

Mr. Kyriakos Baxevanidis is the Deputy Head of the Research Infrastructures Unit of DG INFSO of the European Commission. The Unit supports the provision of computer and communications infrastructures of the highest quality and performance to Europe's researchers, namely by establishing a high-capacity and high-speed communications network for all researchers in Europe (GÉANT) and specific high performance Grid-enabled advanced infrastructures (e.g. EGEE and DEISA), exploiting the benefits of a strong co-ordination between the Research Infrastructures and the Information Society Technologies (IST) Programmes of the Commission, and an enlarged co-operation with corresponding national and international initiatives.

Mr. Baxevanidis has particular involvement in the Grid related efforts of the Unit and in the shaping, implementation and further evolution of the EU *e-Infrastructure* concept.

He previously served in the areas of Services Engineering, Communications Management and Security of IST and of previous EU-RTD programmes.

Before joining the Commission, he worked for several years in Siemens in the field of telecommunication systems as an engineer and leader of a development group.

He holds degrees from the Aristotle University of Greece and from Carnegie-Mellon University, US.
