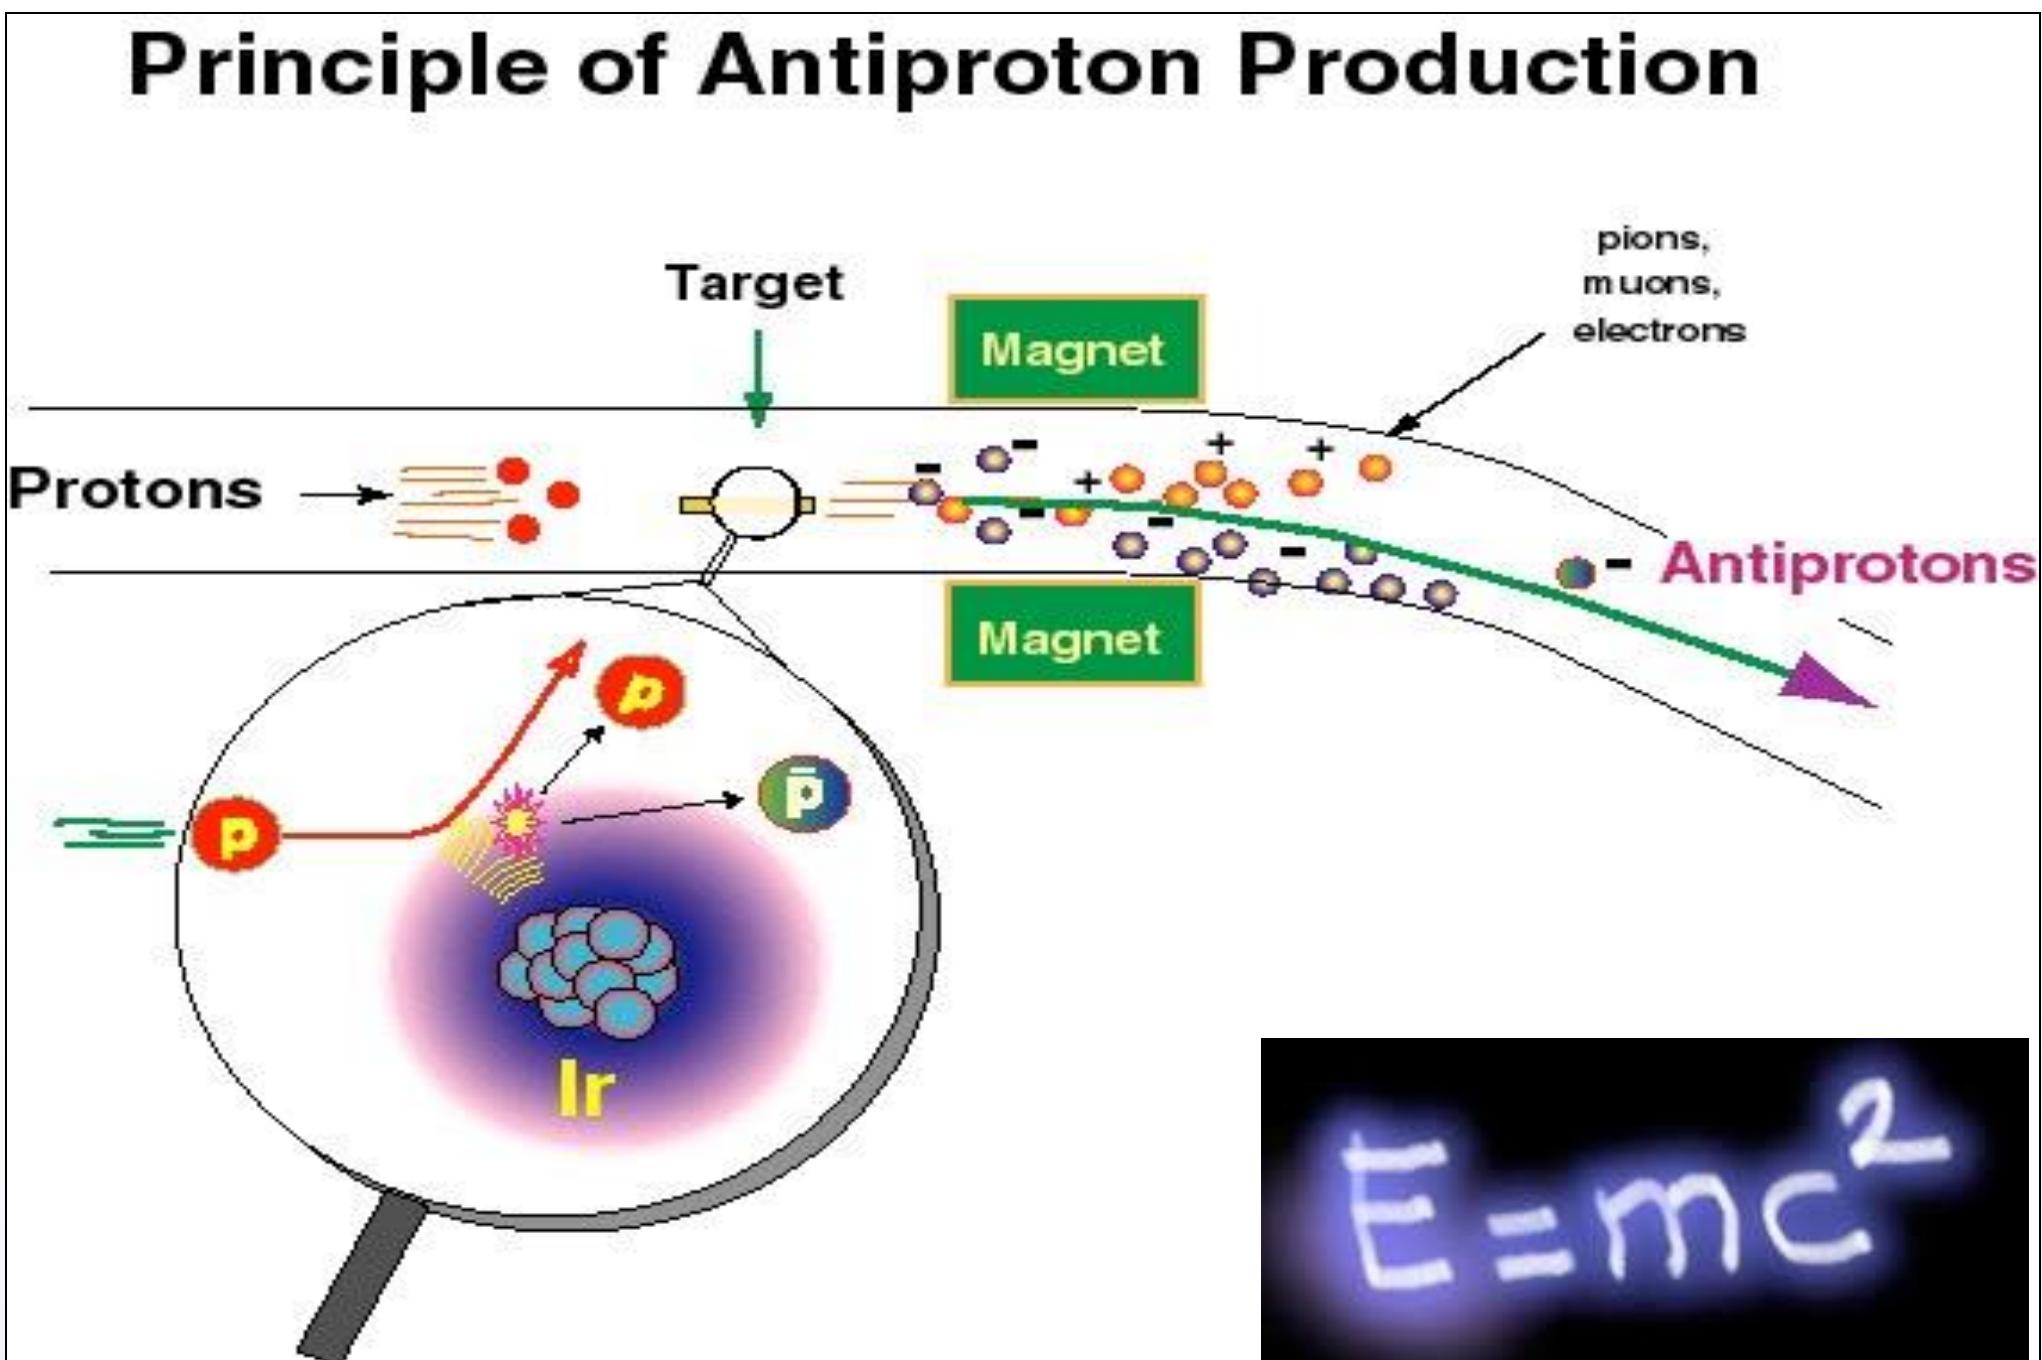

4 How to study antimatter ?

**Antiproton
Decelerator**
produces 100,000,000
antiprotons per minute

Slows them down to 10
% of the speed of light

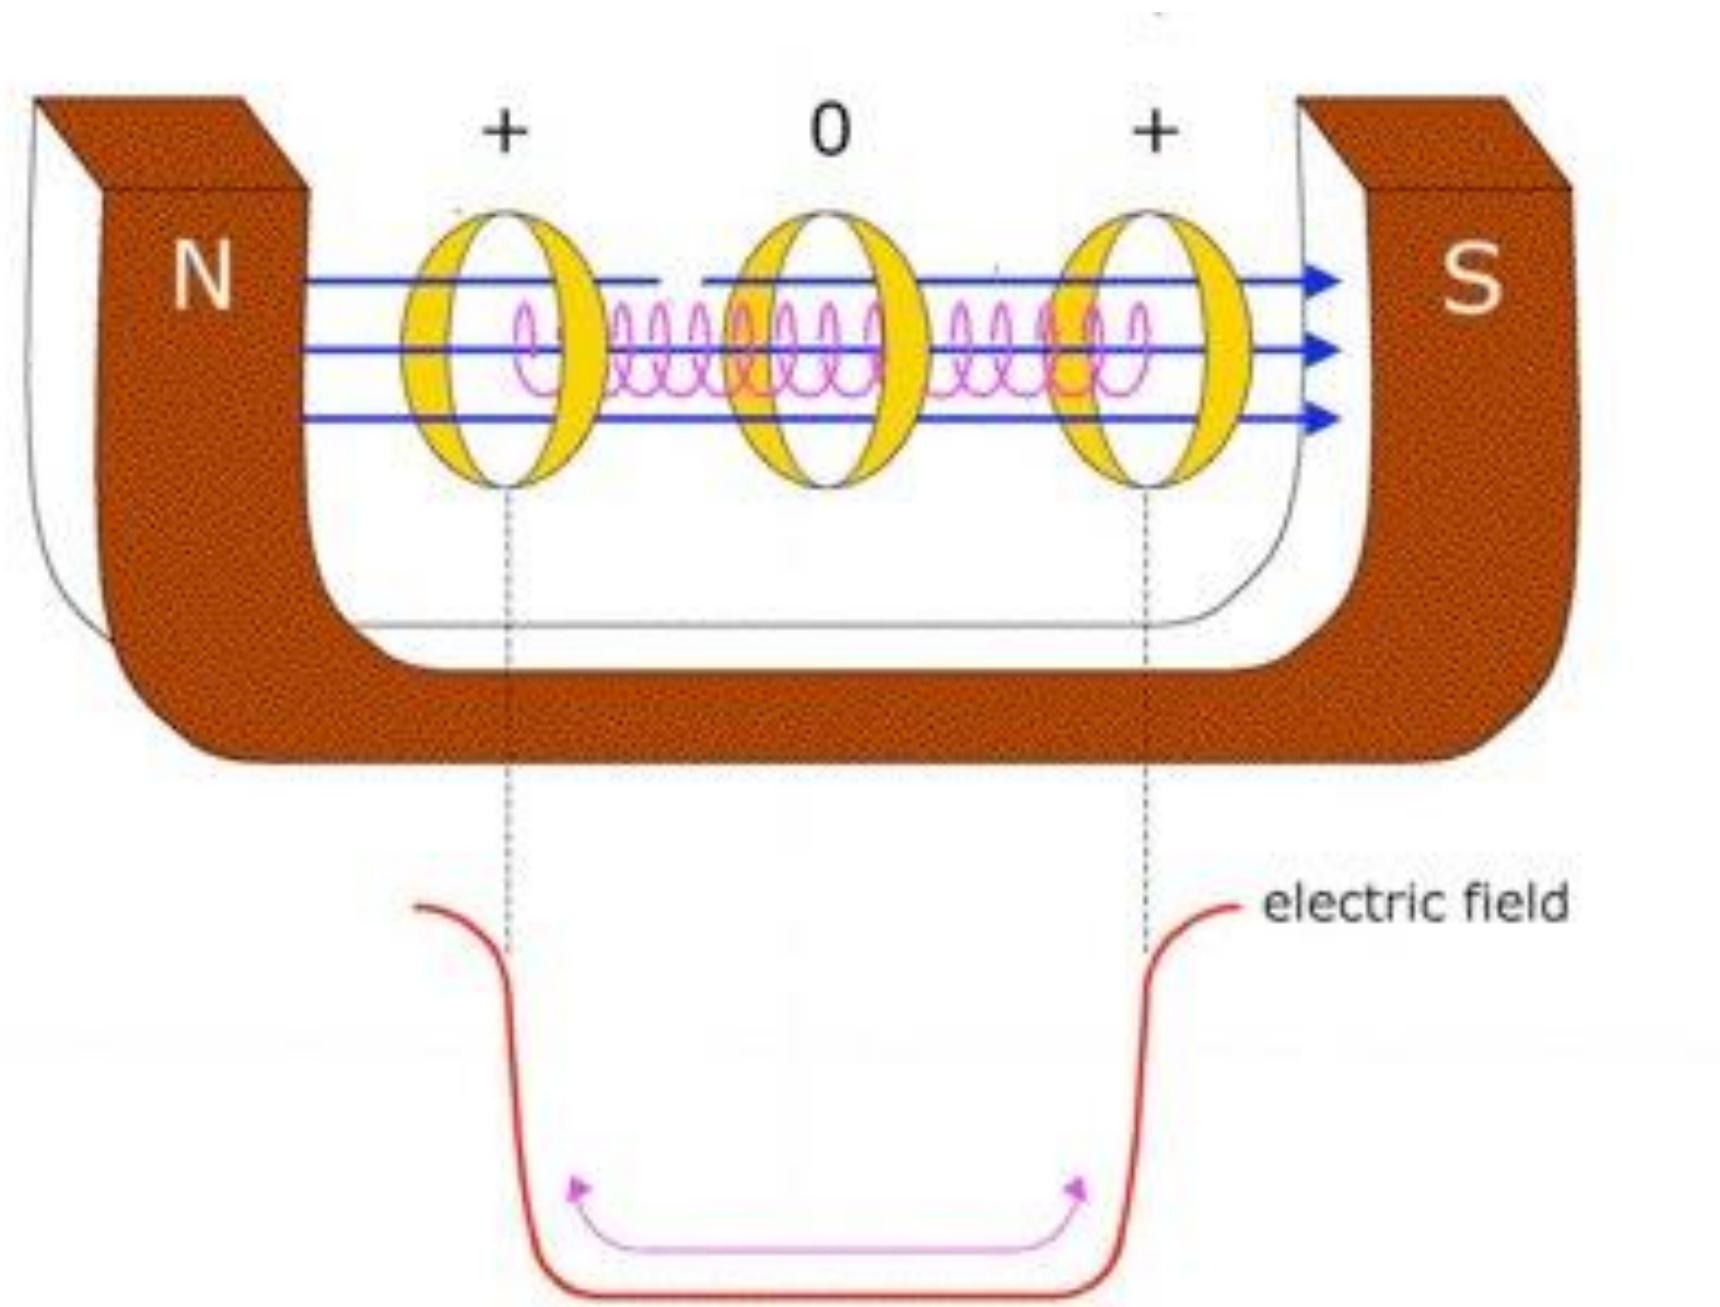

4 How to study antimatter ?

Antiprotons are made in collisions of protons with nuclei

Angels & Demons - The Physics behind the Movie

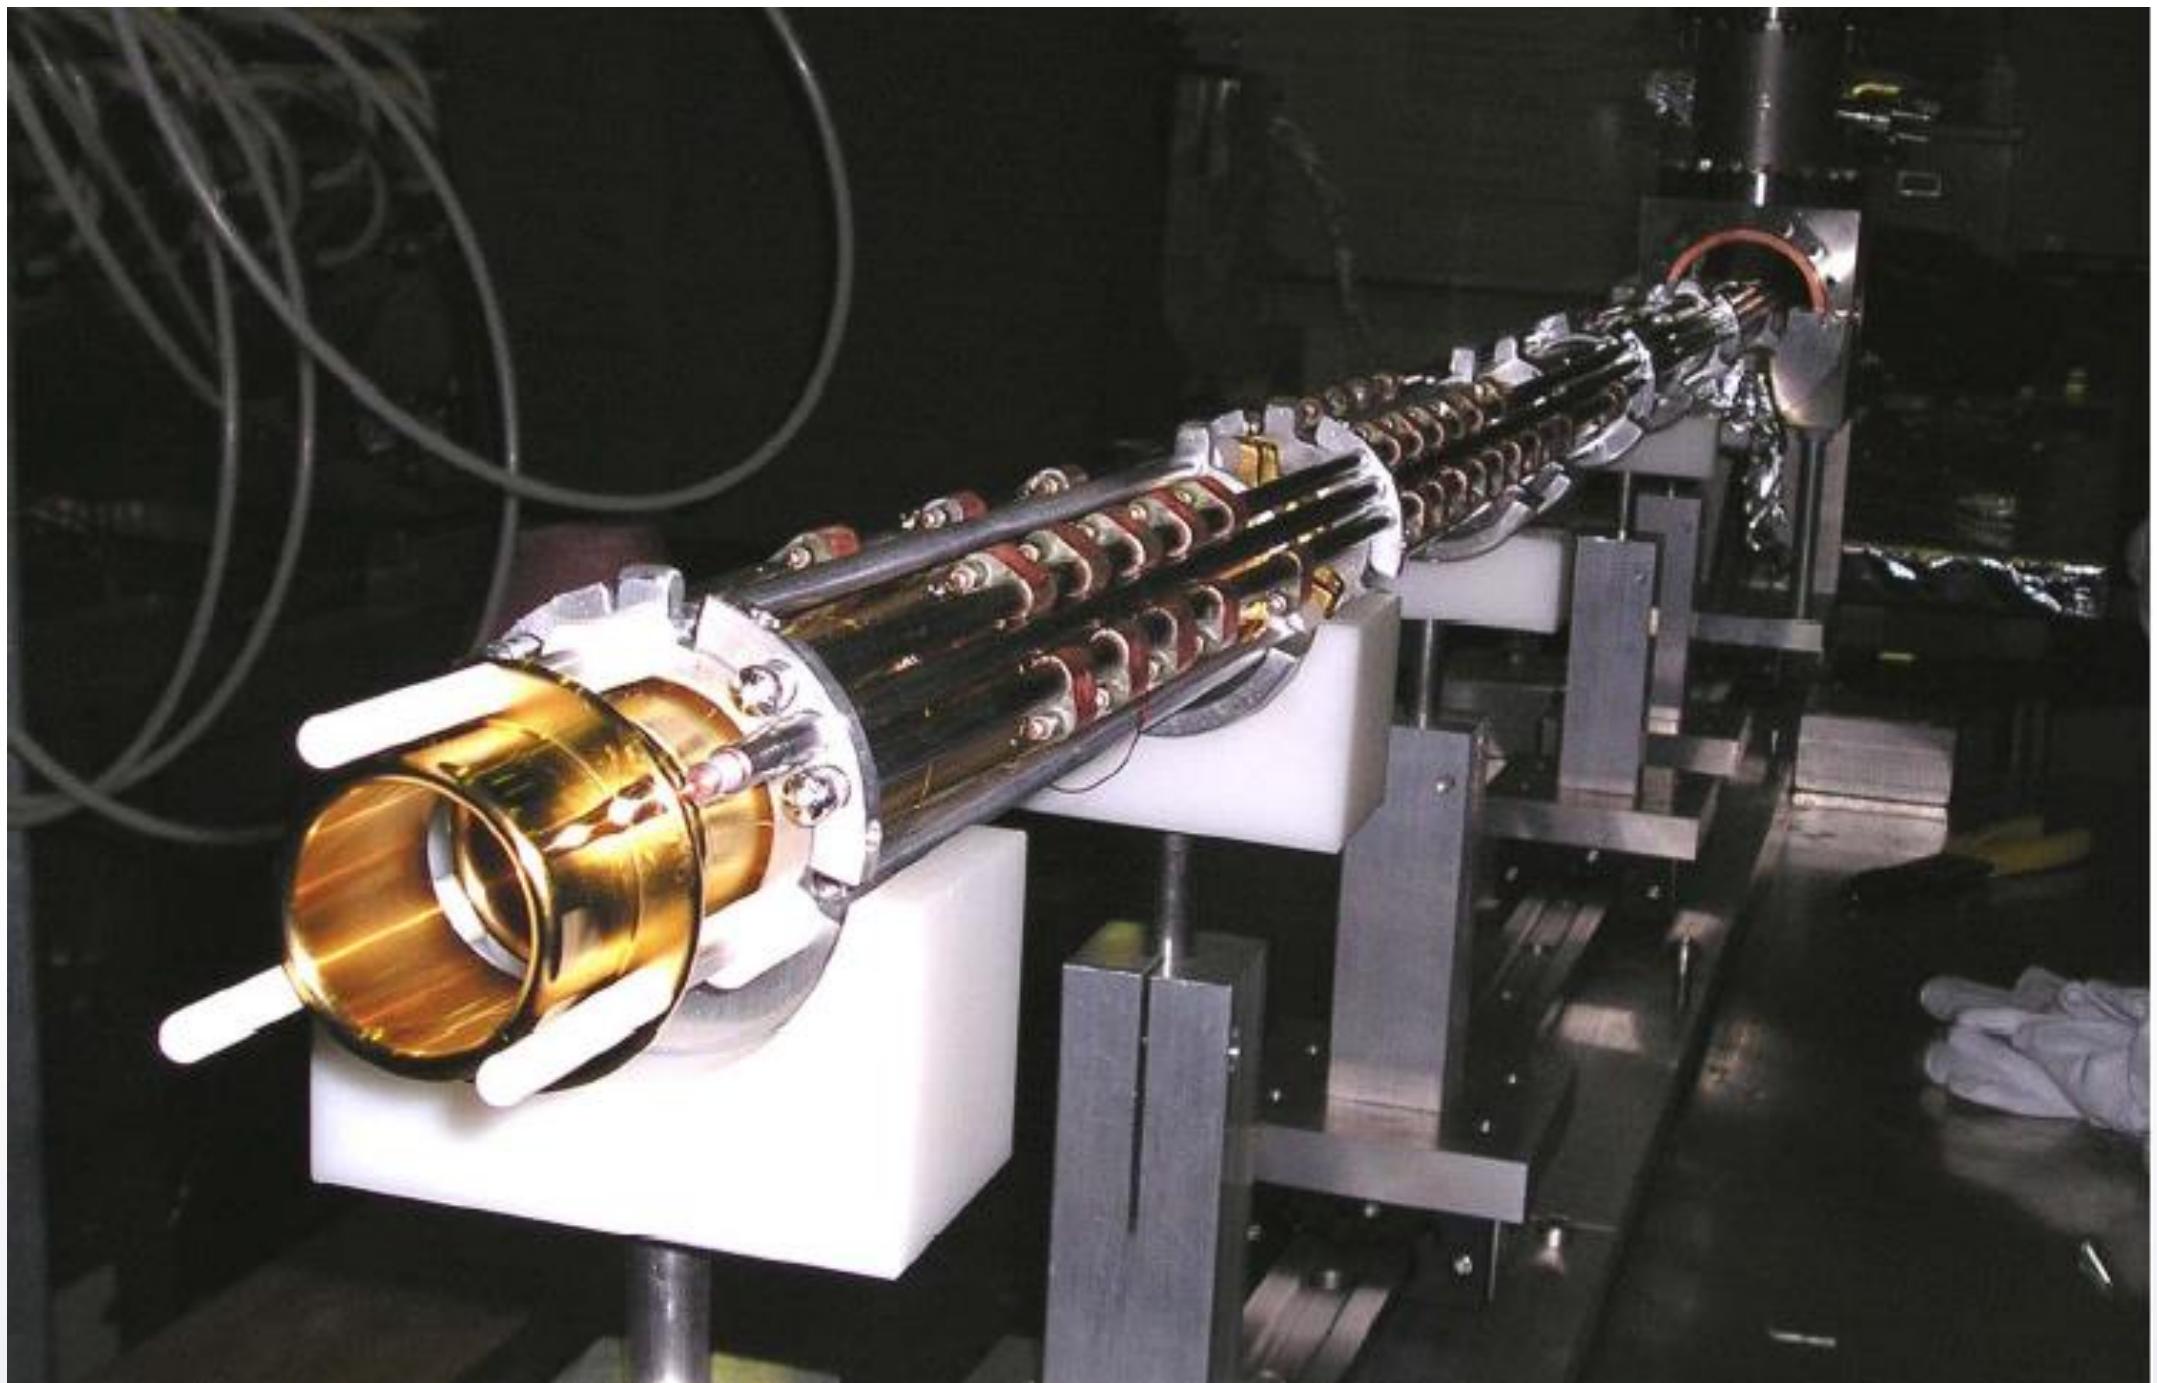

4 How to study antimatter ?

Principle of antiparticle trapping

Angels & Demons - The Physics behind the Movie

4 How to study antimatter ?

A real antimatter trap at CERN

Angels & Demons - The Physics behind the Movie

Magnets

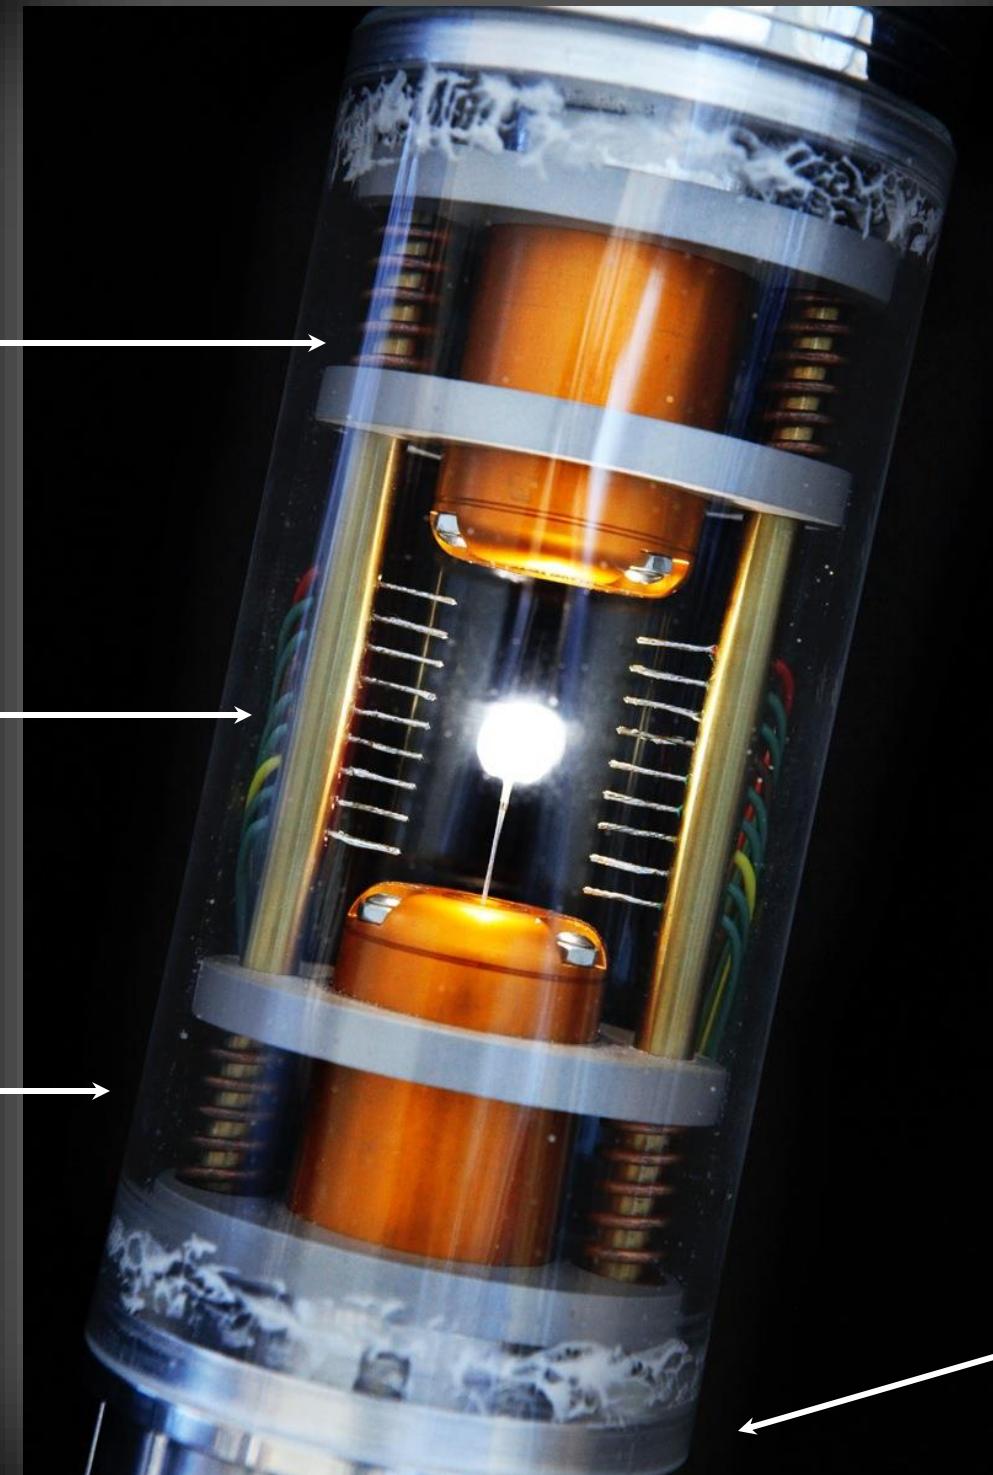

Electrodes

Magnets

Ultra-high
vacuum

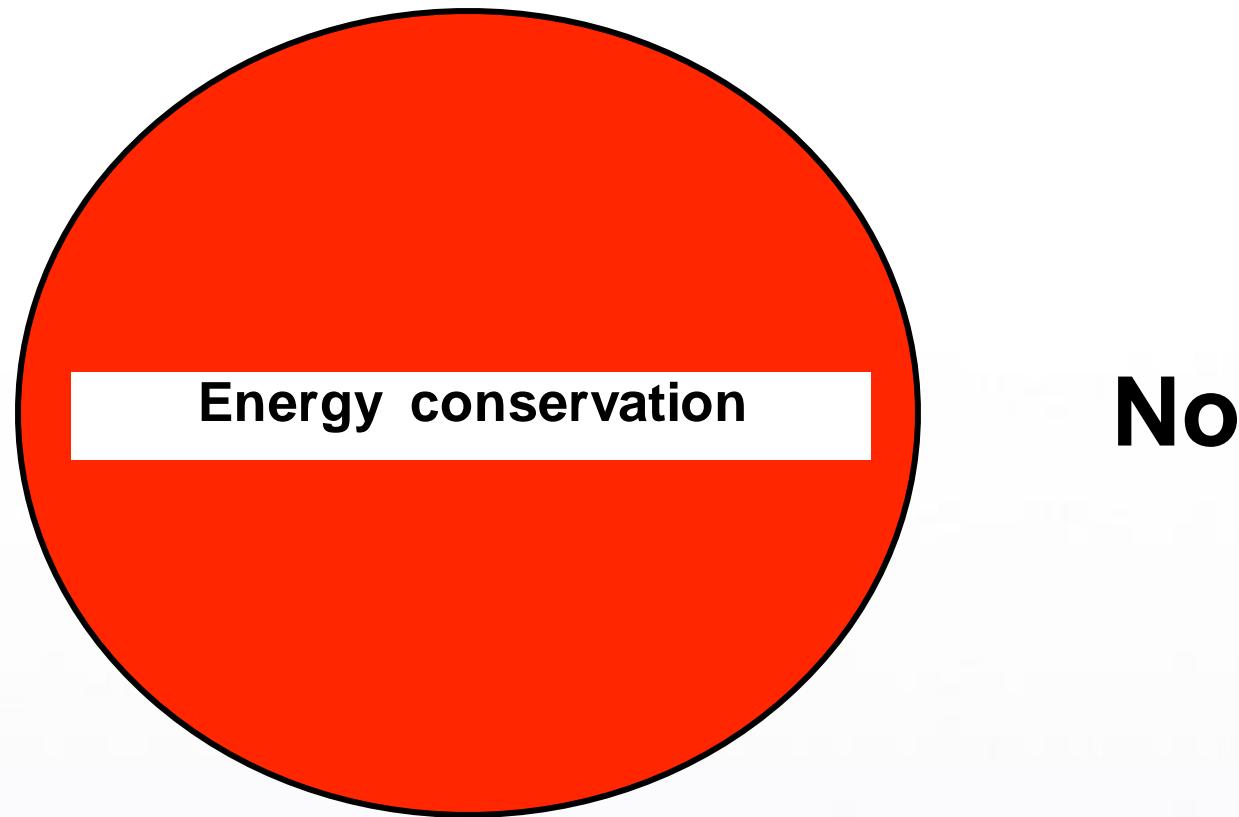

The “Angels & Demons” version

5 An energy source? A bomb?

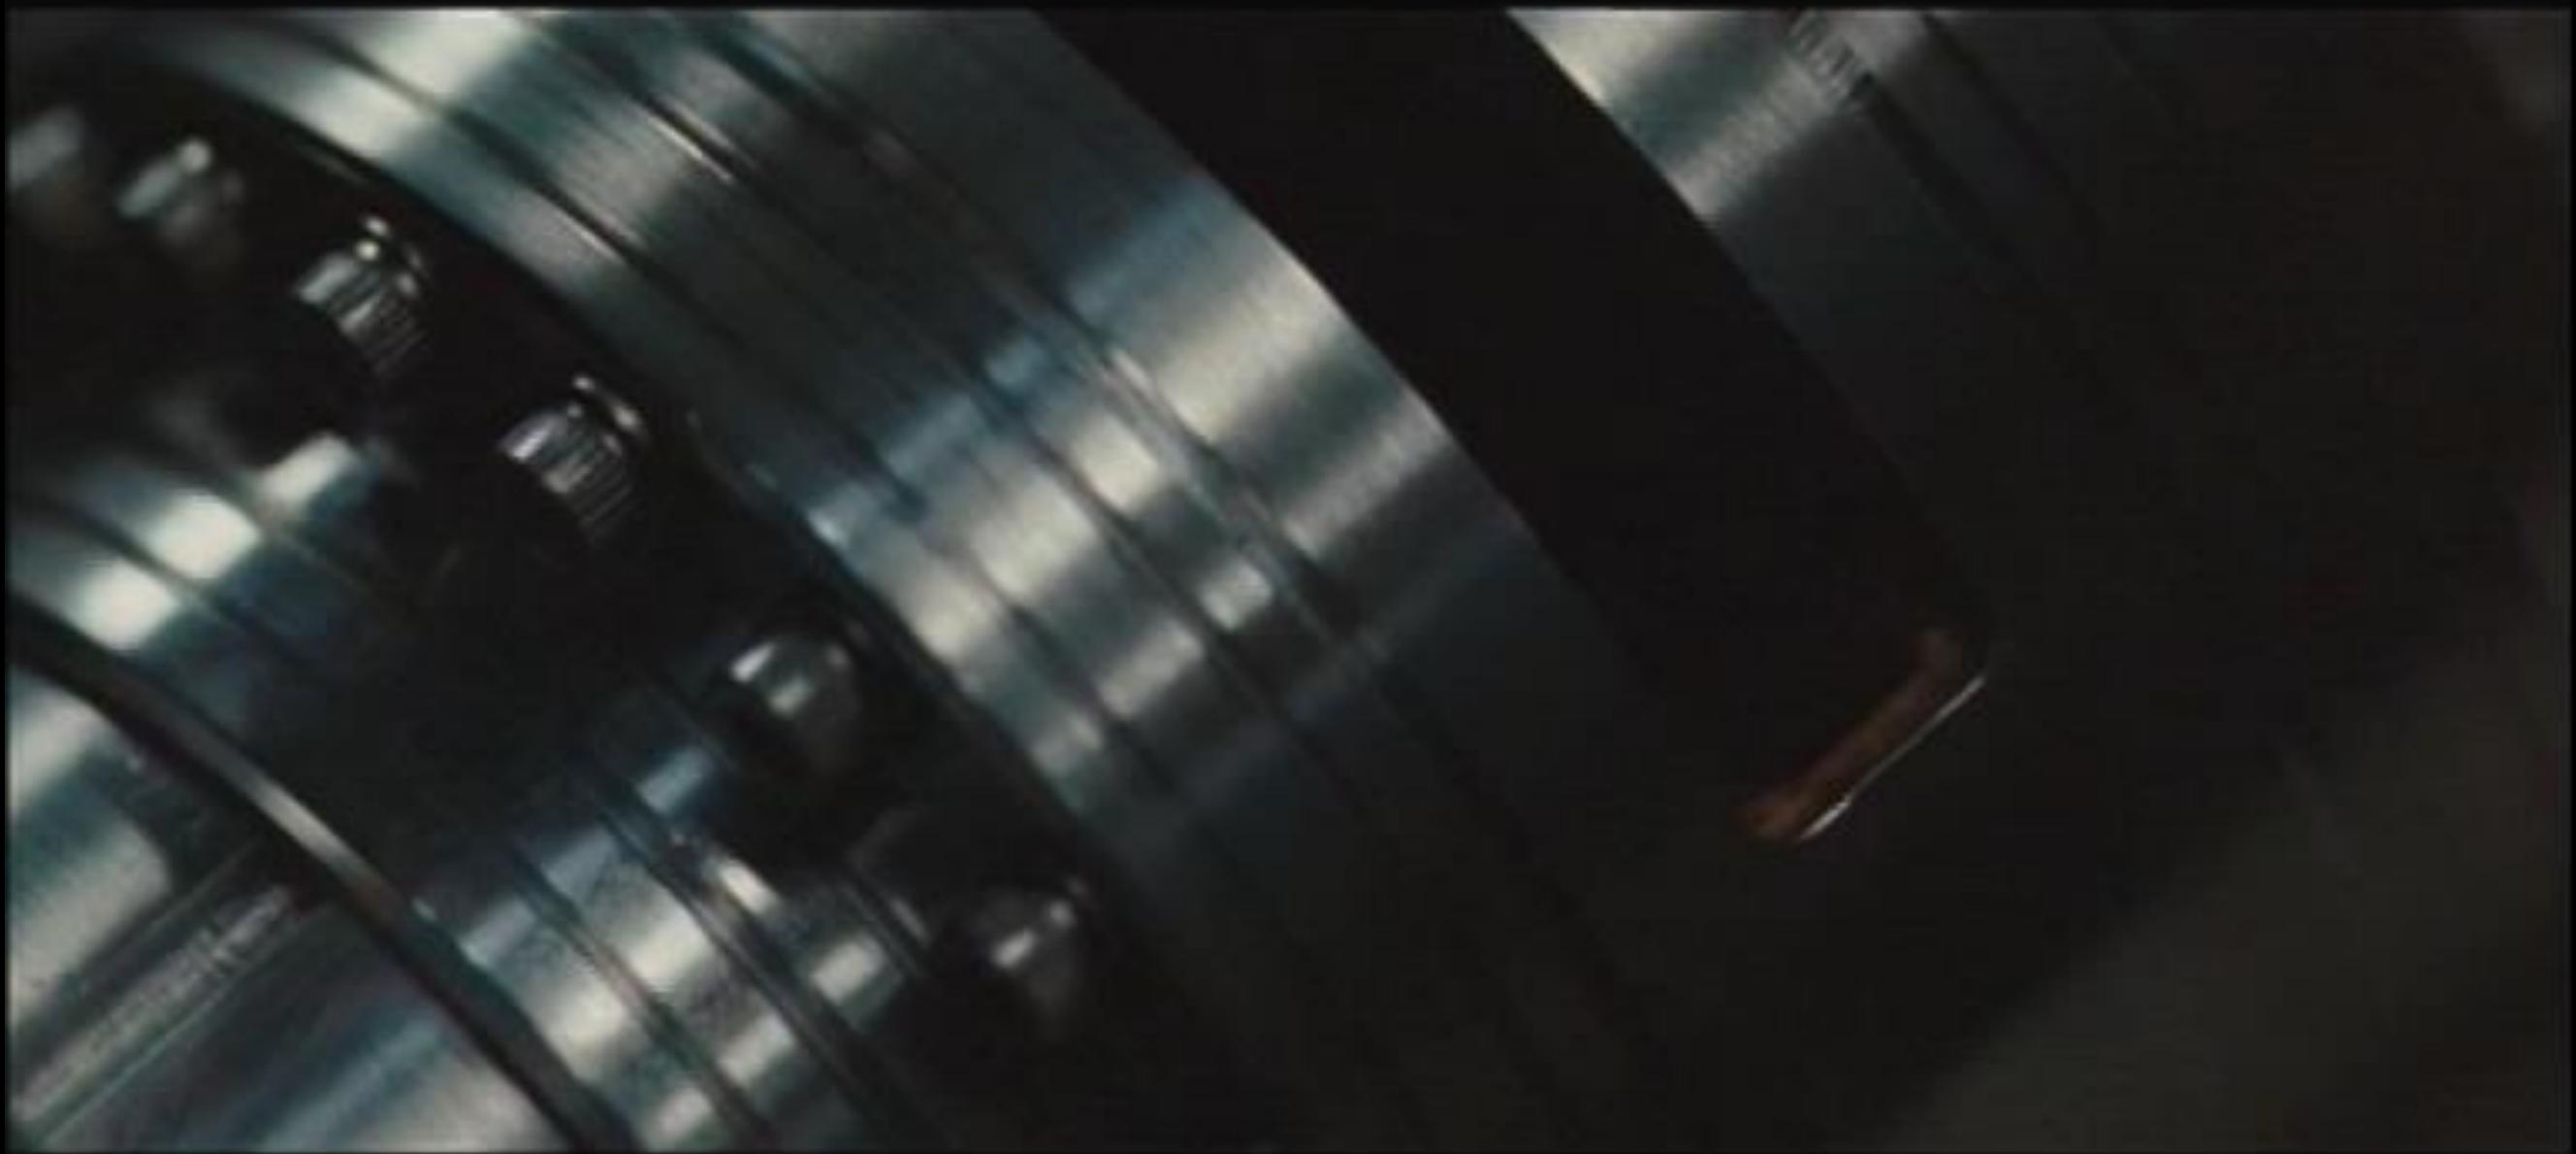

5 An energy source? A bomb?

Dan Brown: “Antimatter is the energy source of the future”!

Antimatter production **requires energy**

**1,000,000,000 times more energy invested
than released by annihilation**

Antimatter explosion in “Angels & Demons”

5 An energy source? A bomb?

Dan Brown:

“0.5 g antimatter makes a powerful bomb”

$$E=mc^2$$

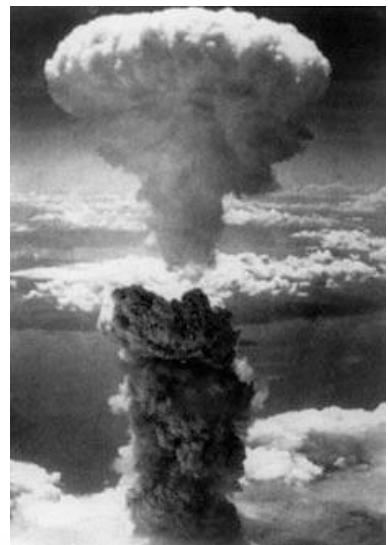

22 kt TNT = $9 \cdot 10^{13}$ J =
0.5 g antimatter + 0.5 g matter

So this is correct, but

Hiroshima - 20 kt TNT equivalent

Angels & Demons - The Physics behind the Movie

5 An energy source? A bomb?

$$0.5 \text{ g antimatter} = 4.5 \cdot 10^{13} \text{ J}$$

Total energy needed (efficiency = 10^{-9}) : $4.5 \cdot 10^{22} \text{ J}$

Even with electricity discount price CERN by EDF
[$1 \text{ kWh} = 3.6 \cdot 10^6 \text{ J} = 0.1 \text{ €}$]

Price **1,000,000,000,000,000 €**

Delivery time **1 000 000 000 years**

Anything useful ??

Yes - the PET scanner can save lifes!

Positron Emission Tomography

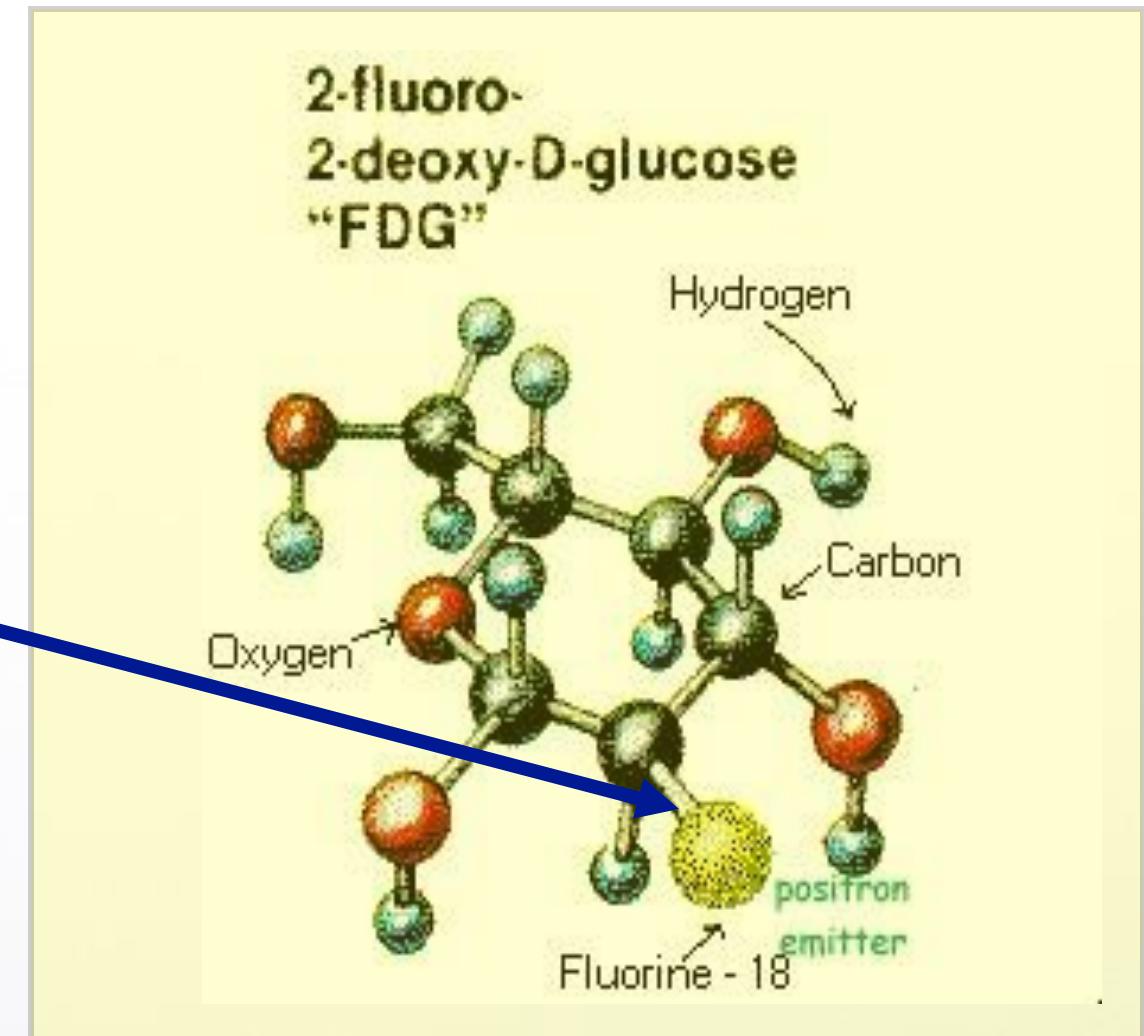

Glucose supplies energy

Add **positron** emitting isotopes
(e.g. F-18) to glucose

Inject into blood stream

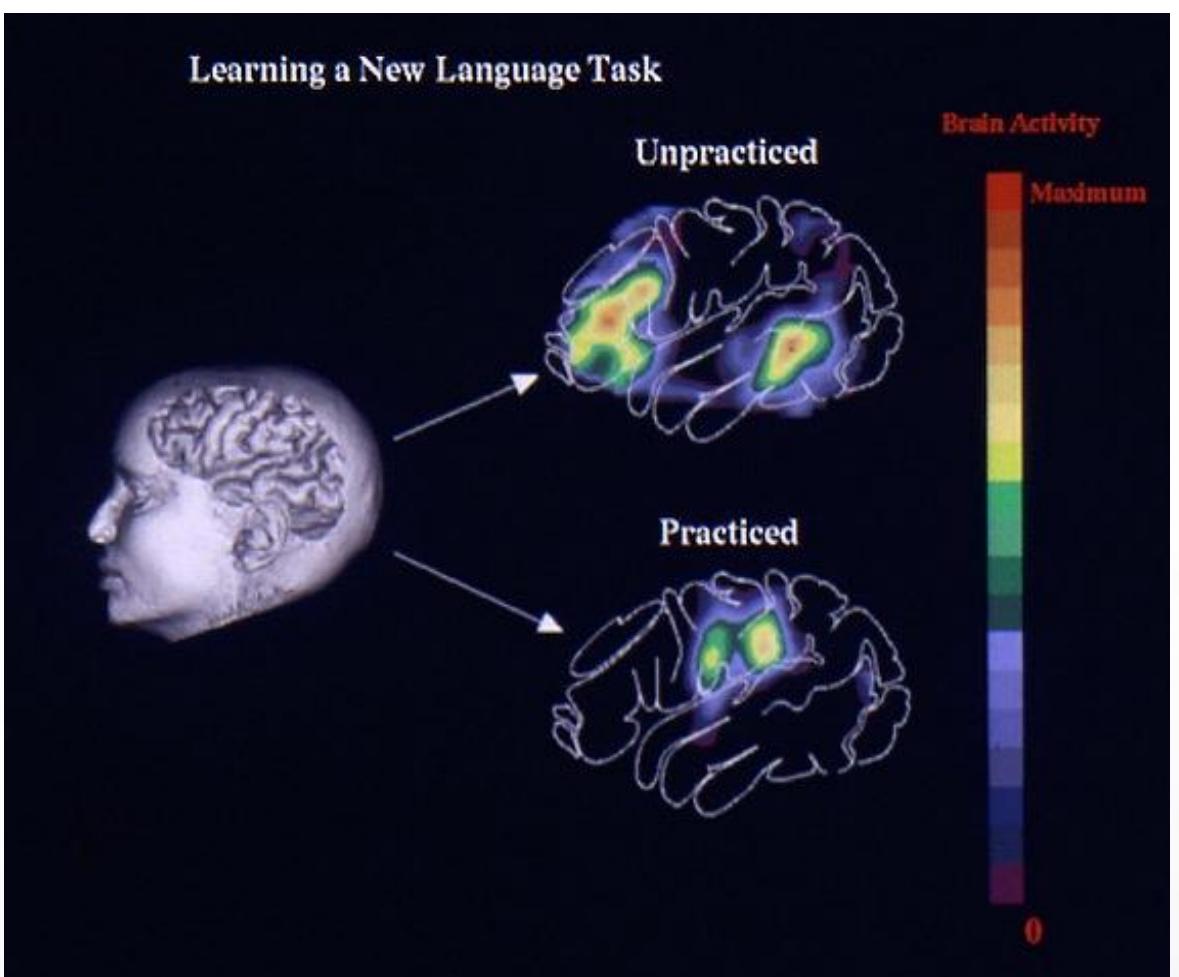

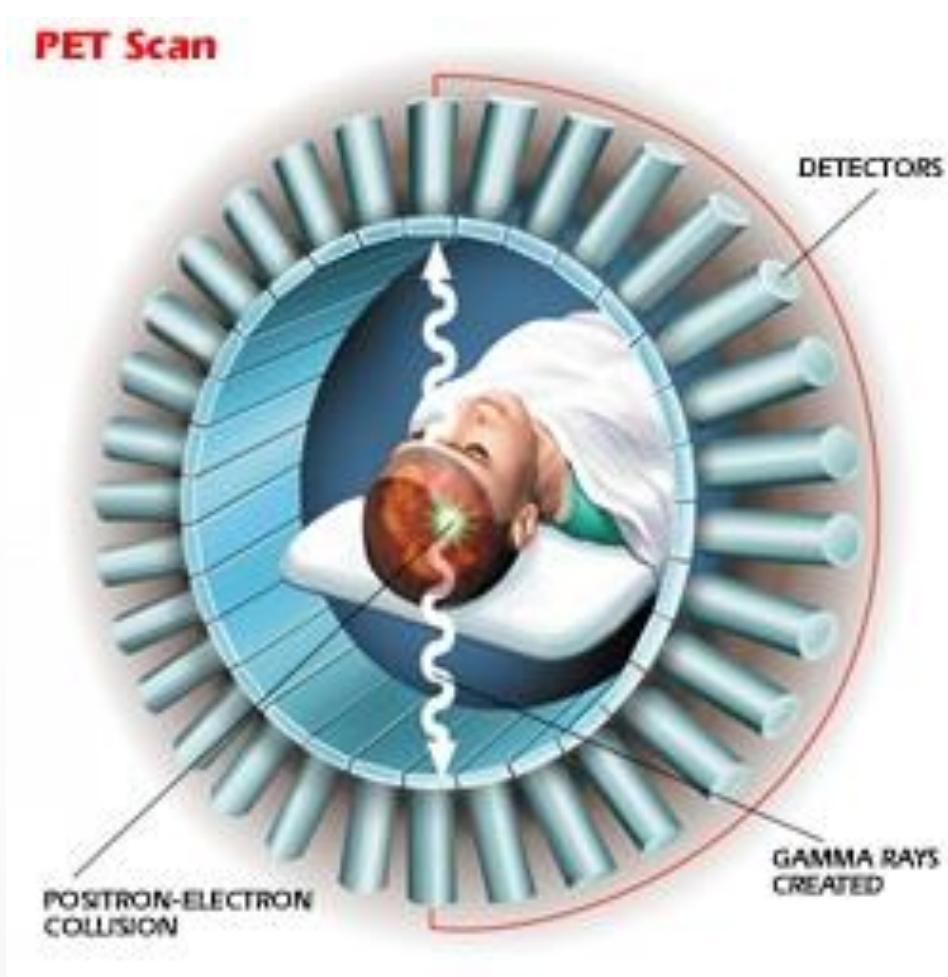

Glucose accumulates where
energy is needed

Positron emission and annihilation - detect where the glucose is!
!

5 Antimatter in daily life

Positron Emission Tomography (“PET Scan”)

- Antimatter helps**
- to understand how the brain works
 - to find tumours

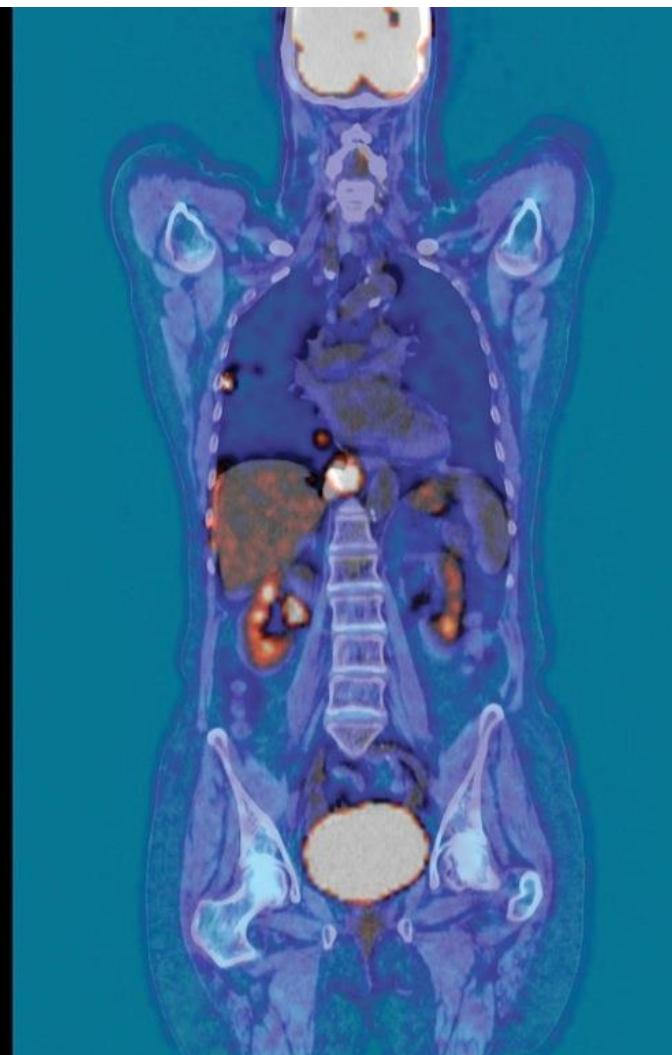

Angels & Demons - The Physics behind the Movie

5 Antimatter in daily life ?

Positron Emission Tomography (“PET Scan”)

CT Scan only

Combination

PET scan only

**Antimatter helps to find
tumours**

Angels & Demons - The Physics behind the Movie

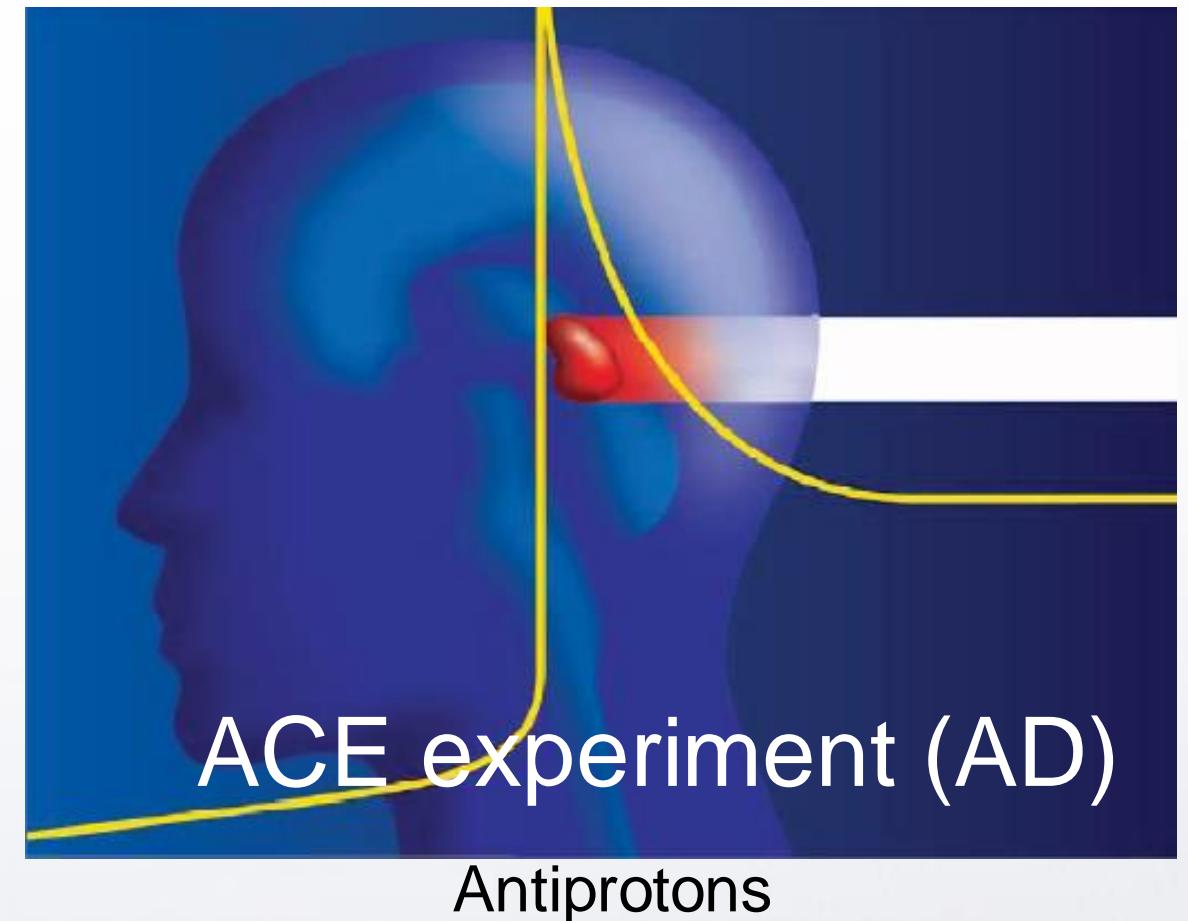

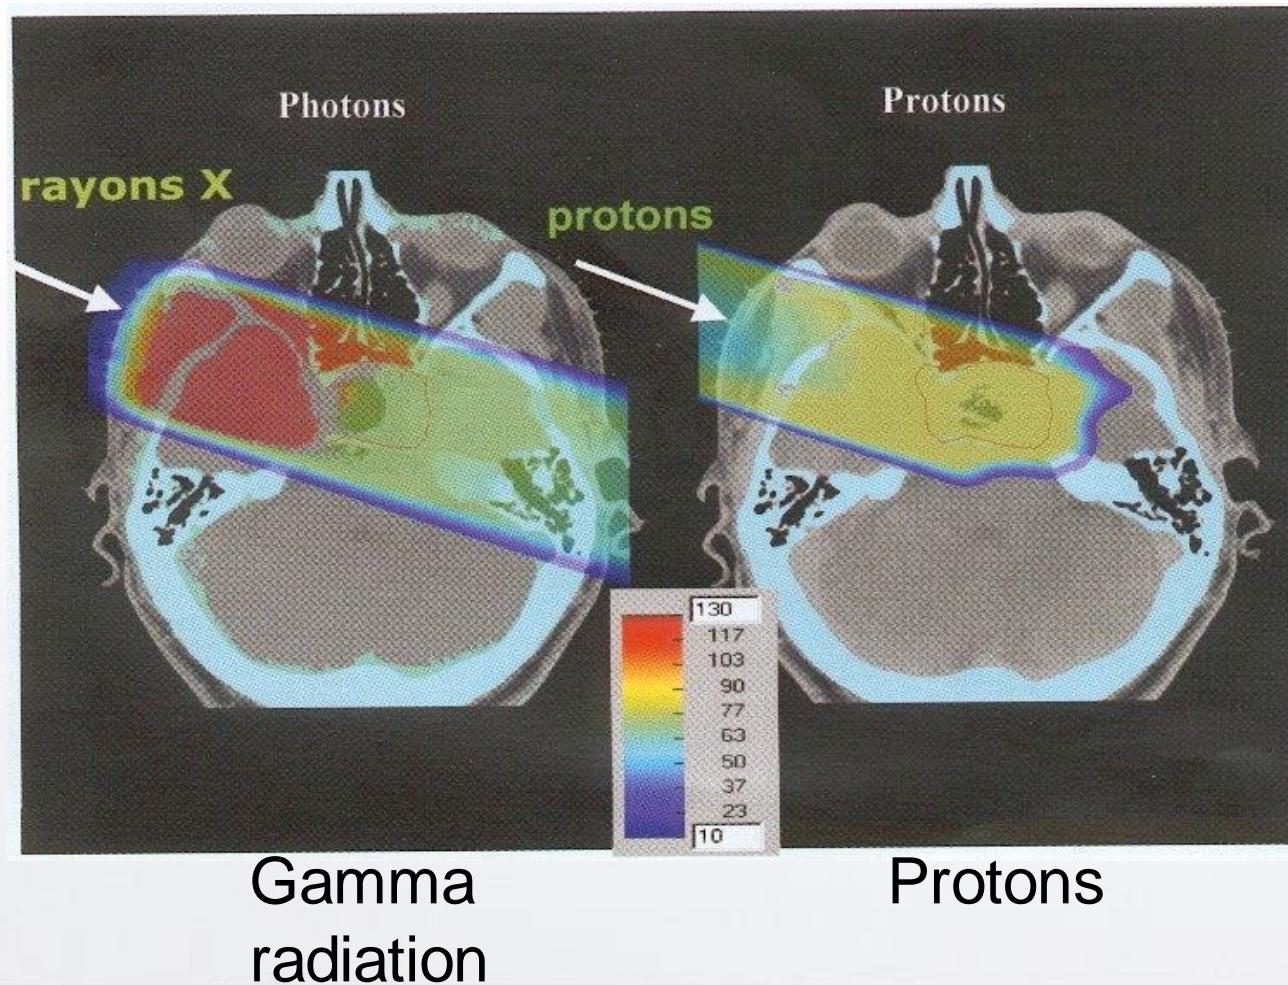

5 Antimatter in daily life ?

Tumour therapy with antiprotons ?

Gamma radiation destroys many healthy cells

Protons deliver radiation more specifically to tumour cells

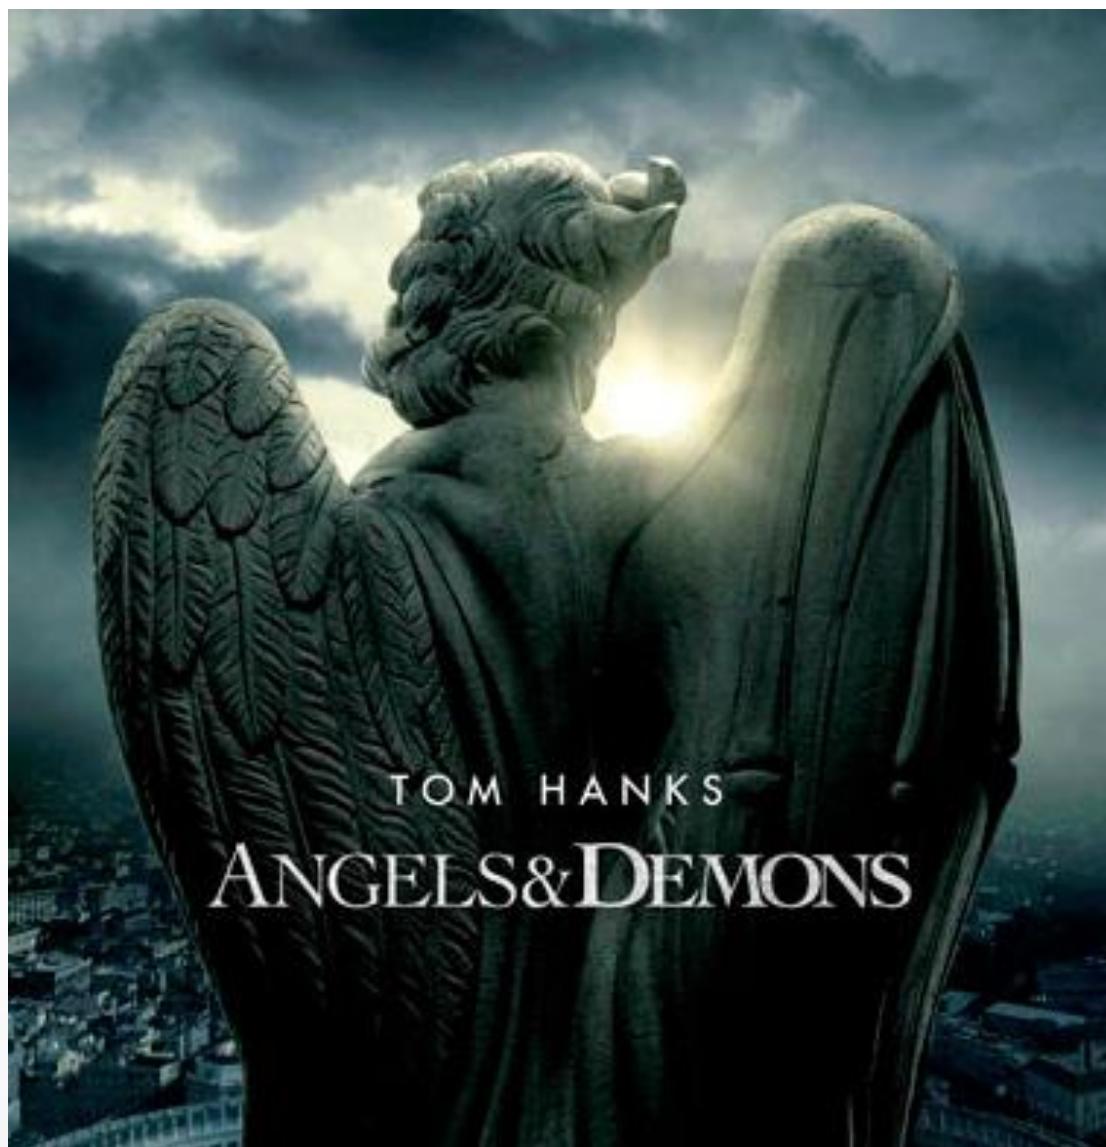

Antiprotons would be 3 x more efficient than protons (annihilation!)

What did Ron Howard say
?

Angels & Demons - The Physics behind the Movie

Laser cooling

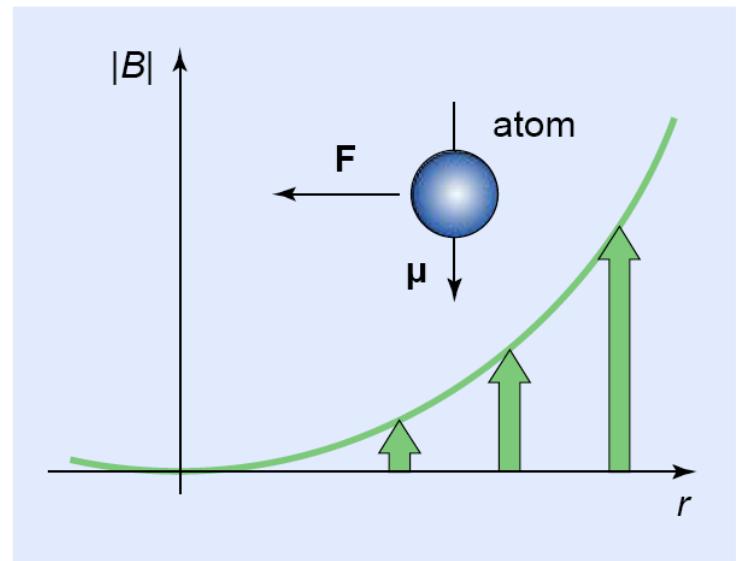

121 nm laser needed
Prototype at MPI Munich
... only 50 nW

Magnetic multipole traps ?

$$U = -\vec{\mu} \cdot \vec{B}$$

$$\vec{F} = -\vec{\nabla} U$$

Low field seeking atoms (50%) at $r=0$

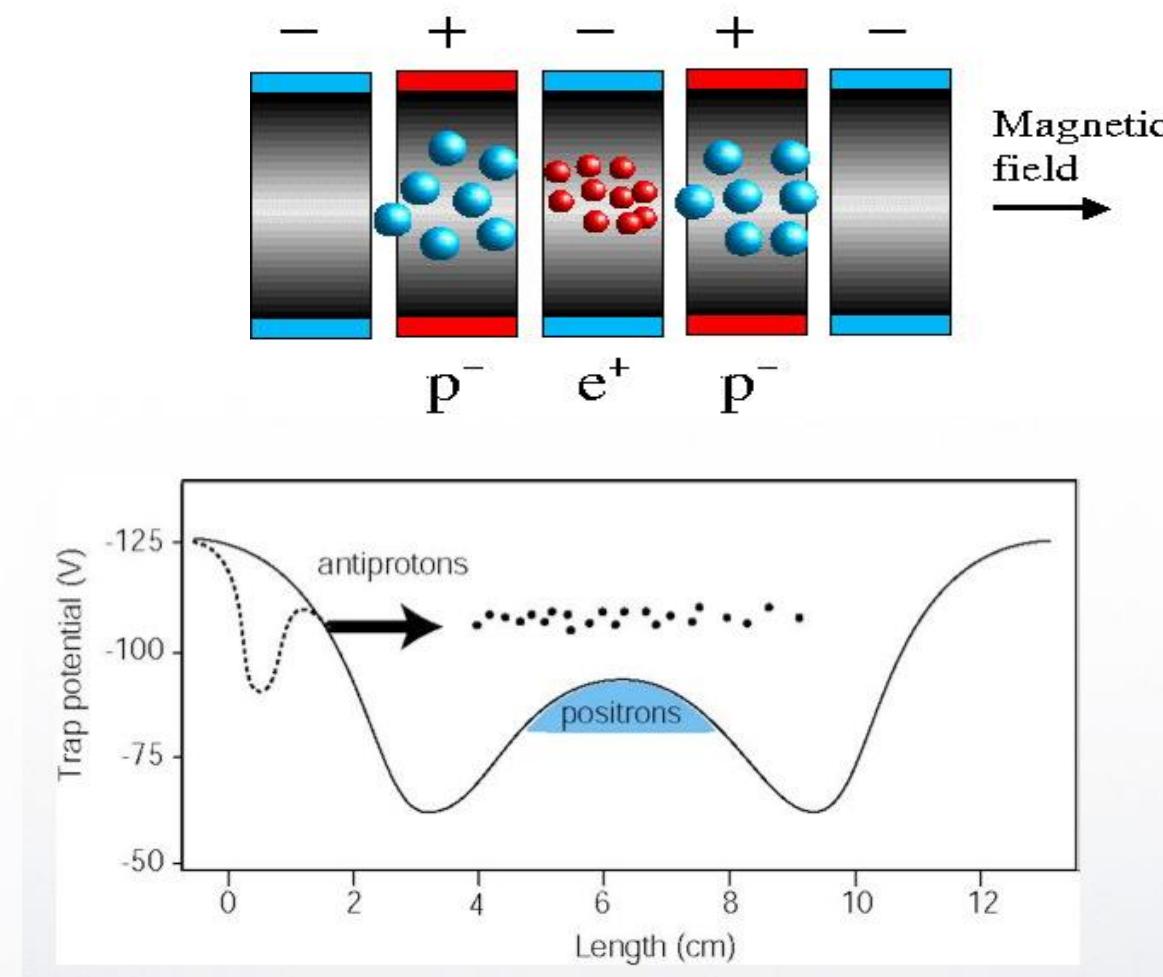

BUT: Very shallow potential (~ 0.07 meV/T)

Realistic $\Delta B \sim 0.2\text{-}0.3$ T \Rightarrow **E < 0.02 meV**

(reminder: produced antihydrogen has $E_{\text{kin}} \sim 1\text{-}200$ meV)

Trap antihydrogen from low energy ‘Boltzmann tail’ ?

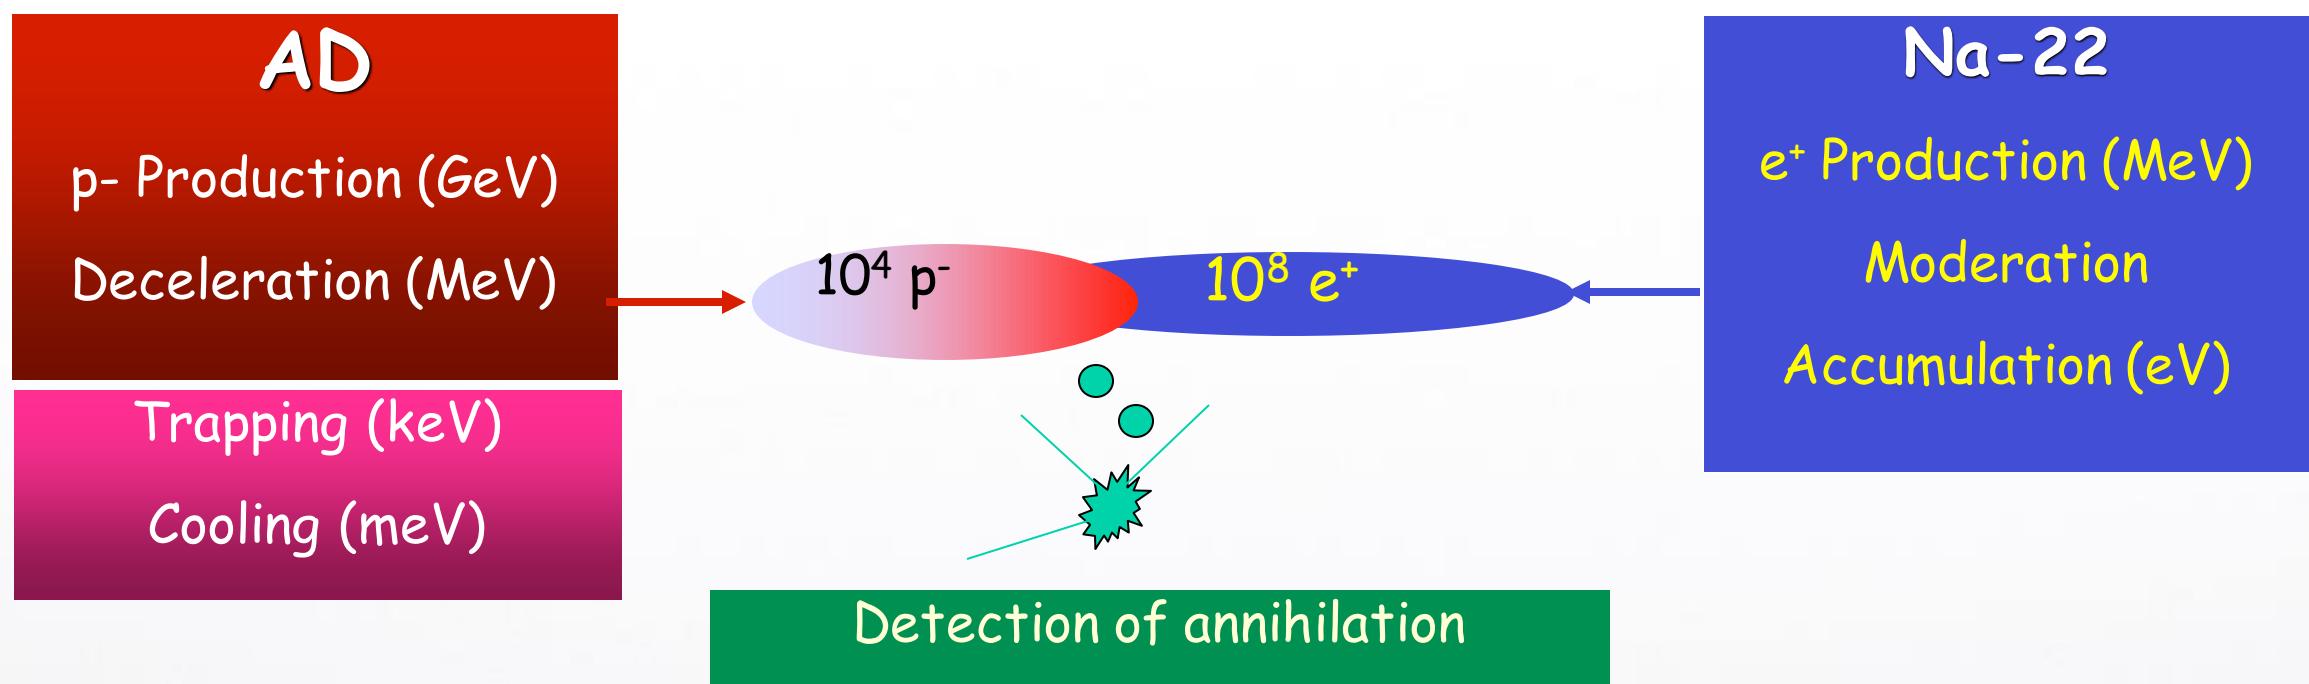

Example: Sextupole magnet

- More than 1 million antihydrogen atoms produced
- Small kinetic energy ($< 0.01 \text{ eV}$)
- Next step (in progress): trap antihydrogen atoms

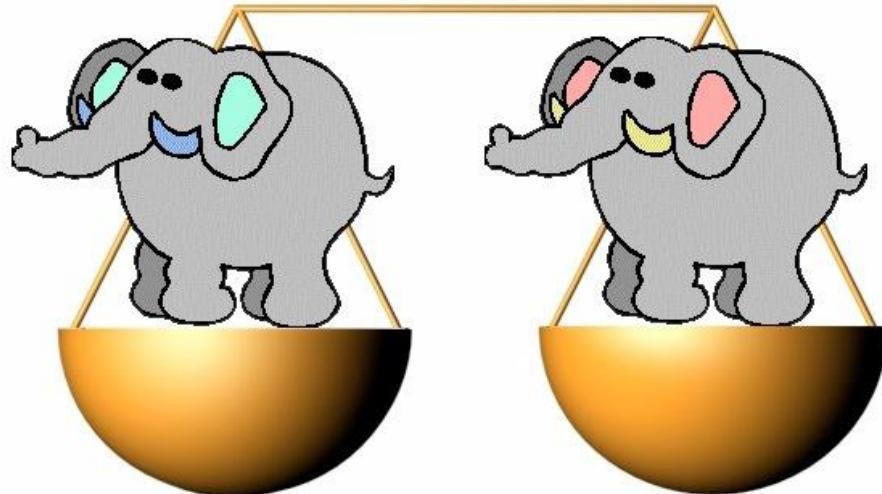

p^- and e^+ in mixing trap (cooling)

Antihydrogen formation

Antihydrogen milestones

Is that true? Make very precise comparisons!

difference less than one dust grain

Mass of proton and antiproton ?

Present result: $\Delta M/M < 0.000\ 000\ 000\ 1$

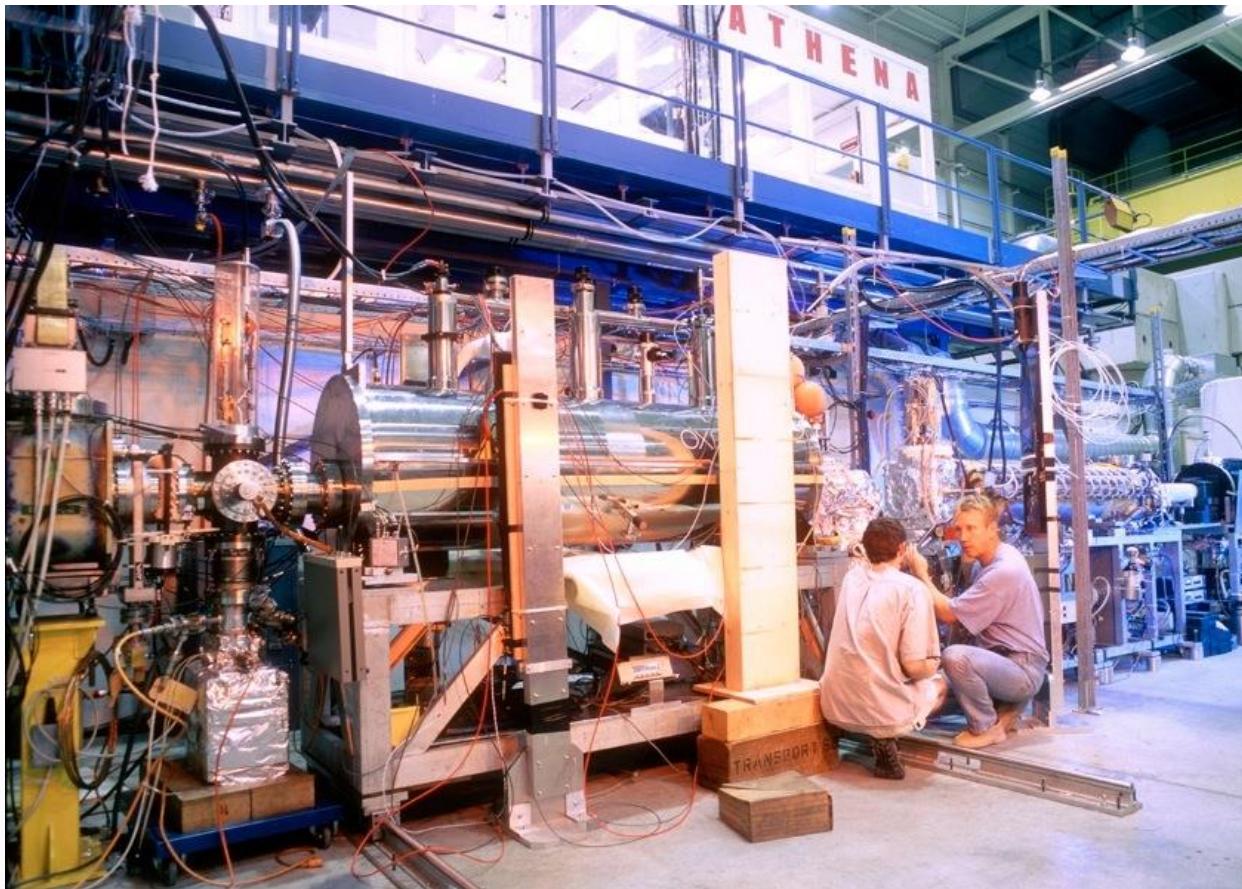

Magnetic moment of electron and positron ?

Present result: $\Delta \mu/\mu < 0.000\ 000\ 000\ 001$

Present status: excellent agreement !

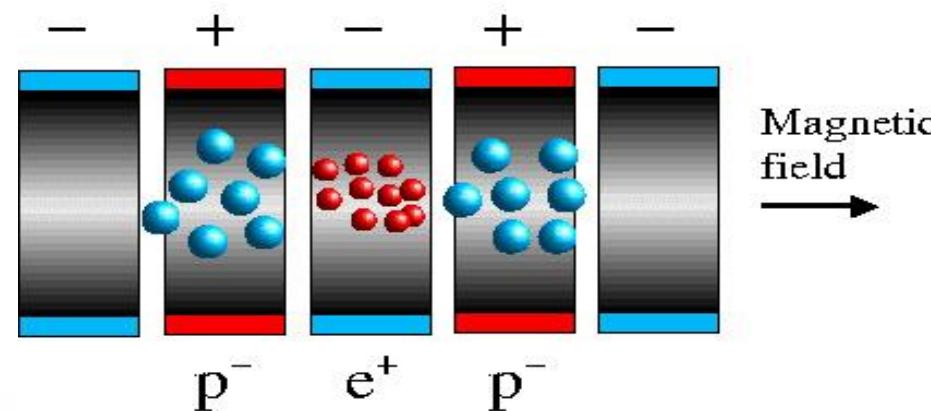

Angels & Demons - The Physics behind the Movie

ATHENA Experiment (2002), at the AD facility

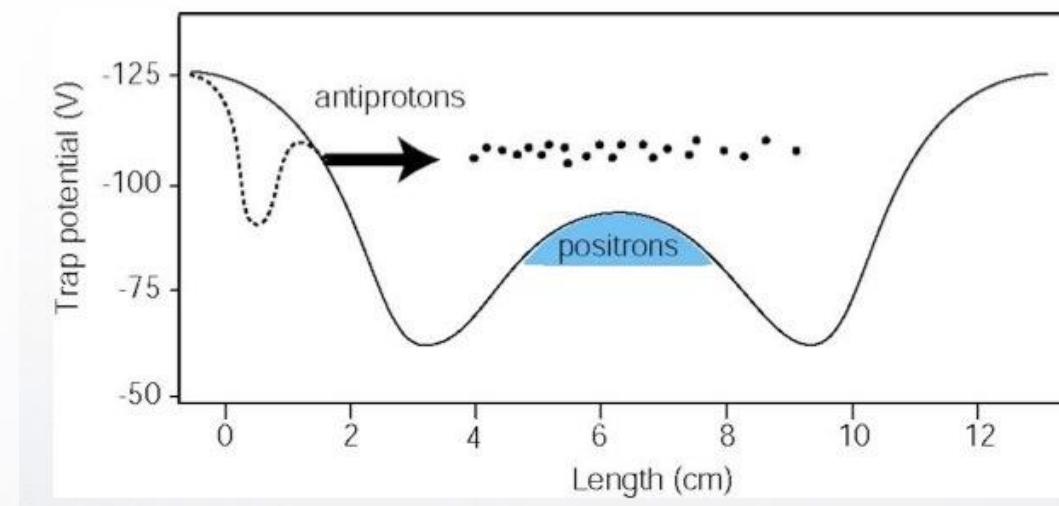

- More than 1 million antihydrogen atoms produced
- Small kinetic energy ($< 0.01 \text{ eV}$)
- Next step (in progress): trap antihydrogen atoms

2002: ‘Cold’ antihydrogen production by AD experiments*

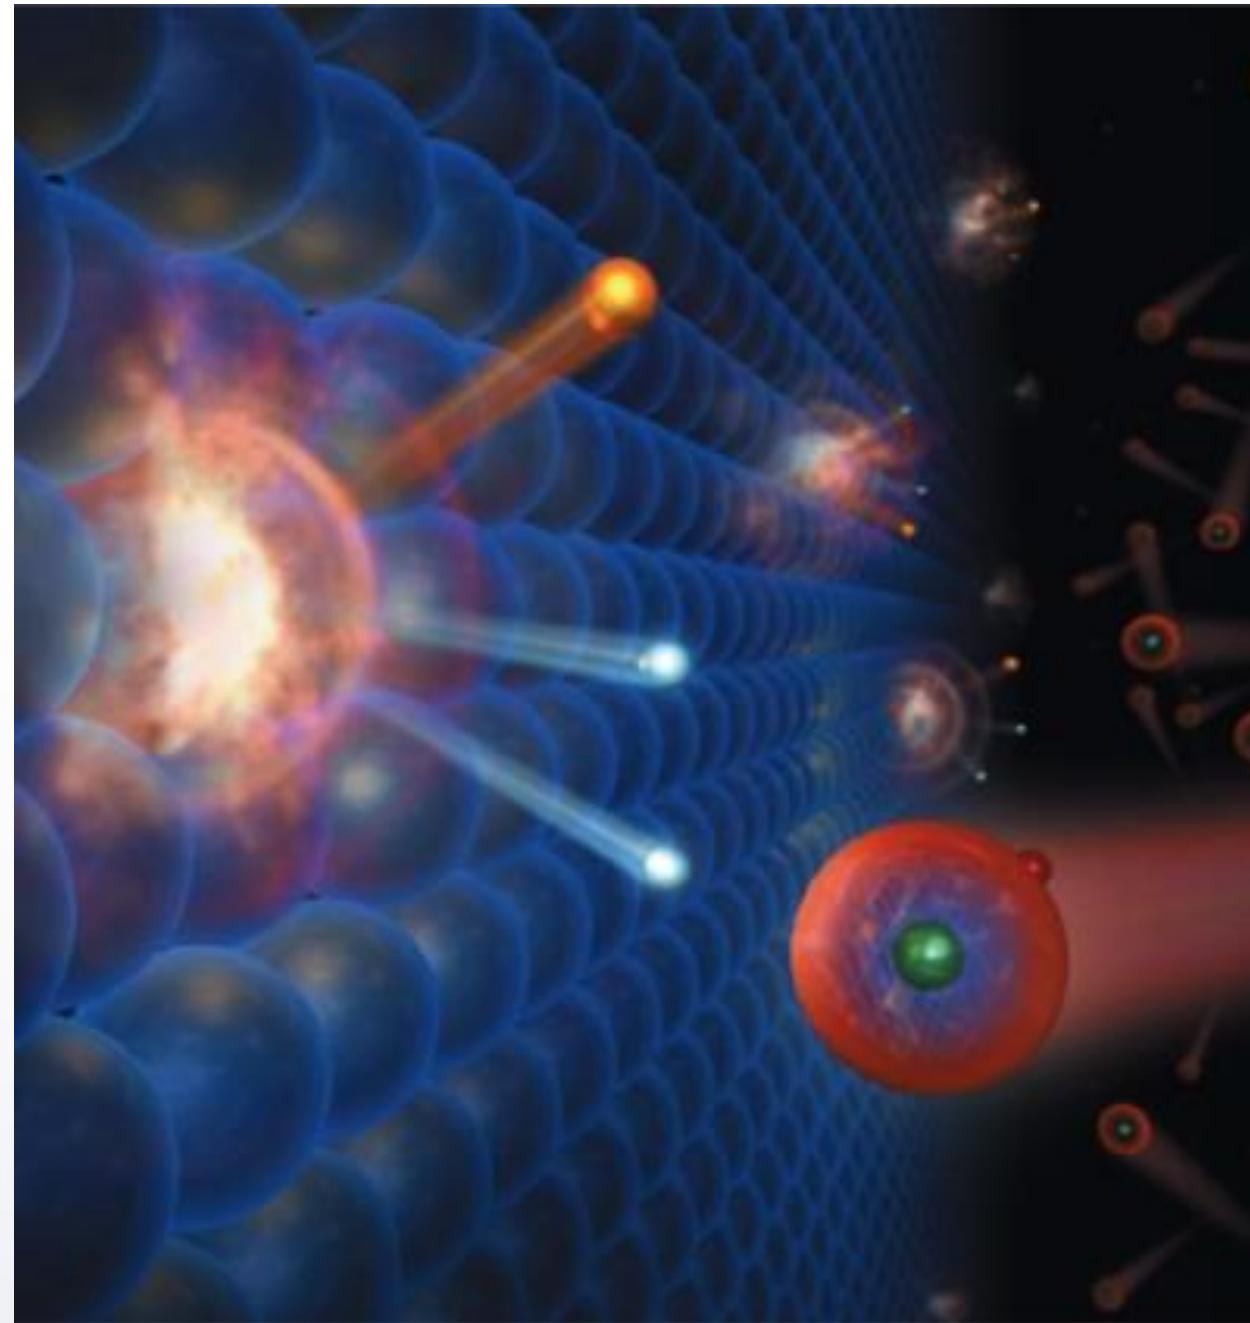

Recombination

- More than 1 million antihydrogen atoms produced
- Small kinetic energy (< 0.01 eV)
- Next step (in progress): trap antihydrogen atoms

Next step: Trapping antihydrogen

Neutral (anti-) atoms escape from Penning trap

Angels & Demons - The Physics behind the Movie
