

KISTI-GSDC Status for RUN2

- Resource Installation

- For ALICE:

| | CPU | DISK | TAPE | Network |
|------------------|----------------|----------------|----------------|---------|
| Pledges | 28 kHS06 | 1,000 TB | 1,500 TB | 10G |
| Installed (used) | 28 kHS06 (90%) | 1,000 TB (60%) | 1,500 TB (53%) | 10G |
| % of Req. | 23% | 6% | 15% | |

- 2015 RUN2 RAW replication up to now (since May)

| Period | LHC15d | LHC15e | LHC15f | LHC15g | Total |
|---------|--------|--------|--------|--------|-------|
| RAW(TB) | 6.5 | 9 | 136 | 107 | 258.5 |

- Concerns

- (Expectation) 1PB RAW comes to KISTI in 2015 → Full usage of tape
- Flat budget, hard to increase pledges on storage; feasible to add 500 TB to DISK this year
