and Media

- **Enabling the execution of various workflows (Kepler, Taverna, Triana, P-GRADE) on EGEE (Mr. KUKLA, Tamas)**
- **Workflow management tool for Earth science applications (TRAN, Viet)**
- **SchedScripter: Workflows for Grid-based Human Resources Scheduling Applications (Mr. GOULAS, George)**
- **An Interoperable Grid Workflow Management System (Dr. MIRTO, Maria)**

- **What can be done to make workflow more accessible?**
 - Make part of middleware?
 - Make existing tools more visible?
 - More documentation, tutorials, etc.?
- **Different workflow “philosophies”?**
 - Data-driven, service-driven, ...
 - How do different strategies relate to each other?
- **Need for interoperability?**
 - Should different tools, strategies be interoperable?
 - What role do standards play for interoperability?
