

Session Program

4-9 Jul 2005

HCP2005

***Session 3 - Electroweak Physics at the
Tevatron and LHC***

Les Diablerets
Switzerland

Tuesday 5 July

08:15

Session 3 - Electroweak Physics at the Tevatron and LHC

Session | Location: Les Diablerets, Switzerland | Convener: Thomas Muller

08:15-08:45

Standard Model EWK physics at the Tevatron and LHC: theoretical status and perspectives

Speaker

Ulrich Baur

08:45-10:00

Electroweak results at the Tevatron

Speakers

Al Goshaw, Mark Lancaster, Serban Protopopescu

Subcontributions

W/Z production (including asymmetries) (D0)

Speaker

Serban Protopopescu

W Mass and properties (CDF)

Speaker

Mark Lancaster

Diboson Physics at the Tevatron (CDF)

Speaker

Al Goshaw

10:00-10:30

Precision EW measurements at ATLAS and CMS: anticipated measurements and required accuracy (Joint Talk)

Speaker

Nicola Amapane

10:30-11:00

Coffee

11:00
