

Yann Guerin - Grid Computing Technical Director, IBM EMEA

In his role as technical director for IBM Grid Computing activities in Europe, Yann Guerin is coordinating the technical relationships IBM fosters with the Grid community, from researchers to industrial customer early adopters. Yann is a Certified IT Specialist at the EMEA On Demand Design Center focused on Grid and Virtualization. He is thus assisting customers in adopting technologies for Infrastructure Management allowing them to implement On Demand Operating Environments. Yann has 15 years experience in IT, he graduated from the French Nationale Space and Aeronautics Engineering School where he earned a masters degree in information systems and graphical engineering. In the 90s he led various IBM technical programs in Europe in the areas of Linux and Internet Technologies. Prior to his current position, he managed the IBM International Technical Support Organization in the USA producing the flagship redbooks illustrating capabilities of IBM technologies and products for the support of enterprise and collaborative solutions.
