How will we cope with Safety in the long Shutdown?

Thursday 13 January 2005 12:10 (20 minutes)

The international Safety Rules concerning the Access to radioactive areas are requiring the closure of the PS Complex during the shutdown. In order to comply with this rules, a new access procedure based on the existing system, will be implemented in the period December 2004 - Easter 2006. The modifications introduced in the Inflector area and the possible scenario(s) concerning the Operation from the new CCC in 2006, will be presented.
