Operations Management Board	

Meeting Date	28 May 2015
Venue:	http://connect.ct.infn.it/egi-inspire-sa1/
Agenda:	http://indico.egi.eu/indico/conferenceDisplay.py?confId=2376

Contents

AGENDA and ACTIONS

	Agenda Item	Action

1.	**Introduction and Operations update**
	• Three new VOs created: **geohazards.terradue.com** h**ydrology.terradue.com, long-tail.egi.eu**
	• Per user sub proxy support manuals:
	   o http://wiki.nikhef.nl/grid/Lcmaps-plugins-robot
	   o https://wiki.egi.eu/wiki/MAN12
	• VO SLA under discussion for: DRIHM, WeNMR, Life sciences, BILS
	• A/R tables will be circulated but follow up (tickets) will happen in June
	• Site suspension procedure: PROC21 to comment
		NGI: Provide comment the PROC21

2.	**Security updates** Sven Gabriel reported security topics: • 1 site suspended due to not patched vulnerability • Re-certification of site suspended for security reasons is now overseen by CSIRT, 4 sites affected • Incidents in the fedcloud caused by weak password configuration • Poor feedback from some cloud sites, to be improved • There is room for improvement for incident prevention and	

	incident intervention in the cloud. • **Must do**: Sites must follow IR procedures, Improve checks in VMI stored in AppDB, Fedcloud to be represented in EGI IRTF	
3.	**Engagement activities in EGI** Gergely Sipos reported on: • EGI Engagement plan • EGI training plan • The current engagement activities: ○ Tracked on RT	
4.	**Changes in APEL Probes** Stuart Purdle reported: • The APEL team proposes a change in how the accounting data si monitored • The change aims to solve the problem of the current probes which test non uniformly per site or per service, depending on the test • The proposal is to test per publisher, rather than per site. • The consequences are a need to create new service types in GOCDB to track the publishers and the producers of accounting data	NGIs: Discuss the changes and report any feedback to the APEL team.
5.	**Evolution of the EGI AAI services** Christos Kannelloupos reported on the EGI-Engage JRA1.1 task plans which is the project task devoted to the evolution of the EGI AAI infrastructure. • Slides include a draft architecture and an overall timeline of the first part of the project: • Have most ops tools AAI capable within one year • Have some Cloud services AAI capable within one year	**NGIs**: Provide feedbackon the plans, suggestions and possible use cases.
6.	**Core activities survey update** Peter Solagna reported on the survey that assessed the relevance of the current set of core activities. The bid for new services will start in July, and the next provisioning period will be 1.5 years rather than 2 years, starting from May 2015. • Details in the slides in agenda	

PARTICIPANTS

```
Christos Kannelloupos (GRNET)
Diego Scardaci (INFN/EGI.eu)
Emir Imamagic   (SRCE/ARGO)
