Sanford Laboratory

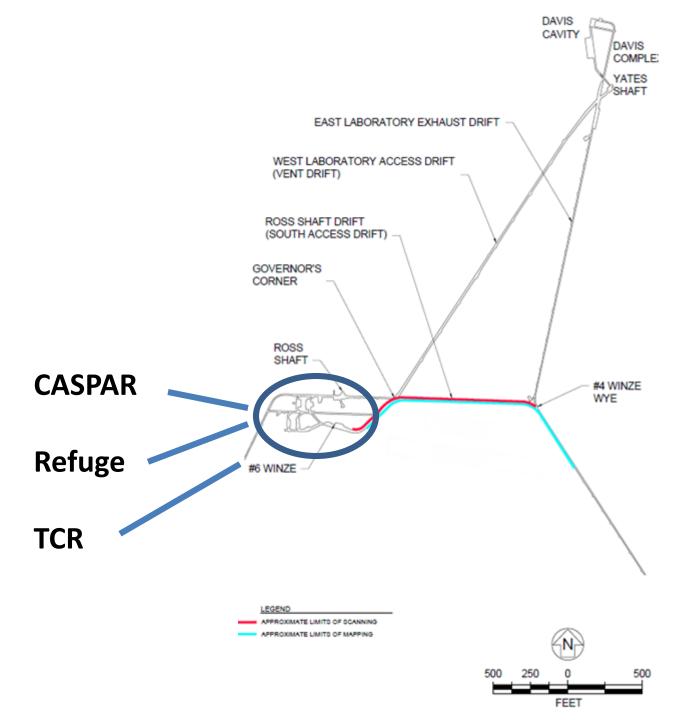

Ongoing Projects:

Dark Matter Searches

LUX will run until 2016

LUX-ZEPLIN (LZ), selected it as one of three experiments that will be funded in the next-generation dark matter search.

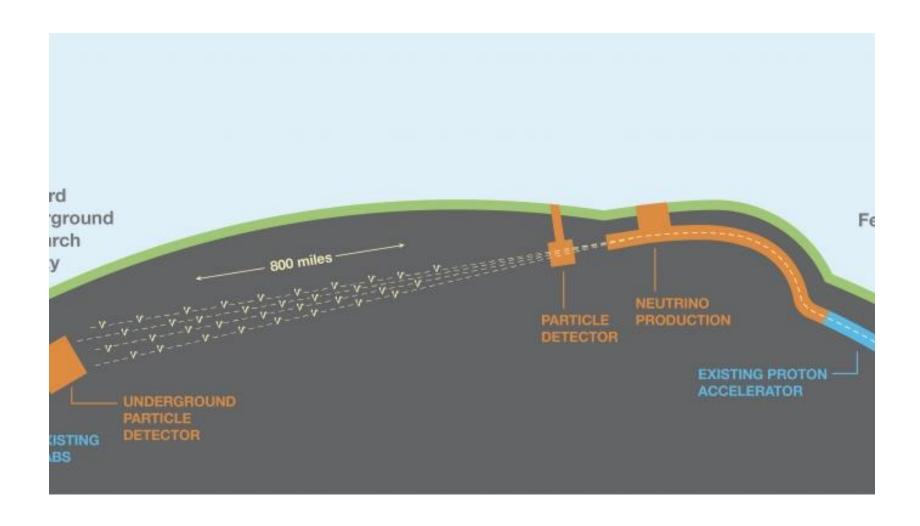

- Construction to begin in 2016
- Commissioning date 2018
- Majorana Demonstrator
 - array of germanium detectors, to search for neutrinoless double-beta decay of germanium-76
- CASPAR Compact Accelerator System for Performing Astrophysical Research
- BHSUC Black Hills State University Underground Campus
- LBNF detector for DUNE
- Visitor's Center
- Ross Shaft Refurbishment

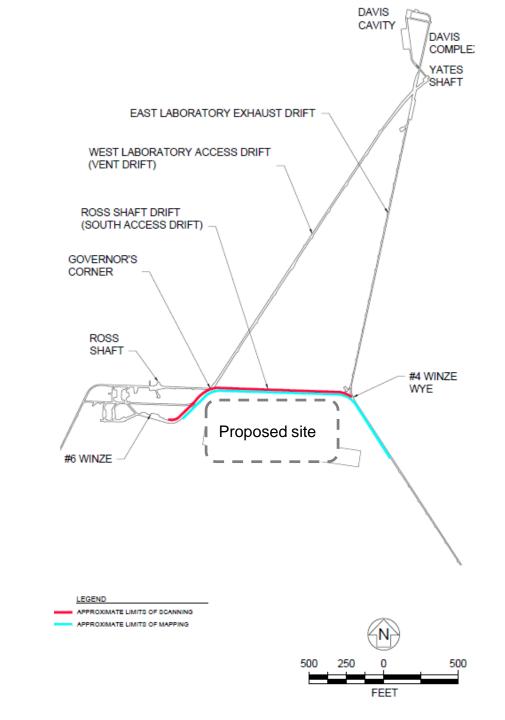

CASPAR construction (shop area)

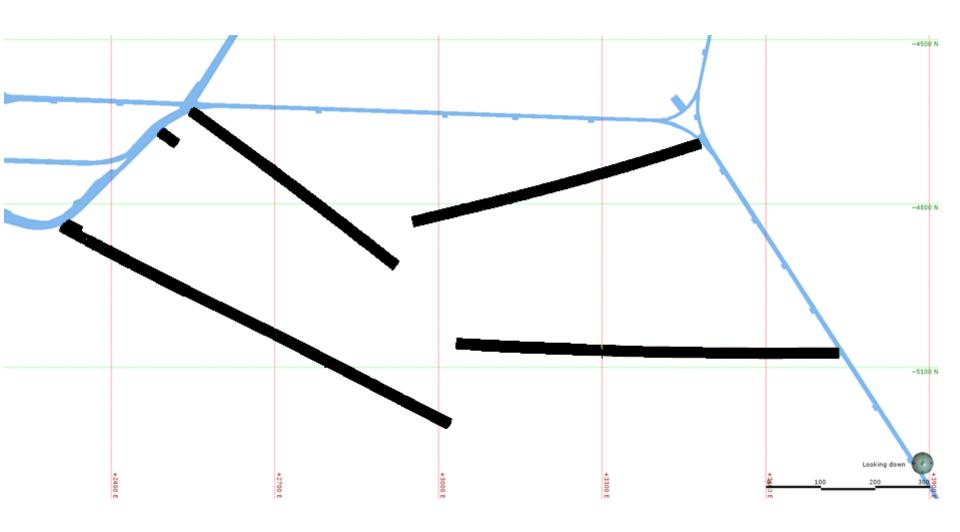

DUNE - Deep Underground Neutrino Experiment

Geotechnical Drilling for DUNE (LBNF)

Geoscience Experiments – ongoing and being proposed

Meeting on Underground Science to be held at South Dakota School of Mines

May 17 – 20, 2015
