

FermiGrid - Status and Plans

Monday 13 February 2006 15:00 (20 minutes)

FermiGrid is a cooperative project across the Fermilab Computing Division and its stakeholders which includes the following 4 key components: Centrally Managed & Supported Common Grid Services, Stakeholder Bilateral Interoperability, Development of OSG Interfaces for Fermilab and Exposure of the Permanent Storage System. The initial goals, current status and future plans for FermiGrid will be presented.
