Panayiotis Tsanakas received his BS degree in electrical engineering from the University of Thessaloniki in 1982, his MSc in Computer Engineering from Ohio University in 1985, and his PhD in Computer Engineering from the National Technical University of Athens in 1988. He is currently serving as professor in the School of Electrical and Computer Engineering of the National Technical University of Athens and as Chairman of the Greek Research and Technology Network (GRNET). He has been also with the George Washington University, as a visiting scholar. He has participated in several national and EU-sponsored projects, in both basic research and general RTD themes, in subjects covering distibuted systems, parallel computer architectures, embedded systems, grid computing, and medical informatics. During the last 14 years he has published four Greek textbooks and more than 60 research articles in scientific journals and international conferences. His research interests include high performance computer systems architectures, and distributed applications in medicine and education.
