

4° EGEE User Forum/OGF25 OGF-Europe's 2° International Event

Silvana Muscella, OGF.eeig Technical coordinator OGF-Europe

www.ogfeurope.eu www.ogf.org

Overview

- OGF-Europe: Making an Impact
- Driving Standards Forward
- Accomplishments so far [2008 -2009]
- Planned for [2009-2010]
- OGF-Europe launches Web 2.0 website
- OGF-Europe at OGF25
- Work with Us

OGF-EUROPE: Making an impact

- Promoting the value of standardisation enabling innovation
- Developing standards with end-users, developers, diverse groups
- Connecting user groups to share best practices & transform them into standards
- Supporting the implementation of European standards
- Fostering synergies between other SDOs such as W3C, SNIA, DMTF, OASIS
- Ensuring OGF standards are aligned with the needs of European stakeholders

Driving Standards Forward

- **Bridging the gap** between OGF standards and the needs of Stakeholders
- Active in creation of introducing OGF-Europe Workshops on transition to cloud computing and data services
- **Industry Expert Group (IEG)**: 17 distinguished & voluntary group of industry members
- **Analysing the needs of EU businesses** & ensuring OGF standards are aligned with industry needs
- Reports on **adoption challenges, best practices & user case studies**
- **Introducing & Sensibilising the Next Generation of Scholars**
 - Development of the Student Scholar Programme
 - Supported the Student scholars at OGF23 & OFG25

Accomplishments so far 1 of 3

- **1st International Event** - OGF23, Barcelona, ES, June 2008 >530 attendees, international press coverage, press conference, rapporteur reports on main results
- **Community Outreach Seminars Selected Themes** In collaboration with OGF: Digital Repositories, Green IT, Grids & Cloud Computing, Software Development, Service Oriented Infrastructures - a Telco industry perspective, Creative Industries
- Adoption Challenges Reports
- Digital Repositories: Evolving a Community
 - First Digital Repositories Community Outreach Seminar
 - Workshop @ IDCC, Edinburgh, UK, December 1-2, 2008
 - Supporting the OGF Data WG
 - Community Best Practice Report
 - Follow-Up at OGF25

Accomplishments so far 2 of 3

- **Grid Interoperability Now (GIN -CG) Workshops**
 - Supporting through secretarial support to dedicated meetings throughout 2008
 - Reps. Of OGF-Europe assisted in the meetings to ensure real production level interoperability which has led to a new OGF WG est. the Production Grid Infrastructure PGI-WG
- OGF-Europe **Tutorials** focus on:
 - Managing computational activities on the grid, exploring core OGF standards, such as OGSA-BES, JSDL, HPC-BP and GLUE.
 - As the gLite, UNICORE & ARC middleware are implementing these standards, it is important to try the working systems and stimulate early feedback.
 - The management of storage spaces and files in complex storage systems using the SRM (Storage Resource Manager)

Accomplishments so far 3 of 3

- OGF24 - EU & Asia-Pacific Co-operation on Grids & Future Challenges
- **Survey** Year 1 Designed to connect with the end-user Grid
- Cloudscape > 100 participants met in Brussels Jan '09 for Cloudscape “Exploiring Cloud Computing & its impact on Enterprise IT”
 - Outcome report Publicly available
- **2nd International event** OGF25, in collaboration with 4th EGEE User Forum >580 attendees, 19 demos, > 40 posters & 10 exhibition booths

Planned for [2009-2010]

- Survey yr 2 Feedback of specific standards to create profiles and flags for pursuing best practices

Watch your email Tuesday 4th March !

- Engaging with Standard Related Projects of FP6 & FP7
- Community Outreach Seminars
 - Creative Industries
 - Cloud Computing
 - Green IT
 - Service Oriented Infrastructures in Telco Industry

Work With Us

- Contribute to our monthly eAnnouncements distributed to the Distributed Computing Community
- Support our Community Outreach Seminars with your Best Practice examples
- Inform us of Standards you are working with and how this facilitates your work

Web site: www.ogfeurope.eu or www.ogf.org

Contact: info@ogfeurope.eu

OGF-Europe @ OGF25

- Mon – Tutorial managing Computational activities on the Grid **Caravaggio**
- Mon - Tutorial How new Communities can get access to a Grid infrastructure **Galilei**
- Tue – GIN Updates & Applications **Da Vinci**
- Wed -Digital Repositories COS
- Wed -Software development tools for distributed computing COS **Galilei**
- Wed / Thur -Using IT to reduce carbon emissions & delivering the potential more energy efficient computing COS - **Dante**

Strategic Role of OGF Europe

Funded by the EC, OGF-Europe comes at a crucial time in IT development where the use of distributed computing is transforming the IT landscape in the shift towards an increasingly global, knowledge-based economy.

OGF-Europe is interacting with diverse organisations across a wide range of verticals & domains to help create awareness of distributed computing & the major benefits it delivers.

OGF-Europe aims to play a key role in influencing the drive towards global standardisation efforts and in bringing best practices back into the EU computing environment.

OGF-Europe provides us with the resources needed to deeply engage with European grid users and providers and to respond to their unique set of requirements.

Craig Lee, OGF President (watch the video in the Video section of the Channel)

OGF Mission Statement - OGF Confirms its Long-term Commitment to Applied Distributed Computing. To read the Mission Statement, click [here](#). To read the answers to the FAQ, click [here](#).
