

# Nuclei in the Cosmos - IX

## Tuesday, 27 June 2006

### 7 Experiments in nuclear astrophysics: indirect methods (14:30 - 16:30)

-Conveners: Claudio Spitaleri

time	[id] title	presenter
14:30	[44] Indirect techniques in nuclear astrophysics - ANCs and THM	TRIBBLE, Robert
15:00	[89] Reaction rate of $^{15}\text{O}(\alpha,\gamma)^{19}\text{Ne}$ via indirect measurements	TAN, Wanpeng
15:20	[59] Study of astrophysically important resonant states in $^{26}\text{Si}$ by the $^{28}\text{Si}(4\text{He},6\text{He})^{26}\text{Si}$ reaction	KWON, Young Kwan
15:40	[171] Influences on the triple alpha process beyond the Hoyle state	DIGET, Christian Aa.
16:00	[279] Experimental determination of reaction rates via Coulomb dissociation	MOTOBAYASHI, Tohru
